4738428 GLASS ART FROM THE KILN, 2nd Edition. By Peter Cullen. Fusing, fritting, and cold working are the three major processes for working with glass. The art of glassmaking and the glassmaker’s art are not only very related, but also critical to the making of unique art objects that are often referred to as fine art. Fusing and fritting are techniques that allow the color and texture of glass to be manipulated and altered. Smooth, transparent bowls and dishes can be transformed into freeform objects with unique patterns and textures. Through fusing and fritting you can create an unlimited variety of glass art forms, from simple boxes to complex sculptures. Cold working is different from the other two techniques. It involves shaping and fashioning glass objects by cutting and grinding them. An additional advantage of cold working is that it allows you to work with shapes and forms that are difficult or impossible to achieve by fusing or fritting. Cold working techniques include using a glass cutter, diamond wheel, and glassblower's knife, as well as forming glass with the use of heat. Cold working is a versatile technique that can be used to create simple or complex glass objects. With practice and experience, you can create beautiful and unique glass art pieces. The process of cold working is relatively simple, but it requires patience and attention to detail. By mastering these techniques, you will be able to create your own distinctive glass art projects. The book contains instructions and tips for working with glass, as well as examples of glass art pieces created by artists. The book is divided into chapters, each focusing on a specific aspect of glass art. There are also sections on glass tools and materials, safety, and maintaining your equipment. The book is illustrated with numerous color photos and diagrams, as well as step-by-step instructions for each project. It is a valuable resource for both beginners and experienced glass artists. Whether you are interested in creating unique glass art forms or simply want to learn more about the art of glassmaking, this book is a must-have for your collection. $18.95
