**6475140** I USED TO KNOW THAT GEOGRAPHY Stuff You Forgot from School. By W. Williams & C. Tappert. It’s hard to know all there is to know about geography and its ever-changing landscape. But with this volume you’ll be able to update your classroom knowledge and examine both the physical and the human aspects of the world in short order. Maps. 175 pages. Reader’s Digest. Pub. at $14.95 $4.95

**4452704** COLLECTOR’S GUIDE TO QUARTZ AND OTHER SILICA MINERALS. By Robert J. Lauf. Presents over 130 vivid images of these beautiful minerals, displaying each in its geological context. Places focus on the chemistry and taxonomy of the minerals, with a section discussing the kinds of environments where these minerals are formed. Full color, 96 pages. Schiffer. Paperbound. Pub. at $19.99 $14.95

**3505839** JEWELS OF THE EARLY EARTH: Minerals and Fossils of the Precambrian. By Bruce L. Stinchcomb. Over 260 vivid color photographs reveal the geo-collectible fossils and minerals associated with the first two billion years of Earth’s history. Explored in the engaging text is the geology of shield areas and their associated rocks and minerals. Also examined are pegmatite and pegmatite minerals. Early minerals and rocks associated with the formation of the earth’s atmosphere are also revealed, as well as some of the oldest fossils. 160 pages. Schiffer. B/411. Paperbound. Pub. at $29.99 $21.95

**337808X** METEORITES. By Bruce L. Stinchcomb. Over 500 full-color images and engaging text provide insight into these interesting collectibles from out of this world. These rocks tell tales to those who know how to read them of nebula, novas, supernovas, red giants, and impacting celestial bodies. Readers can explore the history of our planet and the latest findings about its inner core. 16 pages of photos, some color. 270 pages. Weidenfeld & Nicolson. Import. $6.95

**5832249** CORAL: A Pessimist in Paradise. By Steve Jones. 242 pages. Abacaus. Paperbound. Import. $4.95

Science & Ecology

**6445789** THE RAVAGING TIDE: Strange Weather, Future Katrina’s, and the Coming Death of America’s Coastal Cities. By Mike Tidwell. Worldwide, thanks to climate change, sea levels are expected to rise up three feet within the coming decades, and extreme weather events will increase. More intense storms and rising ocean levels mean we are turning every coastal city in America into another New Orleans. 196 pages. Free Press. Paperbound. Pub. at $14.00 $2.95

**3653218** THE REAL COST OF FRACKING: How America’s Shale Gas Boom Is Threatening Our Families, Pests, and Food. By M. Bamberger & R. Tennesen. Pulls back the curtain on how this toxic process endangers the environment and harms people, pests, and livestock. The authors combine their expertise to show how constant的问题 at drilling sites translates into ill health and heartbreak for families and their animals. 230 pages. Beacon. Pub. at $26.95 $9.95

**1859983** THE MELTING WORLD: A Journey Across America’s Vanishing Glaciers. By Christopher White. As world temperatures soar, public outcry has focused on polar caps. Yet there is another impact—one that spells trouble for Americans: the extinction of alpine glaciers in the lower 48 states. Part art adventure story and part environmental saga, White’s sobering work reveals just how ubiquitous—and how immediate—our environmental crisis truly is. Photos. 272 pages. St. Martin’s. Pub. at $26.99 $4.95

5726085 JOURNEY TO THE CENTRE OF THE EARTH. By David Whitehouse. This enthralling journey vividly charts all we are able to understand about the mysteries of the deep Earth and encompasses the history of our planet and the latest findings about its inner core. 16 pages of photos, some color. 270 pages. Weidenfeld & Nicolson. Import. $6.95

**3612287** THE NEXT SPECIES: The Future of Evolution in a Time of Mass Extinction. By Michael Tennesen. In a fascinating look at the aftermath of the next mass extinction event, Tennesen delves into the history of our planet and how it is connected to our present environment, traveling the world to consider the potential winners and losers of the next era of evolution. 322 pages. S&S & Pub. at $26.00 $9.95

**2587203** EARTH-SHELTERED HOUSES: How to Build an Affordable Underground Home. By Rob Roy. An earth-sheltered, earth-roofed home has the least impact upon the land of all housing styles, leaving almost zero footprint on the planet and creating a dwelling in harmony with the environment. This guide brings earth-sheltered construction up to date, with plenty of practical help for those wanting to construct one. Photos. some color. 255 pages. New Society. Paperbound. Pub. at $27.95 $18.95

**460329X** THE DEVOURING DRAGON: How China’s Rise Threatens Our Natural World. By Craig Simons. Argues that China’s most important 21st-century legacy will be determined not by jobs, corporate profits, or political alliances, but by how quickly its growth degrades the global environment and whether it can stem the damage, 289 pages. St. Martin’s. Pub. SOLD OUT

5703921 CHASING THE SUN: The Epic Story of the Star That Gives Us Life. By Richard Cohens. A packed book with fascinating facts, extraordinary myths, and surprising anecotes this splendidly illustrated volume is informative and entertaining. Cohens explains the star that so inspires us, but shows how multifaceted our relationship with the Sun has been—and continues to be. Illus., many in color. 574 pages. Random. Pub. at $35.00. $9.95

5363818 THE SCIENCE OF INTERSTELLAR TRAVEL. By Kip Thorne. Christopher Nolan’s epic is steeped in real science, thanks in part to physicist Kip Thorne’s involvement from the film’s very beginnings. From black holes, wormholes and warped space to singularities and quantum gravity, Thorne offers us an exclusive look at the principles governing interstellar travel and dazzling effects in this volume. Illus. in color. 324 pages. Norton. Paperback. Pub. at $24.95. $6.95

2715627 WHERE NO MAN HAS GONE BEFORE: A History of NASA’s Apollo Lunar Expeditions. By William David Hannaway. This publication of the official 1989 release chronicles the behind the scenes conflicts and cooperation during NASA’s Apollo expeditions. It shows how the space agency’s goals, which were primarily interested in the moon itself, worked out its differences with the engineers, charged with achieving a safe landing and return, to ensure the success of the Apollo program. Illus. 413 pages. Dover. Paperback. Pub. at $24.95. $5.95

4787116 DARK MATTERS: The Unseen Reality. By David Bohm. The theory of dark matter and dark energy is at the heart of modern cosmology. This book explains these theoretical concepts in an accessible way, making it accessible to a general audience.

5703935 ANTI-GRAVITY & THE WORLD GRID. By David Hatcher Childress. First published in 1987 and updated here, this book covers the geography, mathematics, and light harmonics of the Earth Grid, the purpose of the Ley Lines and ancient megalithic power points, the secrets of the Philadelphia Experiment. time travel; how UFOs use the grid; and much more. Illus. 267 pages. Adventures Unlimited. Paperback. Pub. at $14.95. $11.95

4381277 SATURN: A New View. By Laura Lowell et al. Saturn has gripped the collective imagination of humankind from the day of its discovery, but its extreme remoteness has made it difficult to view from Earth. With the space probe Cassini-Huygens and the Hubble Space Telescope, Saturn has become a favorite target for astronomers.

2765410 DISPLAYS: The Next Generation of Scientific Visualization. By David P.D. Attwood. In the world of scientific visualization, the next generation is already upon us. This book explores the latest developments in this rapidly evolving field.

5748907 EASTERN ASTROLOGERS, VOLS. 1-4: The Autobiography of the Instruments of the Adler Planetarium & Astronomy Museum. By David Pingeon. The most sophisticated astronomical instrument of the pre-telescopic era, the astrolabe combined a simple wooden disk with an elegant analogue computer. That unique and surprisingly beautiful instrument is the subject of this volume, highlighting a number of notable examples and placing them in the context of the emerging scientific world at large. The book illuminates both these watershed moments and the breathtaking cosmos themselves. 160 pages. Deutsch. 9/11/11. Import. Pub. at $22.95. $8.95

5403665 THE PHYSICS OF THE BUZZFEED. By Jennifer Guettler. These short articles from the popular Buzzfeed website explore the physics behind everyday phenomena, from the physics of surfing to the physics of love and more.

5700357 THE VELIKOVSKY HYPOTESIS: Worlds in Conflict and Ancient Catastrophes. By Dr. Immanuel Velikovsky. In 1950 Immanuel Velikovsky introduced the theory that Venus began as a comet ejected by Jupiter around 1600 BC, wreaking chaos on Mars and Earth before being caught in the solar system. Exploring the key points of Velikovsky’s theories, the author presents evidence from recent space probe missions to show that Venus still exhibits comet-like properties. 192 pages. Bear & Company. Paperback. Pub. at $15.00. $11.95

6505260 APOLLO: The Epic Journey to the Moon, 1963-1972. By David West Reynolds. Offers an account of the historic program that landed a man on the moon. Featuring a wealth of photographs, artwork, and interviews from the era, this volume along the journey to life, covering every key event and personality to create a picture of how we got to the moon and what happened along the way. 272 pages. Zenith. Pub. at $40.00. $16.95

576050X MARS 3-D: A Rover’s-Eye View of the Red Planet. By Jim Bell. While no human has yet landed on Mars, Spirit and Opportunity have been traversing its surface since 2004. In this unique book, you’ll see the terrain through 80 stunning 3-D photos taken by the rovers and read compelling commentary that guides you on the journey. Various arms of the planet are covered. Fully illus. in color. 148 pages. Sterling. Pub. at $19.95. $6.95

5779027 THE INTERSTELLAR AGE: The Story of the NASA Men and Women Who Flew the Forty-Year Voyager Mission. By Jim Bell. This book chronicles the story of the Voyager Mission, a mission that has been successful in many ways, as well as explaining the complex mission planning, how the spacecraft were operated once they had left Earth, and the discoveries made during their missions to explore the Solar System. Well illus., some color. 196 pages. Haynes. 8/10/10. Import. Pub. at $36.95. $24.95

5833465 A SINGLE SKY: How an Exotic Universe Community Forged the Science of Radio Astronomy. By David P. Minn. Telling the interconnected stories of Australian, British, Dutch, and American radio astronomers, Minn shows how the radio telescope emerged from a new scientific community uniting the powers of radio with the international aspirations of astronomy. 247 pages. Pr. at $35.00. $9.95

575506X ANCIENT ALIENS ON MARS. By Mike Bara. Examines the possibility of alien intervention on Mars. Chapters include Mars as the site of an alien continent, the True Colors of Mars, The Message of Cydonia, The Politics of Mars, The Pathfinder, Mars Global Surveyor; and Face it, It’s a Face. Illus., color. 218 pages. Adventures Unlimited Pr. Paperback. Pub. at $15.99. $11.95

4626745 DISCOVERING THE UNIVERSE: The Story of Astronomy. By Paul Murdin. From the ancient theory of an Earth-centered universe to the new quantum theory of dark matter and dark energy, astronomy has come a long way. This book traces the major developments in astronomy and highlights the key figures who have contributed to our understanding of the universe.

573055X THE MOBIUS STRIP: Dr. Manly Hall’s Quest for the Multiverse. By Tim Powers. Dr. Manly guides you on a tour of the many multiverse concepts and theories that have been proposed over the years, from the many worlds interpretation to the concept of parallel universes.

576855X ANTI-MATTER: The Search for the Missing 5% of the Universe. By August Hambro. A fascinating exploration of the mystery of dark matter and its role in the formation of the universe.

5772799 MARS 3-D, REVISED EDITION: A Rover’s-Eye View of the Red Planet. By Jim Bell. While no human has yet landed on Mars, Spirit and Opportunity have been traversing its surface since 2004. In this unique book, you’ll see the terrain through 80 stunning 3-D photos taken by the rovers and read compelling commentary that guides you on the journey. Various arms of the planet are covered. Fully illus. in color. 164 pages. Sterling. Pub. at $19.95. $5.95

368555X STORIES IN THE STARS: An Atlas of Constellations. By Susanna Hissop. Loping between centuries, cultures, and traditions, this book follows each of the night sky’s 88 constellations through gorgeous illustrations and vivid descriptions covering mythology, history, and other fascinating contexts. Illus. 210 pages. Pr. at $30.00. $19.95

5842343 DARK MATTER AND THE DINOSAURS: The Astonishing Interconnectedness of the Universe. By Lisa Randall. Sixty-six million years ago, an object crashed into Earth, killing off the dinosaurs. In this groundbreaking look at the interrelatedness of our universe, Randall overturns many of the accepted scientific notions and makes a startling suggestion: a disk of dark matter may have triggered that cataclysm. 412 pages. Ecco. Paperback. Pub. at $16.95. $12.95

5857685 THE STARS: The Definitive Visual Guide to the Cosmos. By Robert Dinwiddie et al. From glittering star-birth nebulae to supersonic black holes and colliding galaxies, this is an awe-inspiring journey through the cosmos. Illus. 3-D glasses are included in the book to provide the most spectacular and fascinating objects in the Universe. Packed with breathtaking new images and constellation charts. 256 pages. Dorling Kindersley. 10/12. Pub. at $30.00. $21.95

**568114X BEGINNING CHEMISTRY, SECOND EDITION: Schaum's Easy Outlines.** By David Craig. This super-condensed guide is built for quick, effective study that will make mastering this subject fast, fun, and painless. Includes comprehensive formula calculations, chemical bonding, stoichiometry, rates and equilibrium, chemical equations, and more. 138 pages. McGraw-Hill. Paperback. Pub. at $11.00 $4.95

**269598X CHEMISTRY FOR THE UTTERLY CONFUSED, By J.T. Moore & R.H. Langley.** This guide leads you through the most widely used concepts, from thermodynamics, acids and bases, and chemical bonding to periodic trends and molecular forces. Includes practice problems with solutions to explain fundamental principles. 335 pages. McGraw-Hill. Paperback. Pub. at $19.00 $5.95

**4585487 THE HANDY CHEMISTRY ANSWER BOOK.** By J.C. Stewart & J.P. Lomont. In an engaging, easy to follow Q&A format, chemical concepts are tackled and explained in plain English. Covers the basics of chemistry (history, atomic structures, chemical bonds and reactions, etc.) to more advanced material (nuclear chemistry, biochemistry, physical and theoretical chemistry). Well illustrated. 388 pages. Viking. Pub. at $21.95 $7.95

**462314 THE BEAUTIFUL INVISIBLE: Creativity, Imagination, and Theoretical Physics.** By Giovanni Vignale. In this remarkable work, Vignale takes us through the austere and elegant abstract landscapes of theoretical physics, full of entities such as particles, light rays, spinning electrons, and fields of force, entities that have no real existence, but are images of the mind. 303 pages. Oxford. Pub. at $34.95 $7.95

**3634159 THE COMPLETE IDIOT'S GUIDE TO PHYSICS, SECOND EDITION.** By Dennis Gabor. This introduction to high school and first-year college level physics includes down to earth explanations of complex concepts, and makes understanding the many dimensions of physics easy, with no calculus required. Includes dozens of practice problems and their solutions. Illus. 392 pages. Alpha. Paperback. Pub. at $18.95 $6.95

**3619963 TREPASSING ON EINSTEIN'S LAWN: A Father, a Daughter, the Meaning of Nothing, and the Beginning of Everything.** By Amanda Gefter. Takes you on a life-altering quest with Gefter, a science writer, and her father Warren as they search for the answers to the universe’s greatest mysteries. What they discover is unexpected, exhilarating, and even a little frightening. In cosmology, from a single universe we all share to a splintered existence, but are images of the mind. Illus. 418 pages. Bantam. Pub. at $28.00 $4.95

**1066411 EXERCISES FOR THE FLEMANN LECTURES ON PHYSICS: The New Millennium Edition.** By Richard Feynman et al. Combined into one volume for the first time, this volume provides comprehensive, hands-on practice in all the most important areas of physics. With these exercises, students will have a chance to apply what they have learned and expand their understanding. Basic. 8x11. Paperback. Pub. at $24.99 $16.95

**4644840 HOW THE HIPPIES SAVED PHYSICS: Science, Counterculture, and the Quantum Revival.** By David Kaiser. Introduces the reader to a band of freethinking physicists who defied the imperative to “shut up and calculate” and helped reshape modern physics. Kaiser reveals that the importance of quantum information theory has a psychedelic background, led by a group of young physicists from Berkeley. Photos. 372 pages. Norton. Pub. at $26.95 $8.95

**6078651 INORGANIC CHEMISTRY FOR DUMMIES.** By John Wiley & Sons. Orbaek. Whether you’re currently enrolled in a class on the subject or you have a background in chemistry and want to extend your knowledge, this guide is an approachable, hands-on way to come to grips with some of inorganic chemistry’s most difficult concepts. 360 pages. Wiley. Paperback. Pub. at $19.99 $6.95

**5830192 INTRODUCTION TO THE PHYSICS OF GYROTRONS, By Gregory S. Husnivich.** As unique sources of coherent high-power, microwave, and millimeter-wave radiation, gyrotrons are an essential part of the hunt for controlled fusion. This text, designed to introduce non-specialists to the area, explains fundamental physical principles. 335 pages. Johns Hopkins. Pub. at $79.00 $9.95

**6381552 SYNTHETIC FUELS.** By R.F. Prosteben & R.E. Hicks. Designed to train engineers in the production of synthetic fuels to replace dwindling supplies of natural ones. Includes a review of chemical and physical fundamentals and conversion fundamentals, liquids and solids produced from coal, biomass conversion, liquids obtained from oil shale, and more. Illus. 490 pages. Dover. Paperback. Pub. at $10.95 $4.95

**5835979 THE FLYMANN LECTURES ON PHYSICS: The New Millennium Edition.** By Richard P. Feynman et al. Ranging from basic Newtonian dynamics through some formidable theories as Einstein’s general relativity, Maxwell's electrodynamics, and Dirac’s formulation of quantum mechanics, these lectures stand as a monument to clear exposition and deep insight. This new edition features improved typography, figures, and indexes. 1,552 pages in three volumes, slipcased. Illus. Basic. 8x10¼. Paperback. Pub. at $195.00 $124.95

**733900 INDUSTRIAL CHEMICAL PROCESS DESIGN, SECOND EDITION.** By Richard P. Feynman et al. Featuring over 200 illustrations, this practical, comprehensive resource presents complex chemical operations and formulas in an easy to understand manner. Includes stepwise procedures that incorporate helpful software tools into your daily practice. 414 pages. McGraw-Hill. Paperback. Pub. at $125.00 $29.95

**3641057 THE UNIVERSE IN YOUR HAND: A Journey Through Space, Time, and Everything Else.** By Clifford A. Pickover. Traces 250 of the most illuminating achievements in physics, the "fundamental science" that explores our very fabric of reality. In addition to odd and perplexing marvels, like the 1965 ultra-bouncy Super Ball, milestones touch on engineering and applied physics, concepts of astronomical objects, and even a few subjects that are quite philosophical. Color photos. 526 pages. Sterling. Pub. at $29.95 $19.95

**577321 ORGANIC CHEMISTRY, SECOND EDITION: Schaum's Easy Outlines.** By Herbert Meislich et al. Master these concepts almost instantly: Structures and Properties; Reactivity and Mechanism; Functional Groups; Stereochemistry; Amines, Aldehydes; and more. Illus. 138 pages. McGraw-Hill. Paperback. Pub. at $12.00 $6.95

**3858622 THE PHYSICS BOOK: From the Big Bang to Quantum Mechanics in the History of Physics.** By Clifford A. Pickover. Traces 250 of the most illuminating achievements in physics, the "fundamental science" that explores our very fabric of reality. In addition to odd and perplexing marvels, like the 1965 ultra-bouncy Super Ball, milestones touch on engineering and applied physics, concepts of astronomical objects, and even a few subjects that are quite philosophical. Color photos. 386 pages. Flatiron Books. Pub. at $27.99 $21.95

5782718 MATH IN EVERYTHING. By Srinivasa R. Vajda. Through this classic of mathematical programming and operational research appeared nearly 50 years ago, it remains as relevant today as when it was published. The first rigorous treatment of a wide range of programming topics, this text features numerous worked-out examples and problems. Illus. 310 pages. Dover. Paperbound. Pub. at $14.95

5782791 POINT SET TOPOLOGY. By Steven A. Gaal. An understanding of topology is fundamental to the grasp of a large part of mathematics. This wide-ranging treatment opens with basic concepts of set theory and topological spaces; it concludes with the rudiments of functional analysis. 317 pages. Dover. Paperbound. Pub. at $13.95

5782708 MATH CONVERSATIONS. By E.B. Dynkin & V.A. Uspenski. Combining three books into a single volume, this text comprises Multicolor Problems, Problems in the Theory of Numbers and Colored Strings. The authors introduce and explain a wide range of mathematical analysis and geometry. This wide-ranging treatment opens with basic concepts of set theory and topological spaces; it concludes with the rudiments of functional analysis. 317 pages. Dover. Paperbound. Pub. at $13.95

5782597 FUNCTIONAL ANALYSIS AND LINEAR CONTROL THEORY. By J.R. Leigh. Discusses the functional-analytic framework for linear control theory. This self-contained text, geared toward engineering students, demonstrates the subject’s unity by treating a wide range of topics in theorems that illustrate inner product spaces, instability, controllability, and observability. It also discusses minimum norm and time control as well as distributed parameter systems. 836 pages. McGraw-Hill. Paperbound. Pub. at $19.95

5782572 MINUS MATH: How to Make Math Fun and Beneficial to Your Everyday Life. By Lawrence Piter. Forget your childhood nightmares and discover how numbers can enhance and illuminate your world. How can mathematics help you bet on horses or win in Vegas? What’s the Foolproof way to solve Sudoku? Here, Potter takes the fear out of everyday math to permeate 273 pages. Pegasus. Paperbound. Pub. at $15.95

5782594 FINITE-DIMENSIONAL LINEAR ALGEBRA. By E.B. Dynkin & V.A. Lichnerowicz. This classic introductory text starts with vector spaces, affine Euclidean point spaces, tensor algebra, curvilinear coordinates in Euclidean space, and Riemannian spaces. Part two covers multivectors and tensors; part three covers applications and details the use of tensors in special relativity theory. 164 pages. Dover. Paperbound. Pub. at $14.95

5782556 MATH GOES TO THE MOVIES. By B. Polster & M. Ross. Offers an entertaining survey of the quirky, fun, and surprising ways mathematics appears in our daily lives. This unique, quirky, and entertaining book reveals the fun and fascinating world of numbers. 240 pages. Viking. Pub. at $17.95

5782548 NUMERICAL SOLUTION OF NONLINEAR BOUNDARY VALUE PROBLEMS WITH APPLICATIONS. By M. Kubicek & V. Hlavacek. A survey of the development, analysis, and application of numerical techniques in solving nonlinear boundary value problems, this text presents original algorithms and results from the authors’ hardware and software for solving boundary value problems. Illus. 274 pages. Pegasus. Paperbound. Pub. at $19.95

5782497 THE HUMONGOUS BOOK OF BASIC MATH & PRE-ALGEBRA PROBLEMS. By W. Michael Kelley. With over 1,900 detailed problems with step by step solutions, clear examples, concise explanations, and worked problems complete solution makes it easy to understand the material. Includes end-of-chapter quizzes and a final exam. 480 pages. McGraw-Hill. Paperbound. Pub. at $20.00

5782489 ELEMENTS OF TENSOR CALCULUS. By Andre Lichnerowicz. This classic introductory text starts with vector spaces, affine Euclidean point spaces, tensor algebra, curvilinear coordinates in Euclidean space, and Riemannian spaces. Part two covers multivectors and tensors; part three covers applications and details the use of tensors in special relativity theory. 164 pages. Dover. Paperbound. Pub. at $14.95
