The world is currently witnessing the biggest wave of mass migration since WWII, and the most dramatic example of this phenomenon is occurring in the Mediterranean Sea. Since 2014, over 1.4 million people crossed the Mediterranean in leaking boats, as civil wars in Syria, Afghanistan, and Iraq—and repression and poverty in Africa—pushed them to leave their homes. Collectively, this movement has made crossing the Mediterranean the most popular route for refugees and asylum seekers, with 351,000 making the crossing in 2014 and 600,000 during the first six months of 2015. The world’s response has been both inadequate and inconsistent, with some countries opening their doors to desperate refugees while others have been more closed or even hostile. This book provides a comprehensive and critical analysis of the refugee crisis and the challenges it presents to Europe and other parts of the world. It argues that while the refugee crisis is a complex and multifaceted issue, the world cannot afford to ignore it and must take decisive action to address the root causes of the crisis and provide a just and sustainable solution for those who are forced to flee their homes.
