3721213 FRACKPOLY: The Battle for the Future of Energy and the Environment. By Wennergren Olofsson. During the heat of the fracking industry boom, the technologies that make it possible, and the destruction and poisoning of cleaner water sources and the release of harmful chemicals into the air, the author helps us to see the broad picture, from creating what the author calls “sacrifice zones” across the American landscape. Illus. 364 pages. New Press. Pub. at $27.95. $6.95

200185X THE SENSE OF WONDER. By Rachel Carson, photos by N. Kelsh. In 1962, Rachel Carson, the award-winning journalist, began work on a essay that she would come to consider one of her life’s most important projects, introducing a child to the beauty and marvels of nature. This edition features beautiful serene color photographs. 109 pages. HarperCollins. Pub. at $18.99. $5.95

3175758 A LANDOWNER’S GUIDE TO MANAGING YOUR WOODS. By Ann Larkin Hansen et al. Whether you own a few acres of woodland or many, this guide will help you bend nature to your will, creating an active and effective steward of your forest. Beginning with an explanation of the natural processes governing forest development, the authors present active steps you can take to manage your forest, with helpful graphs and charts. 298 pages. Storey. Pub. at $19.95. $14.95

3704602 HOW TO GIVE UP PLASTIC: A Guide to Changing the World, One Plastic Bottle at a Time. By Will McCallum. A book that will help save the planet. By taking small steps to eliminate plastic waste from your life. It also contains a wealth of facts, stories, and tactics to help everyone become an activist to get plastic out of their community. This resource will help you take the first steps to save our planet. 208 pages. Penguin. Pub. at $15.00. +$11.95

4626303 OUR DAILY POISON: From Pesticides to Packaging, How Chemicals Have Changed the Way We Make Us Sick. By Marie-Monique Robin. The award-winning journalist takes us across North America, Europe, and Asia as she illuminates a shadow world of toxic chemicals we encounter in our everyday lives—from the pesticides that blanket our crops to the additives and plastics that contaminate our food—and their appalling effects over time. 470 pages. New Press. Pub. at $19.95. +$14.95

3740153 UNSTOPPABLE: Harnessing Science to Change the World. By Bill Nye. In this book, Bill Nye applies his message of technological optimism to one of the most serious challenges facing our species: climate change. Nye reiterates the crisis as a tremendous opportunity for our society to recommit to the work of fixing the world. 341 pages. St. Martin’s. Pub. at $26.99. +$5.95

2908786 EAGER: The Surprising, Secret Life of Beavers and Why They Matter. By Ben Goldfarb. This is a powerful story about one of the world’s most influential species, the beaver. Goldfarb weaves a narrative of how our landscapes have changed over the centuries, and how beavers can help us fight drought, flooding, wildfire, extinction, and the rising tides, among other challenges. Color plates. 286 pages. Chelsea Green. Pub. at $17.95. +$14.95

2981190 DARWIN’S FIRST THEORY: Exploring Darwin’s Quest to Find a Theory of the Earth. By Rob Wesson. Darwin traveled in South America on board the HMS Beagle as a geologist on a voyage to examine the geology of South America. His journey included stops to study fossils in Uruguay and Argentina, and explores sites of long vanished glaciers in Scotland and Wales. As he follows Darwin’s path, he experiences the land as Darwin did and tackles the same questions Darwin had about our ever-changing Earth. 32 pages. Illus. 472 pages. New Press. Pub. at $18.95. +$5.95

6804640 WATER: The Key to New Energy. By Moray B. King. The author explains how gas emitted from popular water electrolysis projects manifests unusual energetic anomalies, and offers a possible explanation that uses a welding torch, and running internal combustion engines on small quantities of gas. Illus. 275 pages. Adventures Unlimited. Pub. at $16.95. +$13.95

2587203 EARTH-SHELTERED HOMES: How to Build an Affordable Underground Home. By Rob Roy. An affordable, earth-sheltered, earth-roofed home has the least impact on the land of all housing styles, leaving almost zero footprint on the planet and creating a dwelling in harmony with the environment. This guide brings earth-sheltered construction up to date, with plenty of practical help for those who wish to construct one. Photos, some color. 255 pages. New Society. Pub. at $27.95. +$18.95

3746461 THIS IS THE WORLDS END: How Droughts and Die-Offs, Heat Waves and Hurricanes Are Converging on America’s West Coast. By Richard Wesson. Examines the substantial impacts to Earth’s systems unfolding across each continent. The bad news? Within two decades or so, our carbon budget will reach a point of no return. But there is good news, and Nesbit provides a clear, believable road map of real-world workable solutions we can take together. 316 pages. Picador. Pub. at $18.00. +$12.95

3734800 END TIMES: A Brief Guide to the End of the World. By Bryan Walsh. This compelling work peels back the layers of complexity around the unthinkable and inevitable, the end of human kind. From asteroids and artificial intelligence to volcanic super eruptions to nuclear war, the answers to the most cataclysmic threats to the human race. 406 pages. Hachette. Pub. at $29.00. +$21.95

2955598 THE UNINHABITABLE EARTH: Life After Warming. By David Wallace-Wells. Brings into stark relief the climate troubles that await us. By the end of the century, the world will resemble a place where life is possible but is changing. 120 pages. Crown. Pub. at $18.00. +$14.95

5962579 MYCORRHIZAL PLANET: How Symbiotic Fungi Work with Roots to Support Plant Health and Soil Fertility. By Michael Phillips. Offers new insights into the invisible world beneath our feet, explaining the crucial, symbiotic role that fungi play in everything from forest growth to climate change. Includes an informative section on the human relationship with the mycorrhizal fungi, providing information for anyone concerned with maintaining and restoring the health of our soils, our climate, and the quality of life on Earth for generations to come. Illus. in color. 134 pages. Brighton. Pub. at $40.00. +$29.95

DUO 2829667 EARTH: Population Overload. The human population is growing at an alarming rate that cannot be sustained by current systems. One thing is certain—we must take action now, or the prognosis is bleak. If we don’t find a way to create power and harness alternative forms of energy, the outcomes could be catastrophic and could lead to the end of human kind. For generations to come. Illus. in color. 244 pages. Picador. Pub. at $19.95. +$19.95

5972254 END TIMES: A Brief Guide to the End of the World. By Bryan Walsh. This compelling work peels back the layers of complexity around the unthinkable and inevitable, the end of human kind. From asteroids and artificial intelligence to volcanic super eruptions to nuclear war, the answers to the most cataclysmic threats to the human race. 406 pages. Hachette. Pub. at $29.00. +$21.95

5972254 END TIMES: A Brief Guide to the End of the World. By Bryan Walsh. This compelling work peels back the layers of complexity around the unthinkable and inevitable, the end of human kind. From asteroids and artificial intelligence to volcanic super eruptions to nuclear war, the answers to the most cataclysmic threats to the human race. 406 pages. Hachette. Pub. at $29.00. +$21.95

6834493 CONVERGENCE: The Idea at the Heart of Science. By Peter Watson. Decade after decade, the story captures every crucial scientific advance in order to ush er in the present, proceeding like a cosmic detective story, or the world’s most massive code-breaking effort. A brilliant history of science over the past 150 years that offers a powerful argument—that the many disparate scientific branches are converging on the same truths. 543 pages. S&S. Pub. at $35.00. +$7.95

3712923 EINSTEIN’S UNFINISHED SYMPHONY: The Story of a Gamble, Two Black Holes, and a New Age of Astronomy. By Marcia Bartusiak. The story of Albert Einstein’s predicted gravitational waves—and now celebrates their recent discovery. Charting the quest to build the Laser Interferometer Gravitational-Wave Observatory (LIGO), Bartusiak reveals the brilliance, personalities, and luck that helped spark a groundbreaking discovery. 162 pages. Yale. Pub. at $18.00. +$5.95

3722554 THE TELESCOPE IN THE ICE: Inventing a New Astronomy at the South Pole. By Mark bew. The unfolding story of the IceCube telescope: the most impressive technological tour de force that detected the first extraterrestrial high-energy neutrinos and thus gave birth to a new field of high-energy astrophysics. Told by the visionary scientists who built the instrument in some of the most extreme conditions on the planet, 16 pages of photos. 242 pages. St. Martin’s. Pub. at $27.99. +$4.95
Astronomy, Space Travel & Cosmology

2837803 OTHERWORLDS: Visions of Our Solar System. By Michael Benson. A visual odyssey exploring beauty from planet Earth to the other planets of our star system. A visual legacy of six decades of robotic spacelike, constituting the greatest collection in the history of photography. A record of our planetary explorations to date and a tribute to the stunning beauty of our solar system. Well illus. in color. 168 pages. Abrams. 10x10%. Pub. at $29.95 $14.95

2659597 VIEW FROM AN ALIEN PHOTOGRAPHER: The Earth, by Jerry Viets. A collection of fascinating and beautiful images, together with stories of what life was like in orbit on the International Space Station. Presented in this encompassing volume. 304 pages. National Geographic. 9x11%. Pub at $40.00 $14.95

2894712 UNIVERSE: Owners’ Workshop Manual. By David M. Harland. This lavishly illustrated manual takes a lively look at our scientific study of the universe. The story begins in the 17th century, with the discovery by Isaac Newton of the law of gravity, and then leads us through recent years, where we have discovered that our system is not typical. Well illus. in color. 188 pages. Haynes. 8¼x10¼%. Pub. at $29.95 $11.95

5567863 SMITHSONIAN UNIVERSE: REVISED: The Definitive Visual Guide. By Robert Dinwiddie et al. A new edition of the definitive visual guide to space. Unveiled in its breadth, it portrays the most significant events in our solar system over the last 50 years, from the Big Bang to planets in our Solar System and beyond. Detailed profiles, up-to-date maps, and the newest images from space probes and telescopes give the up-to-date story of the Universe. Accessible and authoritative, this reference includes the newest equipment for amateur observers and the most exciting recent discoveries in astronomy. 526 pages. Dorling Kindersley. 9x11¼%. Pub at $55.00 $34.95

2714918 THE STARS: The Definitive Visual Guide to the Cosmos. By Robert Dinwiddie et al. From glittering star-birth nebulas to supernova black holes and colliding galaxies, this awe-inspiring and completely up-to-date guide to the most spectacular and fascinating objects in the Universe is packed with breathtaking images charted on 3-D illustrations. 240 pages. Dorling Kindersley. 9x11¼%. Pub at $35.00 $29.95

3693321 EIGHT YEARS TO THE MOON, 50th ANNIVERSARY COMMEMORATIVE EDITION: The History of the Apollo Missions. By Nancy Atkinson. This beautifully illustrated account is a keepsake celebrating some of the most important and dramatic events in modern history. Told through over 60 personal interviews with astronauts, over 100 spectacular and fascinating photos, this tribute to the men and women who made the Apollo 11 mission a reality chronicles the highs and lows that accompanied the race to the moon. 240 pages. Page Street. 8¼x10¼%. Pub at $34.95 $9.95

3766007 LEGENDS FROM SPACE: The Biggest Myths About Space Demystified. By Bob King. Cuts through the fog of myth to bring the truth behind the many myths about space travel. By examining the shaky claims behind many misconceptions and taking us step by step through the concrete evidence that contradicts them, King debunks each myth and exposes the truth. Well illus. 224 pages. Page Street. Paperbound. Pub at $16.99 $12.95

2966857 APOLLO: The Mission to Land a Man on the Moon. By Al Cimo. President Kennedy promised in 1961 that America was going to put a man on the moon within ten years. This volume traces the lives and works of the inspirational rocket engineers whose imaginations fueled the Apollo missions. Ultimately it was these scientists along with the astronauts who succeeded in delivering JFK’s impossible dream. Fully illus. in color. 192 pages. Chartwell. 9x11¼%. Pub at $24.95 $17.95

2816814 SPACE ATLAS, SECOND EDITION: Mapping the Universe and Beyond. By James Trefil. This stunningly illustrated volume captures it all—spacecraft probe every dimension of our solar system and beyond, bringing the most remote phenomena from the beginning of time, and our vision of the universe changes. This new edition includes a foreword by Buzz Aldrin, reflecting on 50 years of space exploration, and knowledge about the planets and the moon he walked on. 352 pages. National Geographic. 9x12¼%. Pub at $50.00 $37.95

3754987 STAR STORIES: Constellations and People. By Anthony Aveni. Perfect reading for all sky-watchers and story-tellers, this is an essential complement to Western mythologies, showing how the confluence of the natural world and culture of heavenly observers can produce a variety of tales about the shapes in the sky. Illus. 194 pages. Yale. Pub at $26.00 $19.95

3713908 IN THE SHADOW OF THE MOON: The Apollo Missions-and the Men Who Made Them. By Anthony Aveni. Explains the history and culture surrounding solar eclipses from prehistoric Stone Age to modern space travel. Reveives how the calendar of solar eclipses, from a spectacle that left New Yorkers in the moon’s shadow, to future eclipses. Aveni’s account of astronomy’s most storied phenomenon will enthral and captivate the sky. Well illus. 312 pages. Yale. Pub at $28.00 $9.95

6992994 THE PRE-ASTRONAUTS: Manned Ballooning on the Threshold of Space. By Craig Ryan. In the 1950s and early 1960s, a small fraternity of daring, brilliant men made the first exploratory trips into the upper stratosphere, reaching the edge of outer space in time capsules suspended beneath plastic balloons. This study tells the story of these brave and tenacious men. Photos. 327 pages. Naval Institute. Paperbound. Pub at $18.95 $12.95

2793350 SPACECRAFT: 100 Iconic Rockets, Shuttles, and Mirrors. By Charles Fishman. The sweeping behind the scenes account of the furious race to complete one of mankind’s greatest achievements. This is the story of men and women charged with changing the world as we knew it, their leaders, their triumphs, their heartbreaks, and the near-disasters that almost cost them their lives. Profusely illustrated, and authoritatively written collection of profiles depicting and describing every significant spacecraft of this era. 240 pages. Page Street. Paperbound. Pub at $30.00 $21.95

2952695 SPACE TRAVEL: The People, the Politics, and the Promise. Charles Fishman. The people who dared to dream of exploring the stars. Narrates the age-old quest to explore the beyond. 16 pages of photos. 464 pages. S&S. Paperbound. Pub at $29.99 $14.95

2738957 LAUNCH PHOTOGRAPHY. By Ben Cooper. Takes you inside NASA’s vehicle assembly building and other facilities, to rollout and tower rollbacks, and to the launch pads of America’s other rockets with never before seen photos of U.S. space travel. 224 pages. Amherst Media. Paperbound. Pub at $34.95 $26.95

6827699 THE FUTURE OF HUMANITY: Terraforming Mars, Interstellar Travel, Immortality, and Our Destiny Beyond Earth. By Michio Kaku. The world-renowned physicist and futurist Dr. Michio Kaku explores in rich detail a compelling vision of how humanity may develop a sustainable civilization in outer space. Discussing advancements in robotics, nanotechnology, and biotechnology that may allow us to terraform and build habitable cities on Mars and beyond. 339 pages. Doubleday. Pub at $32.00 $23.95

2943433 THE FUTURE OF HUMANITY: Our Destiny in the Universe. By Michio Kaku. Dr. Michio Kaku presents a compelling vision of how humanity may develop a sustainable civilization in outer space. He then investigates some of the hottest topics in science today, including warp drive, wormholes, hyperspace, and the multiverse. Illus. 339 pages. Anchor. Paperbound. Pub at $34.95 $11.95

3702979 THE MOON: NASA Images from Space. By Beth Alesse. Explore the Moon’s history, phases, geography, surface characteristics, and more with this stunning visual guide to mankind’s most historically significant images of the Moon, with illuminating text accompanying each photo. 127 pages. Amherst Media. Paperbound. Pub at $34.95 $26.95

Astronomy, Space Travel & Cosmology

1. **3708144 FIRE IN THE SKY: Cosmic Collisions, Killer Asteroids, and the Race to Save Earth by Brian Cox & J. F. Shwayder.** A scientific adventure story that takes us from scenes of ancient asteroid impacts, like the one that wiped out the dinosaurs, to modern observatories where professional asteroid hunters seek their prey, to sightings of asteroids that sometimes explode in our atmosphere with the force of large nuclear bombs. Color illus. 277 pages. Scribner. Pub. at $27.00 $19.95

2. **2954352 MOON: An Illustrated History.** By David Williams. Chronicles the development and exploration of the Moon, and takes the reader on a thought-provoking journey from the hypotheses of the Moon’s formation to predictions for building a lunar infrastructure. Fully illus., most in color. 212 pages. Schiffer. Pub. at $24.95 $13.95

3. **2895617 IN SEARCH OF STARDUST: Amazing Micrometeorites and Their Terrifying Impactors.** By Jon Larsen. Explore and examine micrometeorites in this photo documentary comprising more than 200 plates. Larsen explains micrometeorite formation, classification, and analysis, including how to distinguish micrometeorites from all kinds of other space particles, volcanic ash, construction materials, and more. 152 pages. Voyageur. Pub. at $24.99

4. **2899886 SPACE 2.0: How Private Spaceflight, a Resurgent NASA, and International Cooperation Are Changing the Future of Space Age.** By Rod Pyle. We’re on the cusp of a new era in the great adventure of space exploration. This volume will give you a look at the next few decades of spaceflight and long-term human exploration, utilizing, and settlement. The author examines the new partnerships that are revolutionizing and changing the way we reach for the stars. Illus. in color. 317 pages. Prometheus. Pub. at $21.95

5. **3699633 MARS: The Missions That Have Transformed Our Understanding of the Red Planet.** By Rod Pyle. With exceptional access to NASA’s Jet Propulsion Laboratory’s archives, the author combines hand-drawn renderings of mission designs, plans, maps, and schematics with first-hand commentary from astronauts and engineers from NASA’s Jet Propulsion Laboratory. Ambitious plans for the future human exploration of Mars are also shown in exquisite detail. 192 pages. Carlton. 9x11. Paperbound. Pub. at $29.95 $21.95

6. **3711922 THE APOLLO Missions: In the Astronauts’ Own Words.** By Rod Pyle. Marking the fiftieth anniversary of the first moon landing this volume tells the personal story of the Apollo space program through first-person accounts by the astronauts themselves. Both their mission dialogue and retrospective reminiscences are included. This is an extraordinary record of one of mankind’s greatest achievements. Illus., most in color. 192 pages. Carlton. Pub. at $24.95 $17.95

7. **2919796 SHOOT FOR THE MOON: The Space Race and the Extraordinary Voyage of Apollo 11.** By Erich von Däniken. Contends that recent advancements in biotechnology, astrophysics, and artificial intelligence not only give a fresh perspective on his ancient astronaut theory but validate it. Using Apollo 11 as the same trajectory of our own interplanetary colonization as the author suggested Earth itself was colonized. 224 pages. New Page Books. Paperbound. Pub. at $19.95 $14.95

8. **6855386 PROJECT APOLLO: The Early Years, 1960-1967.** By Eugene Reichl. Covers the early years of the Apollo program (1960-1967), still the most significant space mission program in American history. This well-documented, fast-paced account of early Apollo history is a portrait of the men and women who made this giant leap possible. This is living history at its finest. 548 pages. Harper. Pub. at $35.00

9. **6855384 PROJECT MERCURY.** By Eugene Reichl. Discusses all Project Mercury missions including details on all craft and the astronauts involved. The volume also features superb color, archival images, cutaways and plans, 144 pages. Schiffer. Pub. at $19.95 $13.95

11. **6859449 SATURN V: America’s Rocket to the Moon.** By Eugene Reichl. Tells the gripping story of the creation of the Saturn V in concise, detailed text, and features numerous high-quality color images, technical drawings and specification charts. Includes a detailed look at the Saturn V’s design and construction and all 32 Apollo missions were colonized. 144 pages. Schiffer. $16.95

12. **2926784 THE SOVIET SPACE PROGRAM: The Lunar Mission Years, 1959-1976.** By Eugene Reichl. With the launch of Resolution, a probe to the Soviet Union’s historic landing on the moon and its splashdown in the Pacific Ocean. This volume tells the thrilling story of the race to the Moon, in color, most in color. 192 pages. Arcturus. 9¼x11¼. Pub. at $36.95 $19.95

13. **2939169 NASA OPERATIONS MANUAL: 1958 Onwards.** By David P. Atwood. With more than 300 photographs, line drawings and charts, this reference tour the United States, describing the centers of excellence and the facilities where rockets are tested, satellites are built, and humans prepare for space. 212 pages. Haynes. 8¼x10¾. Pub. at $36.95

14. **6831766 THE APOLLO MISSIONS: The Incredibly True Story of the Race to the Moon.** By David Baker. Revisit the experience and all the drama as it is unfolded, from the birth of the Apollo space program and the very dawn of spaceflight, to the American astronaut into space to Apollo 11’s successful Moon landing and its splashdown in the Pacific Ocean. This volume tells the people and the story behind the scenes details, this is the gripping behind the scenes details, this gripping onsite documentary comprising more than 300 photographs, line drawings and schematics with first-hand commentary from astronauts and engineers from NASA’s Jet Propulsion Laboratory. Ambitious plans for the future human exploration of Mars are also shown in exquisite detail. 192 pages. Carlton. 9x11. Paperbound. Pub. at $29.95 $21.95

15. **2926431 BACKYARD GUIDE TO THE NIGHT SKY, SECOND EDITION.** By Andrew Fazekas. This user friendly guide helps you see and understand the wonders of the night sky. Authoritative science and photography; clear and engaging text; and a compact size. This new edition features the latest information on stars, 400 pages. Priced. Pub. at $24.99

16. **2895665 ELECTRONIC HACKER: The Making of a Virtual Rogue. By Robert Kurson. In this thrilling insider account, the first to land on the Moon, the author combines hand-drawn renderings of mission designs, plans, maps, and schematics with first-hand commentary from astronauts and engineers from NASA’s Jet Propulsion Laboratory. Ambitious plans for the future human exploration of Mars are also shown in exquisite detail. 192 pages. Carlton. 9x11. Paperbound. Pub. at $29.95 $21.95

18. **2903318 EARTH RESURFACING.** By Bob Berman. From the sudden creation of dangerous new "stars" to the famously explosive birth of our moon, from the uncomfortable truth about ultra high energy cosmic rays bombarding us to the incredible ways in which our planet has harnessed the cataclysmic energy for its gain, Berman masterfully synthesizes some of our worst fears into an astonishing portrait of the universe. Illus. 308 pages. Little, Brown. Pub. at $30.00 $22.95

19. **2936224 AMERICAN MOONSHOT: John F. Kennedy and the Great Space Race.** By Douglas Brinkley. Just months after being elected, John F. Kennedy made an astounding announcement to the nation: we would put a man on the Moon. From the uncomfortable truth about ultra high energy cosmic rays bombarding us to the incredible ways in which our planet has harnessed the cataclysmic energy for its gain, Berman masterfully synthesizes some of our worst fears into an astonishing portrait of the universe. Illus. 308 pages. Little, Brown. Pub. at $30.00 $22.95

20. **2853787 CELESTIAL ATLAS: A Journey in the Sky Through Maps.** By Elena Percivaldi. This stunning volume, with beautiful illustrations of the most famous, rare, and impressive star atlases ever realized from the 16th century to today, will lead you on a journey among the constellations and will introduce you to the great progress made by the great astronomers of the past. 208 pages. White Star. 11x12¼. Pub. at $39.95 $24.95

See more titles at erhc.com/809
793907X THE ACCIDENTAL HOMO SAPIENS: Genetics, Behavior, and Free Will by D. J. Futrell and R. A. Joanen. This revelatory new work, the authors show that we are not constrained by our past to behave in specific ways. The human mind gives us unparalleled control over the kind of creature we are and will become. They help us better understand how humans came to be the flawed yet dynamic beings we are, and how this biological history can help us shape our future. Illus. 244 pages. InUP. Paperbound. Pub. at $27.95

ARCHAEOLOGY

3762337 THE PYRAMIDS, THE SPHINX: Tombs and Temples of Giza. By Peter Lacovara. This comprehensive study incorporates all the latest information on the excavations and interpretations of the Sphinx and the Pyramids, the only remaining survivors of the seven ancient wonders of the world. Illus., many in color. 976 pages. Bunker Hill. Pub. at $19.95. 4.95

298791 ROMAN VILLAS, FIFTH EDITION. By David E. Johnston. Many people visualize the life of luxury in the countryside of Roman Britain: mosaics and wall paintings; dining rooms and sumptuous baths. While true to a degree, this publication also reveals the vils as places where we live, many in color. 72 pages. Shire. Paperbound. Pub. at $18.00

2896868 THE OLDEST ENIGMA OF HUMANITY: The Key to the Mystery of the Paleolithic Cave Paintings. By B. David and J. J. Leffebvre. Fully illus. It is a scientific analysis of the meanings and interpretations of the cave paintings and the Pyramids, the only remaining survivors of the seven ancient wonders of the world. Illus., many in color. 138 pages. Arcade. Pub. at $21.95

6696643 PERSIA AND THE KHAMER. By John Boorman. In this study, Boorman seeks to trace the sources of the homogenous style of Persian court art and architecture in the sixth-century BC. He presents a new theory of the evolution of an artificial yet unified style, unmatched in the history of art and architecture of the Old World. Adults only. 295 illus. 25 pages. Thames & Hudson. 7 x10½. Paperbound. Pub. at $12.95

2951223 FROM ANTIQUARIAN TO ARCHAEOLOGIST: The History and Philosophy of Archaeology. By Tim Murray. A collection of essays tracing the emergence of the history of archaeology from a subject of marginal status in the 1980s, to the mainstream subject it which is today. 261 pages. Pen & Sword. Pub. at $33.95

6797088 TUTANKHAMUN'S TREASURES. By Zahi Hawass. With hundreds of full-color photos, this comprehensive guide provides a wealth of information that supplements the historical context of the Bible. The work follows each of the Bible and investigates the most significant discoveries that enhance our understanding of the biblical text. 408 pages. Zondervan. 7 x9½. Pub. at $42.99

6796931 THE ROYAL TOMBS OF ANCIENT EGYPT. By Aidan Dodson. Charts the history of the very ancient Egyptian civilization from the rule of Cheops to the very dawn of history down to and beyond the country's absorption into the Roman Empire, three millennia later. Covers the full extent of funerary, temple, and private structures of thousands of people, in their miles in area. English SDH. 50 minutes. National Geographic. DVD. Pub. at $27.95

2908840 FORBIDDEN TOMB OF GENGHIS KHAN. Illustrated with full-color photos and stratigraphic maps. The work follows each book of the Bible and investigates the most significant discoveries that enhance our understanding of the biblical text. 424 pages. Zondervan. 7 x9½. Pub. at $49.99

2785152 THE STONES CRY OUT: What Archaeology Reveals about the Truth of the Bible. By Randall Price. Discover what new archaeological findings have to tell us about Bible’s journey to the land. In this appraisal of the Ark of the Covenant, the kings and prophets of Israel, and much more with this guide. Price will give you a new appreciation for both the world and the Word of the Bible. Illus. 437 pages. Harvest House Publishers. Paperbound. Pub. at $29.95

2875533 THE EGYPTIAN ORIGINS OF KING DAVID AND THE TITLES OF SOLOMON. By Arison Osman. Proposing that David was a genuine historical figure, Osman explores how David’s identity may be radically different than what is described in religious texts. Drawing on recent archaeological, historical, and biblical evidence from known sites throughout the Bible, Osman reveals the first millennium as never before. By Randall Price with H.W. House. Illustrated with full-color photos and maps and stratigraphic maps. Includes country estates, commercial and governmental architecture: skyscrapers, interior design for ocean liners; and much more. 320 pages. Schiffer. 9x11¼. Pub. at $99.99

Medical Science

- **767287X THE BIG BOOK OF CELEBRITY AUTOPISTES.** Ed. by Kevin Viani. From J.F.K. to Marilyn, here are the morbid, medical, and mysterious facts behind the most famous celebrity deaths. These autopsy reports, often filled with medical terminology and diagrams of the bodies we know so well from the big screen, offer an in-depth look into the deaths of our favorite celebrities. 448 pages. Skyhorse. Paperback. Pub. at $14.95

- **2987783 NEUROIMMUNITY: A New Science That Will Revolutionize How We Keep Our Brains Healthy and Young.** By Michel Schwartz & A. London. The authors describe their research that revealed how the immune system can help to prevent the discovery of connections between immune system and brain, and explain the significance of the findings for future treatments of brain disorders and injuries. Illus. 283 pages. Yale. Pub. at $35.00

- **2845490 DNA, REVISED: The Story of the Double Helix.** By S. D. Watson et al. Charts the greatest scientific journey of our time, from the discovery of the double helix to today’s controversies to what the future may hold. This edition is updated with recent findings in genetic editing, epigenetics, and agricultural chemistry, as well as two new chapters on personal genomics and cancer research. Illus. in color. 487 pages. Knopf. Paperback. Pub. at $29.95

- **2957698 THE SECRET LIFE OF FAT: The Science Behind the Body’s Least Understood Organ and What It Means for You.** By Sylvia Tara. You may not love your fat, but your body certainly does. Bringing cutting-edge research together with historical perspectives, biochemist Sylvia Tara reveals fat’s true identity: an endocrine organ that, in the right amount, is critical to our health. 235 pages. Norton. Pub. at $26.95

- **297216X ADMISSIONS: Life as a Brain Surgeon.** By Jonathan M. White. After years on the surgical frontline in Boston and Nepal, Marsh reflects on what 40 years of handling the human brain has taught him. He focuses on the difficulties of working in troubled, impoverished countries, and the insights it has given him into the practice of medicine. 271 pages. Martin’s. Pub. at $26.99

- **6900741 THE SAWBONES BOOK: The Horrifying, Hilarious Road to Modern Medicine.** By Sydney & Justin McKeon. The book highlights insights from the history of medicine, answering questions such as: How can I rob graves the old fashioned way? Is opium, is there anything it can’t put out? How likely am I to spontaneously burst into flames? Does chocolate have medicinal properties? Plus other absurdities. Well illus., some in color. 246 pages. Harper. Pub. at $19.95

- **2987090 UNDER THE KNIFE: A History of Surgery in 28 Remarkable Operations.** By Arnold van de Laar. With stories spanning the dark centuries of bloodletting and amputations without anesthesia through today’s sterile, high-tech operating rooms, this fascinating book is both a rich history of the human body, and a modern anatomy class for us all. 357 pages. St. Martin’s. Pub. at $29.99

- **59560X DISEASES OF THE HUMAN BODY, FIFTH EDITION.** By C.D. Tamparo & M.A. Lewis. A brief review of anatomy and physiology provides an exploration of the major diseases and disorders of each body system. For each disease entry, a logical format describes the disease or disorder, how it is treated, and the likely consequences for the person experiencing it. Includes a CD-ROM with over 50 learning activities and much more. Illus. in color. 591 pages. F.A. Davis. Paperback. Pub. at $55.95

- **2987626 ANATOMY 360: The Ultimate Visual Guide to the Human Body.** By Jamie Roebeck. Take a journey through the human body’s body systems with never before seen anatomical details, with cross-sections and full rotations showing a 360 degree perspective of the human body. An authoritative text describes every region of the body and includes date facts on health and disease. 328 pages. Thunder Bay. 9x12¼. Paperback. Pub. at $19.99

- **2971663 THE SAWBONES BOOK: The Horrifying, Hilarious Road to Modern Medicine.** By Sydney & Justin McKeon. The book highlights insights from the history of medicine, answering questions such as: How can I rob graves the old fashioned way? Is opium, is there anything it can’t put out? How likely am I to spontaneously burst into flames? Does chocolate have medicinal properties? Plus other absurdities. Well illus., some in color. 246 pages. Harper. Pub. at $19.95

Includes a CD-ROM with over 50 learning activities and much more. Illus. in color. 591 pages. F.A. Davis. Paperback. Pub. at $55.95

- **2807823 ZAPPED: From Infrared to X-rays, the Curious History of Invisible Light.** By Bob Berman. Berman tells the story of the light we cannot see, from microwave, infrared, ultraviolet, and other forms of radiation from the solar disk to the invisible sources of the twentieth century. 261 pages. Little. Brown. Pub. at $26.00

- **2837992 HOW THE BODY WORKS: The Science Behind Celebrity Life.** By R. Smith & N. Temple. Packed with clear and easy to understand color graphics and fascinating facts, this instruction manual for the body demystifies the complex processes that keep us alive and on top of our game. 256 pages. Dorling Kindersley. Pub. at $20.00

- **2987626 ANATOMY 360: The Ultimate Visual Guide to the Human Body.** By Jamie Roebeck. Take a journey through the human body’s body systems with never before seen anatomical details, with cross-sections and full rotations showing a 360 degree perspective of the human body. An authoritative text describes every region of the body and includes date facts on health and disease. 328 pages. Thunder Bay. 9x12¼. Paperback. Pub. at $19.99

8802176 STARTING YOUR CAREER AS A CONTRACTOR. By Claudiu Fatu. Thoroughly breaks down the ins and outs of turning contractors into successful business owners. Fatu’s account chronicles the motivation to start to the intricacies of being your own boss. Fatu turns his own experiences and those of other contractors into invaluable advice on everything from starting and building a business. 205 pages. Allworth. Paperback. Pub. at $19.99.

2998379 THE BETTENCOURT AFFAIR: The World’s Richest Woman and the Scandal That Rocked Paris. By Tom Santon. Heirless to the L’Oreal fortune, Liliane Bettencourt is the world’s richest woman and the 14th wealthiest person. But in recent years, she’s also become the richest woman and the 14th wealthiest person. This revelatory work shines a light on the story of this iconic and uniquely American company. Photos. 288 pages. AMACOM. Pub. at $24.95.

3731200 WE ARE MARKET BASKET: The Story of the Unlikely Grassroots Movement That Saved a Beloved Business. By D. Korschun & G. Weker. What is it about the Market Basket in Lexington and Lebanon that provokes such ferocious loyalty? How does a company spread across three states maintain a culture that embraces everyone, from cashier to customer, as family? Can a company prioritize stakeholder over shareholders? This account chronicles the story of this iconic and uniquely American company. Photos. 238 pages. AMACOM. Pub. at $24.95.

3728161 NEGOTIATING THE IMPOSSIBLE: How to Break Deadlocks and Resolve Ugly Conflicts (Without Money or Muscle). By Deepak Malhotra. Some negotiations are easy. Others are more difficult. And then there are situations that seem completely hopeless. Negotiations, Malhotra shows, is about how to navigate even the toughest deals and disputes to find success when it seems impossible. 212 pages. Berrett-Koehler. Paperback. Pub. at $19.95.

295987X BLOCKCHAIN REVOLUTION: How the Technology Behind Bitcoin and Other Cryptocurrencies Is Changing Money, Business, and the World. By Don & Alex Tapscott. Deepak Malhotra shows how the Internet of Value, an ingeniously simple, revolutionary protocol that allows anything of value—including money, stocks, music, intellectual property, and even our identities—to be managed and transferred peer to peer. This revolutionary work starts on where it can lead us in the next decade and beyond. 358 pages. Portfolio. Paperback. Pub. at $19.00.

2829383 BLOCKCHAIN REVOLUTION: How the Technology Behind Bitcoin Is Changing Money, Business, and the World. By Don & Alex Tapscott. Deepak Malhotra shows how the Internet of Value, an ingeniously simple, revolutionary protocol that allows anything of value—including money, stocks, music, intellectual property, and even our identities—to be managed and transferred peer to peer. This revolutionary work starts on where it can lead us in the next decade and beyond. 358 pages. Portfolio. Paperback. Pub. at $19.00.

294655X TROUBLEMAKERS: Silicon Valley’s Coming of Age. By Leslie Berlin. Introduces the people and stories behind the birth of the Internet and the microprocessor, as well as Apple, Atari, Genentech, Xerox PARC, ROLM, ASK, and Kleiner Perkins Caufield & Byers. In the at $19.99, seven years and thirty-five miles, five major industries were born. These troublemakers re-wrote the rules and invented the future. 16 pages of photos, some color. 494 pages, index. In a class all: to be believed. 378 pages. S&S. Pub. at $28.00.

294656X SPARK: How to Lead Yourself and Others to Greater Success. By Angie Morgan. SPARK is the acronym for the doers, thinkers, innovators, and key influencers who are catalysts for personal and organizational change. The authors show how you can be their own SPARK by developing your own leadership behaviors, and with this guide as a blueprint, you too can become a catalyst for change. 210 pages. HMH. Paperback. Pub. at $16.99.

2946327 AIRBNB: A 21st-Century Goldmine. By Andrew Keene. If you are interested in making big money on a small resource to learn what you need to know in order to understand the entire business model better. The information is engaging and insightful, making it easy to understand why Airbnb is so significant. Post Hill. Pub. at $27.00.

3700850 WRITE TO REPORTS & PROPOSALS, 5TH EDITION. By Patrick Forsyth. This is essential reading for achieving effective writing techniques. This resource provides practical advice that will help you write succinctly and with impact across different media in a clear and precise form. It will give you the tools that will impress, convince and persuade your colleagues or clients. 141 pages. Kogan Page. Paperback. Pub. at $14.95.

3700900 LEGAL FORMS FOR STARTING & RUNNING A SMALL BUSINESS, 10TH EDITION. By Fred S. Steingold. You can’t afford to farm paperwork and contracts out to a lawyer, you have to deal with them yourself. With this resource you can handle it all. Here you’ll find the legal forms you need to start and grow your business. Each document comes with thorough, plain English, line by line instructions to help you. 484 pages. Nolo. Paperback. Pub. at $29.95.

3757199 HOW RICH PEOPLE THINK. By Steve Siebold. Comparing the thoughts, habits, and philosophies of the middle class to the whole class when it comes to wealth, Siebold discovers if you follow the beliefs, philosophies, and thinking of the rich they will not take action, you have a legitimate strategy to becoming a billionaire. 146 pages. Sourcebooks. Pub. at $16.99.

3749797 REAL ARTISTS DON’T STARVE. By Jeff Goins. The truth is we do starve. It’s a creative life and it’s a prosperous one. Drawing on lessons from the likes of Jim Henson, C.S. Lewis, Dr. Dre, and many others, Goins invites us to drop the myths, worries, and flat-out lies that have been drilled into our entire lives and instead reveal the empowering truth: real artists don’t starve! They thrive! 231 pages. Thomas Nelson. Pub. at $24.99.

3766810 ACCOUNTING FOR NON-ACCOUNTANTS, 3RD EDITION: The Fast and Easy Way to Learn the Basics. By Wayne A. Label. A must-have guide for anyone who has never taken an accounting class, who is mystified by the jargon, or who has no clue about balance sheets, income statements, or statements of cash flow. You’ll find all the information you need to get started inside this resource. Illus. 210 pages. Sourcebooks. Paperback. Pub. at $21.95.

296709X SECRETS OF POWER NEGOTIATING, THIRD EDITION: Inside Secrets from a Master Negotiator. By Roger Dawson. This guide teaches you how to get everything you want and still come out the other side that you wanted. This edition includes 20 sure fire negotiating gambits, how to negotiate over the telephone, by e-mail, and via instant messaging, how to recognize the meanings in conversations, and more. 351 pages. Career Press. Paperback. Pub. at $18.95.

3708879 HOW TO WRITE A BUSINESS PLAN, 6TH EDITION. By Brian Finch. This resource is the first step in a company’s growth. Here you need to make an impact, including advice on researching competitors, presenting your management skills and successfully communicating with investors. Here you need to raise finance, sell a business or develop a specific project, this guide helps you to produce a convincing business plan. 182 pages. Kogan Page. Paperback. Pub. at $14.95.

5783621 START YOUR OWN BUSINESS WITHOUT A BUSINESS PLAN, 2ND EDITION. By Fred S. Steingold. Step by step instructions on how to start a successful transportation business. Find the right option, from taxi business to transportation services by using real-world case studies, tax-saving tips, game plans, and discussion points, Kohler coaches you through the complexities of the tax game. 348 pages. Entrepreneur Press. Paperback. Pub. at $19.99.

6983736 MINDING MY BUSINESS: The Complete, No-Nonsense, Start-to-Finish Guide to Owning and Running Your Own Store. By Adeena Mignogna. With no previous business experience, Mignogna decided to open up her own retail shop and start her own business. In this part memoir, part handbook, she details all the things she did right, and wrong, so that anyone following in her footsteps won’t make the same mistakes. 336 pages. Skyhorse. Paperback. Pub. at $24.95.
**Mathematics**

**2871793 WILL SHORTZ PRESENTS KENKEN TO EXERCISE YOUR BRAIN.** By Tetsuya Miyamoto. Features 100 challenging kenkens, arranged in order of difficulty. Puzzles range from easy to hard. Paperback. Pub. at $7.99

**3697460 EULER’S GEM: The Polyhedron Formula and the Birth of Topology.** By David S. Richeson. From Euler’s four-coloring to modern cutting-edge research, this volume celebrates the discovery of Euler’s beloved polyhedron formula and its far-reaching impact on topology—the study of shapes. This fascinating volume is filled with a who’s who of brilliant mathematicians who questioned, refined, and contributed to a remarkable theorem’s development. Illus. 317 pages. Princeton. Paperback. Pub. at $16.95

**3705386 WHAT ARE THE CHANCES? Voodoo Deaths, Office Gossip & Other Adventures in Probability.** By Bart K. Holland. Holland captures the reader’s imagination with surprising examples of probability in action, everyday events that can profoundly affect our lives but are controlled by random number. Whether you have only a distant recollection of algebra or use differential equations every day, this volume offers examples of the impact of chance that will amaze and astonish. 141 pages. Johns Hopkins. Pub. at $31.95

**3731243 BARRON’S ALGEBRA THE EASY WAY, SIXTH EDITION.** By Douglas Downing. Covers everything from equations, number operations, fractions, decimals, and percentages to exponents, radicals, geometric figures, inequalities, and more. Comprehensive solutions are provided. Illus. 477 pages. Alpha. 8½ x10¾. Paperback. Pub. at $19.89

**2862301 THE MATHEMATICS OF SECRETS: Cryptography from Caesar Ciphers to Digital Encryption.** By Joshua Holden. Takes readers on a fascinating tour behind the mathematics behind cryptography—the science of sending secret messages. With a wide range of historical anecdotes and real-world examples, Holden shows how mathematical principles underpin the ways that different codes and ciphers work. Illus. 373 pages. Princeton. Paperback. Pub. at $18.95

**3758761 CURVES FOR THE MATHEMATICALLY CURIOUS.** By Julian Havil. This is a thoroughly collected set of ten mathematical curves, selected for their significance, mathematical interest, and beauty. Each chapter gives an account of the history and definition of a curve, providing a glimpse into the elegant and often surprising mathematics involved in its creation and exploration. The authors $29.95

**2953013 EIGHT LESSONS ON INFINITY: A Mathematical Adventure.** By Haim Shapiro. Do you want to know the secrets behind the concept of infinity, which has puzzled and tantalized some of the greatest minds in history? Writing with humor and lightness of touch, the author offers a thrilling journey that will enlighten and astound. 243 pages. Duncan Baird. Paperback. Pub. at $16.95

**3738833 PROOF! How the World Became Geometrical.** By Amir Alexander. Traces the path of the geometrical vision of the world as it coursed its way from the Renaissance to the present, shaping our ideas of time, space, and the cosmos. The author of The Golden Ratio—why the ancient Greek mathematician, considers how you could use a chessboard to help remember this remarkable theorem’s development. Illus. 317 pages. Princeton. Paperback. Pub. at $29.95

**3762824 IT ALL ADDS UP: The Story of People and Mathematics.** By Michel Launay. History and anecdotes from around the world are mixed to reveal how mathematics became pivotal to the story of human history. The author’s exploration of mathematics is guided by Launay as a guide. He unravels the unexpected and at times serendipitous ways in which big mathematical ideas were created. Illus. 304 pages. Scientific American. Paperback. Pub. at $19.99

**3766294 THE JOY OF SET: The Many Dimensions of a Seemingly Simple Card Game.** By Liz McMahon et al. Takes readers on a fascinating journey into the seemingly simple card game and reveals its surprisingly deep and diverse mathematical dimensions. Absolutely no mathematical background is necessary, all you need is a sense of curiosity and adventure! This title is devoted to the minds and the labs of some of the world’s most cutting-edge scientists and thinkers to reveal the incredible advances made possible by de-extinction. Wray delves into the ecological and moral dilemmas that come with this emerging field. 293 pages. Greystone. Paperback. Pub. at $17.95

**279117X THE ORIGIN OF (ALMOST) EVERYTHING.** By Graham Lawlor. 312 pages. Nicholas Brealey. Pub. at $19.95

**3722333 EVERYTHING ALL AT ONCE.** By Matt Brown. This book argues that deep down in all matters in some way, driven to use tools of reason combined with the very best information available to solve even the biggest puzzles of science, yet in accessible volume, he teaches us that we have the ability, the power, and the responsibility to think critically and take control of the future. 374 pages. Rodale. Pub. at $26.99

**3701382 SCIENCE IN THE SOUL. Selected Writings of a Passionate Rationalist.** By Richard Dawkins. The legendary biologist, provocateur, and bestselling author mounts a timely and passionate defense of science and clear thinking with this career-spanning collection of essays, including 20 pieces on the States for the first time. 438 pages. Random. Pub. at $28.00

**3761967 LETTERS FROM AN ASTROPHYSICIST.** By Neil deGrasse Tyson. Go behind the scenes of Tyson’s public fame and delve into the correspondence that has connected him across the globe who has sought him out in search of answers. In this hand-picked collection of 101 letters, Tyson draws upon cosmic perspective to asset critical vantage point over important questions that have crossed his mind. 260 pages. William Collins. Pub. at $29.99

**37313X POTENTIALITY: Metaphysical and Bioethical Dimensions.** Ed. by John P. Lizza. The author gathers classic articles alongside leading thinkers who analyze the nature of potentiality in bioethics, a concept central to a number of important debates. The contributors illustrated the analysis with considerations of the lives of persons at the beginning and end of life. 276 pages. Johns Hopkins. Paperback. Pub. at $52.95

**3738834 PROOF! How the World Became Geometrical.** By Amir Alexander. Traces the path of the geometrical vision of the world as it coursed its way from the Renaissance to the present, shaping our ideas of time, space, and the cosmos. The author of The Golden Ratio—why the ancient Greek mathematician, considers how you could use a chessboard to help remember this remarkable theorem’s development. Illus. 317 pages. Princeton. Paperback. Pub. at $29.95

**2836912 THE HUMONGOUS BOOK OF CALCULUS PROBLEMS.** By W. Michael Kelley. Presents a wonderfully-annotated series of more than 1,000 problems that cover all major areas of calculus—including high-challenging Epsilon-Delta proofs and famous integrals—that provides extreme-through explanations of the problems and answers for non-mathematicians. Illus. 565 pages. Alpha. 8½x11¾. Paperback. Pub. at $22.99

**3255328 THE JOY OF SET: The Many Mathematical Dimensions of a Seemingly Simple Card Game.** By Liz McMahon et al. Takes readers on a fascinating journey into the seemingly simple card game and reveals its surprisingly deep and diverse mathematical dimensions. Absolutely no mathematical background is necessary, all you need is a sense of curiosity and adventure! This title is devoted to the minds and the labs of some of the world’s most cutting-edge scientists and thinkers to reveal the incredible advances made possible by de-extinction. Wray delves into the ecological and moral dilemmas that come with this emerging field. 293 pages. Greystone. Paperback. Pub. at $17.95
Science & History

6970656 A UNIVERSE FROM NOTHING: Why There Is Something Rather Than Nothing, by Lawrence M. Krauss. Krauss reminds us that modern science is addressing the question of why there is something rather than nothing, with surprising and fascinating results. A provocative, game-changing entry into the debate about the question of why has modern science so long been such a potent force in our age?

6970657 A UNIVERSE FROM NOTHING: Why There Is Something Rather Than Nothing, by Lawrence M. Krauss. Krauss reminds us that modern science is addressing the question of why there is something rather than nothing, with surprising and fascinating results. A provocative, game-changing entry into the debate about the question of why has modern science so long been such a potent force in our age?

6970658 A UNIVERSE FROM NOTHING: Why There Is Something Rather Than Nothing, by Lawrence M. Krauss. Krauss reminds us that modern science is addressing the question of why there is something rather than nothing, with surprising and fascinating results. A provocative, game-changing entry into the debate about the question of why has modern science so long been such a potent force in our age?

2994305 THE ROYAL SOCIETY: And the Invention of Modern Science, by Adrian Timms. 219 pages. Basic. Pub. at $26.00

Science & Invention

6858155 THE PAPER TRAIL: An Unexpected History of a Revolutionary Invention, by Alexander Monroe. A dramatic story of the curious alliance of holy men and mystics, warriors and poets, and ordinary men and women, this is the sweeping, richly detailed history of how paper—the simple Chinese invention of some 2,000 years ago—wrapped itself around the world, ultimately becoming the tool for documenting mankind’s most momentous ideas. 368 pages. Knopf. Pub. at $30.00

2987864 WINDMILLS. By Martin Watts. Provides information that is vital for the protection and maintenance of British windmills, whose grain as well as other essential products. Well illus., most in color. 64 pages. Shire. Paperback. Pub. at $12.95

3720877 OUT OF THE SHADOW OF A GIANT: The Birth of British Science, by John & Mary Grigbin. Shows that even without Newton science in Britain would have made a great leap forward in the second half of the 17th Century, paving the way for the Royal Society and many more extraordinary developments. And without Robert Hooke and Edmond Halley, we might never have heard of Isaac Newton. Illus. 248 pages. Wellfleet. Paperback. Pub. at $14.95

★ DVD 2829681 MIND CONTROL: The MKULTRA Files. With roots deep in the history of military sciences, the history of mind control studies is a rich and fascinating one. Featuring an exclusive interview and presentation by renowned trauma expert, Dr. Colin Ross, this is an extraordinary examination of some of those experiments and the effects they have had on our culture. 75 minutes. Alchemy. Pub. at $19.98

★ 369271X FORGOTTEN SCIENCE: Strange Ideas from the Scrapheap of History, by John & Mary Grigbin. Numerous scientists have conducted bizarre experiments down the centuries, and some of them were genuine geniuses; others were simple loneEons. History is littered with their wreckage, and this volume tells the story of the very strangest. Science at school was never this weird! 319 pages. Amberley. Paperback. Pub. at $16.95

★ 3757013 UNRAVELLING THE DOUBLE HELIX: The Story of DNA, by Gareth Williams. Comprehensive in scope, this title covers the first century of the history of DNA, one of the greatest triumphs of modern science, in its entirety. The personalities of the main players, their impact with their entanglement with DNA, and the unique qualities that make great scientists tick is also explored. Photos. 594 pages. Pegasus. Pub. at $22.95

★ 3753441 SCIENTIFICA HISTORICA: How the World’s Great Science Books Chart the History of Knowledge, by Brian Clegg. Explores the development of knowledge and progress not only of scientific beliefs and ideas but also language and the physical object itself. The author takes us on a thrilling journey through time and examines how the written word has been a conduit for furthering our knowledge of the universe and ourselves. Well illus., many in color. 272 pages. Ivy. Paperback. Pub. at $35.00

288407X WHEN THE EARTH WAS FLAT: All the Bits of Science We Thought We Knew... Until We Didn’t, by Michael O’Mara. This entertaining and informative look at a dubious history, the author examines the origins of some of the most extraordinary and mind boggling scientific theories of the past. Illus. 192 pages. Michael O’Mara. Paperback. PRICE CUT to $4.95

2984011 CLOCKWORK FUTURES: The Science of Steampunk and the Reinvention of the Modern World. By Edward Schumacher. This is a behind steampunk, which is every bit as extraordinary as what we might find in the world of Jules Verne, and sometimes, just as fantastical. Here is the scientific framework we have inherited and shed light on how we pursue science, and how we grapple with our destiny — yesterday, today, and tomorrow. 16 pages of color illus. 300 pages. Pegasus. Pub. at $28.95

Religion & Science

2905299 THE BIG QUESTION: Why We Can’t Stop Talking About Science, Faith and God, by Alister McGrath. A thinking person’s guide to the fascinating relationship between science and faith by a renowned scientist and religious scholar who challenges the dogmatism of Richard Dawkins and the New Atheism, exploring the account of how science relates to faith, showing how both can be interwoven to give a rich vision of life. 264 pages. St. Martin’s. Pub. at $27.95

★ DVD 2888101 MIRACLES: The Power of Faith: Witnessed. If miracles are real, how do they divine intervention and what is the role of spirituality, religion and prayer? This four-part series explores the many answers to these questions. Interviews with theologians, historians, experts, actual witnesses and visits to locations where it is believed some of the most profound miracles occurred. Over four hours. Mill Creek. Pub. at $14.98

3705269 SCIENCE AND EASTERN ORTHODOXY: From the Greek Fathers to the Age of Globalization, by Efthymios Nicolaidis. Provides a wealth of new information concerning Orthodoxy and secular knowledge—and the reactions of the Orthodox Church to modern sciences, Illus., some in color. 252 pages. Johns Hopkins. Pub. at $9.95

★ 3767108 THE “GOD” PART OF THE BRAIN: A Scientific Interpretation of Human Spirituality and God, by Matthew Alper. Spiritual seekers and atheists alike will be compelled and transformed by Alper’s classic study of science and religion, originally published in 1996. A must read for anyone who has pondered the question of God’s existence, as well as the meaning of our own. 274 pages. Sourcebooks. Paperback. Pub. at $19.95

★ DVD 3771884 A QUEST FOR GOD. For centuries, humanity has searched for spiritual truth. But today, a new science offers answers to the most important questions of our time: can faith and science co-exist or do belief and progress inevitably come into conflict? This program reveals, quantum physics explains more than the actions of sub-atomic particles—it reveals the hidden truths in the universe and our souls. 60 minutes. Bullfrog Films. Pub. at $19.95
