Earth Science

4650522 ON THE TRAIL OF STARDUST. By Jon Larsen. Stardust—known as micrometeorites—is the oldest matter anywhere. Larsen reveals the techniques he has developed to study this precious treasure. Drawing on the best available star maps and step-by-step photo sequences of the methods he has developed to assemble his collection, Larsen provides an accessible exploration of the universe. 144 pages. Voyager. Paperback. Pub. at $19.99 $6.95

Environment & Ecology

3983196 THE WORLD WITHOUT US. By Alan Weisman. If human beings disappeared instantaneously from the Earth, what would happen? In his revelatory account, Weisman draws on every field of science to present an environmental assessment like no other, the most affecting portrait yet of humanity’s place on this planet. 416 pages. Picador. Paperback. Pub. at $19.00 $4.95

Blu-ray 6572456 SIX DEGREES COULD CHANGE THE WORLD. By the year 2100, many scientists believe that the Earth’s average temperature could rise by as much as six degrees Celsius. In this compelling investigation, National Geographic leads a degree-by-degree journey to explore what each rising degree could mean for the future of our people and planet. Narrated by Alec Baldwin. English SDH. 90 minutes. Warner Home Video. $3.95

2986427 THE WATER WILL COME: Rising Seas, Sinking Cities, and the Remaking of the Civilized World. By Jeff Goodell. By the year 2100, many scientists believe that the Earth’s average temperature could rise by as much as six degrees Celsius. In this compelling investigation, National Geographic leads a degree-by-degree journey to explore what each rising degree could mean for the future of our people and planet. Narrated by Alec Baldwin. English SDH. 90 minutes. Warner Home Video. $3.95

467523 CHASING THE MOON: The Projects That Launched America into the Space Age. By R. Stone & A. Andres. Tells the stories of the visionaries–based on eyewitness accounts and newly discovered archival material–behind America’s space race with the first lunar landing fifty years ago. This study reveals the unknown stories of the individuals whose work culminated in America’s most momentous achievement. 16 pages of photos. 359 pages. Ballantine. Pub. at $32.00. $7.95

4672768 HASSELBLAD & THE MOON LANDING. By Deborah Ireland. While the Apollo response of sending pictures from three cameras behind on the Moon, where they remain to this day, they brought back film magazines containing 1,400 photographs, the most famous of which is featured here alongside the mission time-line, and transcripts of the conversations between the astronauts and Mission Control. 95 pages. Ammonite. Pub. at $14.95. $11.95

4697804 TO TOUCH THE FACE OF GOD: The Sacred, the Profane, and the American Space Program, 1957-1970. By Kendrick Oliver. Explores the role played by religious motivations in the formation of the space program and discusses the responses of religious thinkers such as Paul Tillich and C.S. Lewis. Examining the attitudes of religious Americans, Oliver finds that the space program was a source of anxiety as well as inspiration. Photos. 229 pages. Johns Hopkins. Pub. at $42.95. $9.95

* 465160X ASTROPHYSICS: Knowledge in an Uncertain World. By David Sloan Wilson. In an era of searching for extra-terrestrial life, managing the effects of space weather, or learning about dark matter, the study of the cosmos has gained meaning for us all. Filled with helpful diagrams and simple summaries of complex theories, this essential introduction brings you all the great ideas about the nature of space. 240 pages. Arcturus. Paperback. Pub. at $12.95. $9.95

4752794 SPACE EXPLORATION: A History in 100 Objects. By Sten Odenwald. Examines 100 objects that forever altered what we know and how we think of space. From Sputnik to Skylab and Galileo’s telescope to the Curiosity rover, some objects are iconic and some obscure—but all are utterly fascinating. Includes 130 illus. in color. 210 pages. The Experiment. Pub. at $25.00. $7.95

4755030 STAR SETTLERS: The Billionaires, Geniuses, and Crazed Visionaries Out to Conquer the Universe. By Fred Nadis. Offers a window into the inner sanctums of the 1%–super-elite packed with the members of the scientific, intellectual, and economic elite. This timely work captures the extra-scientific zeal for space travel and its place in the eminence of space. The authors argue we have to change how we think about the universe and our place in it, because it is more interesting than we might have imagined. Illus., mostly in color. 218 pages. Smithsonian. Paperback. Pub. at $17.95. $12.95

4670255 ACCESSORY TO WAR: The Unspoken Alliance Between Astrophysics and the Military. By N.D. Tyson & A. Lang. Examines how the methods and tools of astrophysics have been enlisted in the service of war. Spanning early celestial navigation to satellite-enabled warfare, this is a richly researched and provocative examination of the interconnection of science and war. Norton. Paperback. Pub. at $16.95. $6.95

6817815 EXOPLANETS: Diamond Worlds, Super Earths, Pulsar Planets, and the New Search for Life Beyond Our Solar System. By Joel B. Stearns. With remarkable recent discoveries in space: planets revolving around pulsars; planets made of diamond; planets that are mostly water; and numerous rogue planets that float in the emptiness of space. The authors argue we have to change how we think about the universe and our place in it, because it is more interesting than we might have imagined. Illus., mostly in color. 218 pages. Smithsonian. Paperback. Pub. at $17.95. $12.95

4680405 DESTINATION MARS: The Story of Our Quest to Conquer the Red Planet. By Andrew May. Tracks the history of our fascination with the Red Planet and explores the science upon which a crewed Mars mission would be based, from assembling a spacecraft in Earth’s atmosphere, to landing on a world of storms, and 163 pages. Icon. Paperback. Pub. at $12.95. $5.95

* 6562841 ATMOSPHERICS FOR PEOPLE IN A HURRY. By Neil deGrasse Tyson. While confounding atmospheric conditions, from space to the ground, from quarks to quantum mechanics, and from the search for planets to the search for life in the universe. Norton. Pub. at $18.95. $13.95

3957723 APOLLO 8 & THE Thrilling Story of the Mission That Flew Us to the Moon. By Jeffrey Kluger. From Mission Control to the astronauts’ homes, from the test labs to the launch pad, the full story of Apollo 8 has never been told. Here is the tale of a mission that was both a calculated risk and a wildcrapshoot, an account of how three American heroes forever changed our view of the home planet. 16 pages of photos, many in color. Acrader. Paperback. Pub. at $18.00. $5.95

4684861 APOLLO 11: The Behind the Scenes Story of the Monumental Mission. By Jeffrey Kluger. Read by Brian Troxell. From Mission Control to the astronauts’ homes, from the test labs to the launch pad, the full story of Apollo 8 has never been told. Here is the tale of a mission that was both a calculated risk and a wildcrapshoot, an account of how three American heroes forever changed our view of the home planet. 16 pages of photos, many in color. Acrader. Paperback. Pub. at $16.99. $5.95

4681177 MYTH LEGENDS FROM SPACE: The Biggest Myths About Space Demystified. By Bob King. Cuts through the fog of myth to bring the truth behind the many questions about the space program. In examining the myths and realities, the book helps us to understand and using us step by step through the concrete evidence that contradicts them. King debunks myths and exposes the scientific truth. Well illus. 224 pages. Page Street. Paperback. Pub. at $16.99. $5.95

4719441 NIGHT SKY WITH THE NAKED EYE. By Bob King. Learn how to spot the International Space Station, follow the moon through its phases, form a shooting star, watch a meteor shower along with traditional night sky activities such as identifying the bright planets, stars and constellations with this illustrated guide. Full color. Paperbound. Pub. at $21.99. SOLD OUT

4719447 NIGHT SKY WITH THE NAKED EYE: SECOND EDITION: A Falcon Field Guide. By Nicholas Nigro. This ultimate illustrated guide covers summer and winter constellations, planets, and stars found in the northern hemisphere, making it easy to identify objects in the night sky even from one’s own backyard. 98 pages. Falcon. Paperback. Pub. at $12.95. $9.95

3966284 SHOOT FOR THE MOON: The Space Race and the Extraordinary Voyage of Apollo 11. By James Donovan. Set amid the tensions of the Cold War and the upheavals of the sixties, and filled with first-person, behind-the-scenes details, this gripping account of the dangers, the challenges, and the sheer determination that defined not only Apollo 11, but also the Mercury and Gemini missions that came before it. 244 pages of photos, many in color. 453 pages. Little, Brown. Paperback. Pub. at $20.99. $5.95

3966288 SHOOT FOR THE MOON: The Space Race and the Extraordinary Voyage of Apollo 11. By James Donovan. Set amid the tensions of the Cold War and the upheavals of the sixties, and filled with first-person, behind-the-scenes details, this gripping account of the dangers, the challenges, and the sheer determination that defined not only Apollo 11, but also the Mercury and Gemini missions that came before it. 244 pages of photos, many in color. 453 pages. Little, Brown. Paperback. Pub. at $30.00. $6.95

3932145 SHOOT FOR THE MOON: The Universe Today Ultrarich Color Viewing the Cosmos. By David Dickinson & F. Cain. Features tips and tricks for viewing our solar system and deep sky objects, as well as detailed charts, graphs and tables to find must-see events for years to come. The ultimate resource for any backyard space enthusiast. Well illus. in color. 240 pages. Page Street. B/x10. Paperback. Pub. at $28.99. $7.95

4702395 THE EARTH GAZERS: On Seeing Our Planet. By Christian Ober. For more than a century, amateur photographers have been recording the rich and engaging history of the space program and the ways in which it transformed not just our view of our planet, but the lives of those above us who orbit around the moon. The influential photographers “Earthrince” and “The Blue Marble” included in this volume, represent a pivotal moment in our history. Photos, some in color. 456 pages. Pegasus. Pub. at $28.95. $5.95

3994450 THE UNIVERSE TODAY ULTRARICH COLOR VIEWING THE COSMOS. By David Dickinson & F. Cain. Features tips and tricks for viewing our solar system and deep sky objects, as well as detailed charts, graphs and tables to find must-see events for years to come. The ultimate resource for any backyard space enthusiast. Well illus. in color. 240 pages. Page Street. B/x10. Paperback. Pub. at $28.99. $7.95

3967602 THE EYE OF THE STORM: A Photographic Look Inside a Hurricane. By James Byrd. This new volume will reveal just what you need to be fluent and ready for the next cosmic hurricane. Photos of hurricanes, from quarks to quantum mechanics, and from the search for planets to the search for life in the universe. Norton. Pub. at $18.95. $13.95
Astronomy, Space Travel & Cosmology

**387175 SPACE MISSION ART: The Mission Patches & Insignias of America’s Historic Human Spaceflights.** By Luke Wesley Price. From the spacecraft logo artwork of Project Mercury to the mission patches of Gemini, Apollo, Skylab, Apollo-Soyuz and the Space Shuttle, this volume showcases every one of those designs, and tells the stories behind them. Features crew photos, mission objectives and fascinating trivia. 192 pages. Ammonite. Pub. at $17.95  **$13.95**

**3904919 HEART OF DARKNESS: Unraveling the Unseen Secrets of the Visible Universe.** By J.P. Ostriker & S. Mitton. Describes the incredible saga of humankind’s quest to unravel the deepest secrets of the universe. Over the last thirty years, scientists have learned that two little-understood components—dark matter and dark energy—make up most of the known cosmos and hold the key to the universe’s fate. Illus., some in color. 299 pages. Princeton. Paperback. Pub. at $19.95  **$15.95**

**4723538 MOONBOUND: Apollo 11 and the Dream of Spaceflight.** By Jonathan Fetter-Vorm. On the fiftieth anniversary of that incredible journey, this graphic novel tells the monumental story of the moon and the men who went there. With vibrant images and meticulous attention to detail, the author conjures the long history of the visionaries, stalkers, builders, and adventurers who sent the early Apollo men on a legendary voyage. 248 pages. Hill & Wang. Paperback. Pub. at $19.95  **$6.95**

**3955273 THE BACKYARD ASTRONOMER’S FIELD GUIDE: How to Find the Best Objects in the Night Sky.** By David Dickinson. Broken down by month and by hemisphere to ensure you get the best possible view. Dickinson shows you how to find objects like spiral galaxies, stunning sights in the Milky Way and stars that bring the “wow factor” to astronomy. With 44 experiments to re-create the conditions of the Big Bang, and test promising theories. 233 pages. Princeton. Pub. at $24.95  **$26.95**

**3863492 AMERICAN MOONSHOT: John F. Kennedy and the Great Space Race.** By Doug Brinkley. Ten months after he was elected, John F. Kennedy made an astounding announcement to the nation: we would put a man on the moon by the end of this decade. This engaging epic of contemporary history paints a portrait of the men and women who made this giant leap possible. This is living history at its finest, 16 pages of photos, most in color. 548 pages. Harper. Pub. at $35.00  **$6.95**

**3714744 AT THE EDGE OF TIME: Exploring the Mysteries of Our Univer.** By Dan Hooper. Taking readers into the remarkable world of cosmology, Hooper describes many of the extraordinary and strange questions that scientists are asking about the origin and nature of our universe. He examines how we are using the largest Hadron Collider and other experiments to re-create the conditions of the Big Bang and test promising theories. 233 pages. Princeton. Pub. at $24.95  **$19.95**

**4754662 AT THE EDGE OF TIME: Exploring the Mysteries of Our Univer.** By Dan Hooper. A new look at the first few seconds after the Big Bang, and how research into these moments continues to revolutionize our understanding of our universe. Hooper presents an accessible investigation of our universe and its birth, Hill. 280 pages. Princeton. Paperback. Pub. at $17.95  **$13.95**

**3901254 THE LITTLE BOOK OF COSMOLOGY.** By Lyman Page. Provides a look at our universe on the grandest scales imaginable. Written by a leading observational cosmologist, this short but deeply insightful edition describes what scientists are revealing about the origin of the first stars and galaxies, we have been literally in the dark. Incorporating the very latest research from this branch of astrophysics, Chapman illuminates this time of darkness, piecing together the evidence to build a picture of the first billion years of our Universe. Color photos. 304 pages. Bloomsbury. Pub. at $28.00  **$21.95**

**4732316 FIRST LIGHT: Switching on the World and Will Take Us to the Stars.** By Emma Chapman. Explains the natural and artificial light that affects life on Earth and everything in the Milky Way. The author then traces the evolution of the universe, from the Big Bang fourteen billion years ago, past the birth of the Sun and our planets, to today and beyond. 300 pages. Belknap. Paperback. Pub. at $17.95  **$13.95**

**4710711 BEYOND THE KNOWN: How Exploration Created the Modern World and Will Take Us to the Stars.** By Andrew Rader. A chronicle of exploration that spotlights humans’ insatiable desire to leave the territory—from civilization’s earliest days to our present moment, when other solar systems and even other galaxies beckon. 344 pages. Scribner. Pub. at $28.95  **$16.95**

**6853951 HUBBLE IN SPACE: NASA Images of Planets, Stars, Galaxies, Nebulae, Black Holes, Dark Matter & More.** Ed. by B.A. Lynch-Johnt & B. Alesse. In this volume, images from NASA’s Hubble Space Telescope show the solar system, Milky Way, galaxies, and far reaches of the universe up close like never before. You’ll gain an understanding of the immense content of the universe and much more. Fully 128 pages. Amherst Media. Pub. at $24.95  **$17.95**

**3855327 UNTIL THE END OF TIME: Mind, Matter, and Our Search for Meaning in an Evolving Universe.** By Brian Greene. Through a series of nested stories, Greene distills layers of reality—particles to planets, consciousness to creativity, matter to meaning—Greene traces the interplay along the cosmic timeline between entropy, evolution, providing us with a clearer sense of how we came to be, and a firmer grasp of where we are headed. 428 pages. Knopf. Pub. at $30.00  **$21.95**

**4720106 FIRST LIGHT: Switching on the World and Will Take Us to the Stars.** By Emma Chapman. Explains the natural and artificial light that affects life on Earth and elsewhere. These analogues help the reader comprehend what is sometimes difficult to visualize as we try to imagine what it is like to “be there” on Titan. 196 pages. Harvard. Pub. at $29.95  **$24.95**

**4732316 FIRST LIGHT: Switching on the World and Will Take Us to the Stars.** By Emma Chapman. Explains the natural and artificial light that affects life on Earth and elsewhere. These analogues help the reader comprehend what is sometimes difficult to visualize as we try to imagine what it is like to “be there” on Titan. 196 pages. Harvard. Pub. at $29.95  **$27.95**

**4732316 FIRST LIGHT: Switching on the World and Will Take Us to the Stars.** By Emma Chapman. Explains the natural and artificial light that affects life on Earth and elsewhere. These analogues help the reader comprehend what is sometimes difficult to visualize as we try to imagine what it is like to “be there” on Titan. 196 pages. Harvard. Pub. at $29.95  **$27.95**

**4346283 ROCKET BARNS & MISSILES OF VANDENBERG AFB.** By Joe P. Page II. Over the decades, Vandenberg has seen over 1,900 launches of more than 70 varieties of rockets and missiles. This collection of vintage photos and short histories trace the history of rocket/missile, launchpad location, and payload. Many never-before-seen photographs illustrate the story of space launch vehicles. 192 pages. Schiffer. 8½ x 11. **$33.95**
**Chemistry & Physics**

- **3834586 THE LITTLE BOOK OF STRING THEORY.** By Steven S. Gubser. Offers a short, accessible, and entertaining introduction to one of the most talked-about areas of physics today. String theory has been called the “theory of everything.” It seeks to describe all the fundamental forces of nature. Illus. 174 pages. Princeton. Pub. at $19.95
  - **$15.95**

- **4668860 ORIGINS OF THE UNIVERSE: The Cosmic Microwave Background and the Search for Quantum Gravity.** By Marisa Roncaglia and Andrzej R. Liddle. Together with other discoveries, the cosmic microwave background has enabled scientists to put together a remarkably detailed picture of what it was like after the Big Bang. But there remains a missing piece of the puzzle—a quantum theory of gravity. 165 pages. Icon. Paperbound. Pub. at $14.95
  - **$11.95**

- **4665179 REACTIONS: An Illustrated Exploration of Chemistry, Molecules, and Change in the Universe.** By Theodore Gray, photos by N. Mann. A never before seen photographic voyage to discover the periodic table from the periodic table, which demonstrates how molecules interact in ways that are essential to our very existence. 216 pages. Black Dog & Leventhal. 10x10. Paperbound. Pub. at $19.95
  - **$14.95**

- **3822633 THE PHYSICS BEHIND: Discover the Physics of Everyday Life.** By Russ Swan. Discover more about the science that makes your world go round, including everyday technology, molecules and the amazing physics in nature, incredible engineering and the science behind the things you would never have thought of before. Well illus. in color. 192 pages. Firefly. Paperbound. Pub. at $24.95
  - **$7.95**

- **3680492 REACTIONS: An Illustrated Exploration of Elements, Molecules, and Change in the Universe.** By Theodore Gray. Blending popular culture with his beloved storytelling with the stunning photography of Nick Mann, this volume demonstrates how molecules combine to create the universe. 240 pages. Black Dog & Leventhal. 10x10½x1¾. Pub. at $21.95
  - **$16.95**

  - **$14.95**

- **4757343 GENESIS: The Story of How Everything Began.** By Guido Tonelli. Reveals the extraordinary story of our genome—from the origins of the universe, to the emergence of life on Earth, to the birth of human language with its power to describe the world. Tonelli both explains the foundational physics of our universe and marvels at the profound wonder of our existence. 224 pages. FSG Pub. at $26.00
  - **$15.95**

- **3958403 THE DOOMSDAY CALCULATION.** By William Poundstone. Tells how Silicon Valley’s profitable formula, predicting the future, became a controversial philosophy of contemporary thought. Drawing on interviews with thought leaders around the globe, this work focuses on a group of intellectual mavericks who are challenging what we think we know about our place in the universe. Brown. Paperbound. Pub. at $18.99
  - **$13.95**

- **4751744 CHEMISTRY FOR BREAKFAST: The Amazing Science of Everyday Life.** By Mai Thi Nguyen-Kim. Over the course of a single day, the author shows us that science is everywhere, we just have to look for it. In the morning, her partner’s much too loud alarm prompts a deep dive into biological clocks and light or flight responses to coffee, with a side of heat states of matter, and so on throughout the day. Drawings. 237 pages. Greystone. Pub. at $26.95
  - **$19.95**

  - **$21.95**

  - **$12.95**

  - **$15.95**

- **2942748 EINSTEIN’S UNFINISHED REVOLUTION: The Search for What Lies Beyond the Quantum.** By Lee Smolin. 322 pages. Penguin. Pub. at $28.00
  - **$17.95**

- **389200X THE ELEMENTS BIBLE: The Definitive Guide to the Periodic Table.** By Rebecca Milham. Fully illus., most in color. 320 pages. Firefly. Paperbound. Pub. at $19.95
  - **$14.95**

  - **$7.95**

  - **$9.55**

  - **$18.95**

- **4740603 THE SHALLOWS: What the Internet Is Doing to Our Brains.** By Nicholas Carr. Building on the insights of thinkers from Plato to McLuhan, Carr makes a convincing case that every information technology carries an ethically significant look at one of the most important developments in our time. 262 pages. Viking. Pub. at $27.00
  - **$15.95**

- **4681479 A HUMAN’S GUIDE TO MACHINE INTELLIGENCE: How Algorithms Are Shaping Our Lives and How We Can Stay In Control.** By Karlk Hosanagar. A Wharton professor examines how algorithms and artificial intelligence are starting to run every aspect of our lives, and how we can shape the way they impact us. An entertaining and accessible map of the most important developments in our time. 262 pages. Viking. Pub. at $27.00
  - **$15.95**

- **4574628 THINKING MACHINES: The Quest for Artificial Intelligence and Where It’s Taking Us Next.** By Luke Dormehl. Takes the reader through the history of AI and reveals the role it plays in our everyday lives. Dormehl offers a glimpse of the incredible future that’s much closer than many would imagine and invites you to marvel at the commonplace and re-imagine what it means to be human in the face of accelerating machine intelligence. 276 pages. Penguin. Paperbound. Pub. at $16.00
  - **$4.95**

- **4680111 THE RIGHT SIDE OF HISTORY.** By Robert Griffin. Shapiro upturns more than 3,500 years, dozens of philosophers, and the thickest of modern politics to show how our freedoms are built upon the twin notions that every human being is made in God’s image and that human beings were created with reason that is capable of exploring God’s world. 256 pages. Broadside. Paperbound. Pub. at $17.99
  - **$9.95**

- **3857514 ALIENATED AMERICA: Why Some Places Thrive While Others Collapse.** By Timothy F. Carney. Traveling across all corners of America, Carney confirms the conservative suspicion that communities cannot be fixed with job-training or more entitlement spending, and backs up the liberal belief that new Trump voters are not coming to his rallies to support corporate tax cuts or Obamacare repeal. presents a framework for leading us out of the trap. 348 pages. Harper. Pub. at $27.99

PHILOSOPHICAL ESSAYS

4680510 INTRODUCING TIME. By C. C. Calleman & R. Edney. Tackles the question: What is time? and dares to go where the 5th-century philosopher St. Augustine would not. The authors trace the history of the concept from Aristotle and the ancient Greeks through Einstein's work and the conventional time of Poincare, Einstein's static time, and then to the idea that there is no time in quantum gravity. Well illus. 172 pages. Icon. Paperback. Pub. at $9.95.

3938066 50 PHILOSOPHY IDEAS YOU REALLY NEED TO KNOW. By Ben Dupre. 208 pages. Quercus. 

4851359 THE WAY OF BACH: Three Ways the Music and the Piano. By Dan Moller. By turns witty and thought provoking, Moller infuses this title with insights into music, culture and philosophy alike that will inspire us to not just ask the bigger questions, but to immerse ourselves in what we’re truly passionate about. 210 pages. Prometheus. Paperback. Pub. at $27.95. 

4791573 PROBABLE ABILITIES: Musings on Beginnings and Endings. By Alan Lightman. A collection of meditative essays on the possibilities and impossibilities of nothingness and the gift of a moment of grace that believe have the most to offer to us today. Illus., in some color. 476 pages. The School of Life. Pub. at $29.99. 

3974490 THE VIRUS IN THE AGE OF MADNESS. By Bernard-Henry Levy. With medical mysteries, rising death tolls, and conspiracy theories beamed minute by minute through the vast web universe, the coronavirus pandemic has irreversibly altered societies around the globe. In this timely work, Levy interrogates the many meanings and metaphors we have assigned to the pandemic, and what they tell us about ourselves. 106 pages. Yale. Paperback. Pub. at $17.95.

4754026 THINK AGAIN: Contrarian Reflections on Life, Culture, Politics, Religion, Law, and Education. By Stanley Fish. Brief and accessible yet challenging, these essays teach you not to think but how to think more clearly, and provide all the powerful intellectual, cultural, and political analysis one expects from Fish, one of America's most influential thinkers. 427 pages. Princeton. $19.95.

2900031 IN PRAISE OF IDLENESS. By Bertrand Russell. In this celebrated essay, Russell champions the seemingly incongruous notion that realizing our full potential, and thus enjoying the greatest possible freedom and happiness, is accomplished by working harder or smarter, but through harnessing the extraordinary power of idleness. Illus. 176 pages. St. Martin's. Paperback. Pub. at $17.99.

4719573 PROBABLE ABILITIES: Musings on Beginnings and Endings. By Alan Lightman. A collection of meditative essays on the possibilities and impossibilities of nothingness and the gift of a moment of grace that believe have the most to offer to us today. 4791573 PROBABLE ABILITIES: Musings on Beginnings and Endings. By Alan Lightman. A collection of meditative essays on the possibilities and impossibilities of nothingness and the gift of a moment of grace that believe have the most to offer to us today. Illus., in some color. 476 pages. The School of Life. Pub. at $29.99. 

4791573 PROBABLE ABILITIES: Musings on Beginnings and Endings. By Alan Lightman. A collection of meditative essays on the possibilities and impossibilities of nothingness and the gift of a moment of grace that believe have the most to offer to us today. Illus., in some color. 476 pages. The School of Life. Pub. at $29.99. 

440082X THINK LIKE A PHILOSOPHER. By Anne Rooney. A fun introduction to the subject that shows how philosophy has a clear practical purpose vital to our daily lives and thinking. 224 pages. Arcturus. Paperback. Pub. at $9.99.

3855702 PHILOSOPHY: How the World Works. By Anne Rooney. Traces strands of thought in Western philosophy, from the Ancients through the present, accessible, fascinating account of the major preoccupations of the world's greatest thinkers, it explores the five branches of philosophy, metaphysics, aesthetics, ethics, logic, and ethics. Well illus., many in color. 208 pages. Arcturus. Paperback. Pub. at $14.99.

468582X WHO SAYS YOU'RE DEAD? Medical & Ethical Dilemmas for the Curriculum & Autopsy. By Andrew Apple. In short engaging scenarios, Dr. Apple takes on issues that many of us will confront: genetic screening, sexuality, privacy, and doctor patient confidentiality. He explores each hypothetical situation with a brief reflection drawing from science, philosophy, and history, explaining how others have approached these controversies in real world cases. 227 pages. Algonquin. Pub. at $23.95.
Lives & Works of Philosophers

3950689 DAVID HUME ON MORALS, POLITICS, AND SOCIETY. Ed. by A. Crocevy & A. Vickers. In the Scottish Enlightenment, David Hume was a major influence on thinkers ranging from Kant and Schopenhauer to Einstein and Popper, and his writings continue to be relevant today. Included here are four essays exploring Hume’s complex intellectual legacy.

3956895 THE GROWTH DELUSION: Wealth, Poverty, and the Well-Being of Nations. By David Pilling. The author dives into the biases and fallacies of our fixation on economic growth, and explores the alternatives to GDP, from measure of wealth, inequality, quality of life, and the pursuit of subjective well being. This account offers insights into how our society can respond to the real need of people instead of pursuing growth at any cost. 291 pages. Tim Duggan Books. Pub. at $12.99.

3949036 GIVE PEOPLE MONEY: How a Universal Basic Income Would End Poverty, Revolutionize Work, and Remake the World. By Annie Lowrey. Imagine if the government deposited $1 (or other value) into every American’s account every month. Lowrey reports a global look at universal basic income, a stipend given to every citizen, and why it might be necessary in an age of rising inequality and automation. 263 pages. Crown. Pub. at $26.00.

488043X ECONOMYTHS: 11 Ways Economics Gets It Wrong. By David Orrell. Underpins the basic tenets of economic thought and the way most economists think is based on ten key “economics myths” such as free competition, rational behavior, stability, and external growth—and how these myths lead paradoxically to their opposite: inequality, an irrational economy, and fiscal instability. 383 pages. MIT Press. Pub. at $19.95.

6055811 UTOPIA FOR REALISTS: How We Can Build the Ideal World. By Rutger Bregman. This guide provides a systematic, three-step approach to making the world a better place, helping readers to imagine, design, and build their own utopian futures. 468 pages. Metropolitan. Pub. at $26.00.

6056111 CONFIDENCE GAMES: How the Rich Dodge Taxes and How to Make Them Pay. By E. Saez & G. Zucman. A laser-sharp analysis of one of the great political and intellectual failures of our time. Here, the authors propose a vivid and disturbing account, and use of a reinvention of taxes, outlining reams that can allow tax justice to triumph in today’s globalized world and democracy to prevail over concentrated wealth. 323 pages. MIT Press. Pub. at $22.95.

4747418 MONEYLAND: The Inside Story of the Crooks and Kleptocrats Who Rule the World. By Timothy Garton Ash. Gorton Ash takes us inside the secret cozy world of central bankers, who control the world’s money. The world’s central bank leaders meet their awful children, and find out how heroic activists around the world are fighting back. 296 pages. St. Martin’s. Pub. at $27.95.

4708152 THE THEFT OF A DECADE: How the Baby Boomers Stole the Millennials’ Economic Future. By James K. Galbraith & M.C. Elkind. The author explains what Baby Boomers have done to Millennials since 2008 when they stole their children’s economic futures right out from under them. The book is filled with attacks on good jobs, labor under student loans, see their dreams of homeownership fade, and will inherit a bankrupt government. An entire generation’s future has been stolen. 276 pages. PublicAffairs. Pub. at $28.00.

3911861 THE THEFT OF A DECADE: How the Baby Boomers Stole the Millennials’ Economic Future. By James K. Galbraith & M.C. Elkind. 4702577 CAN DEMOCRACY SURVIVE CAPITALISM? By Robert Kuttner. Argues that neither trade nor immigration nor technological change is responsible for the harm to workers’ prospects. Kuttner’s message is that capitalism is to blame. By limiting workers’ rights, liberating bankers, allowing corporations to evade taxation, and preventing nations from ensuring economic security, raw capitalism strikes the body politic afoul of democracy. 360 pages. Norton. Pub. at $27.95.

4702557 PEOPLE, POWER, AND PROFITS: Progressive Capitalism for an Age of Discontent. By Joseph E. Stiglitz. The world has changed dramatically since 1980. In recent years, the deceptions that have long hobbled us as a country. Kuttner’s brilliant exploration of modern monetary theory (MMT) dramatically changes our understanding of how we can best deal with crucial issues ranging from poverty and inequality to creating jobs and fighting pandemics. 329 pages. PublicAffairs. Pub. at $18.99.

★ 4696336 THE AMAZON JUNGLE: The Truth About Amazon. By J.R. Boyce & R. Cesarri. Shares the insider secrets to building a brand both on and off Amazon. The marketing landscape has changed, and Amazon Third-Party Sellers do not need to waste time nor money by going it alone. Throughout, the authors share their proven plan for success on and off Amazon. The marketing strategies being used today. Illus. in color. 175 pages. Morgan James. Paperbound. Pub. at $19.95 $14.95

4749715 TEMP: How American Work, American Business, and the American Dream are Disappearing. By Louis Hyman. Explains one of America’s most immediate crises and offers concrete ideas for restoring balance between prosperity and stability. Unites the issues of inequality and political equality in our country, and neither is the rest of the gig economy. The answer goes deeper than apps, and contests the most essential assumptions that we have about how we work. 386 pages. Viking. Pub. at $28.00 $5.95

4701577 LEADING WITH GRATITUDE: Eight Leadership Practices for Extraordinary Business Results. By A. Gostick & C. Elton. Introduces eight simple ways that managers can add significant value. The authors supplement their insights and practical advice with stories of how many of today’s most successful CEOs creatively incorporated gratitude into their leadership styles. 248 pages. Harper. Pub. at $29.99 $7.95
### Mathematics

**3953165 THE CIRCLE: A Mathematical Exploration Beyond the Line.** By A.S. Posamentier & R. Geretschler. Describes in layperson’s terms the many intriguing properties of this fundamental shape. If math has intimidated you in the past, this book is ideal to help you appreciate the discipline through one of its most important elements—the circle. Well illus. 349 pages. Prometheus. Paperbound. Pub. at $12.95

**3948072 SIGNIFICANT FIGURES: The Lives and Work of Great Mathematicians.** By Ian Stewart. The author introduces the visionsaries of mathematics throughout history. Delving into the lives of twenty-five pioneering mathematicians, Stewart examines the roles they played in creating, inventing, and discovering the mathematics we use today. This volume will educate and delight aspiring mathematicians and experts alike. Photos. 303 pages. Basic. Pub. at $19.95

**3940827 PROBLEM SOLVED! The Great Breakthroughs in Mathematics.** By Robert Snedden. From the earliest numbers carved onto bones to the discovery of quantum mechanics and the many intriguing theories and discoveries into one concise volume. Each page contains a discrete “cheat sheet,” which tells you the most important facts in bite-sized chunks, making it easy to understand and remember. 415 pages. Quercus. Paperbound. Pub. at $12.95

### Problem Solving

**4675445 INSTANT MATH PROBLEMS:** Key Thinkers, Theories, Discoveries, and Concepts Explained on a Single Page. By P. Parsons & G. Dixon. Pulls together all the pivotal mathematical theories and discoveries into one concise volume. Each page presents straightforward concepts, and no prior mathematical knowledge is required. For advanced math fans, the mathematical derivations are included in the appendices. Whether you’re new to mathematics or already a curious math enthusiast, this volume. Each page contains a discrete “cheat sheet,” which tells you the most important facts in bite-sized chunks, making it easy to understand and remember. 165 pages. Prometheus. Paperbound. Pub. at $19.95

**3997556 NUMBERS IN MINUTES.** By Julia Collins. Take a tour through 200 important fascinating and unusual numbers. This is an easy and entertaining way to grasp mathematics and to demystify the maths surrounding the key numbers. Every number is explained in a few manageable chunks, with a helpful picture, making the maths simple to understand and remember. 415 pages. Quercus. Paperbound. Pub. at $12.95

### The Joy of Mathematics

**3910248 THE JOY OF GEOMETRY.** By Alfred S. Posamentier. This discussion will awaken readers to the appeal of geometry by placing the focus squarely on geometry’s visually compelling features and intrinsic elegance. Readers will take the elegant terraces of Versailles to the broad avenues of Washington D.C., and the boulevards of New Delhi and Manila, and the many intriguing theories and discoveries into one concise volume. Each page contains a discrete “cheat sheet,” which tells you the most important facts in bite-sized chunks, making it easy to understand and remember. 415 pages. Quercus. Paperbound. Pub. at $12.95

**4677414ido the Mathematics Live! COMPANION: Masterpieces for Everyone. By Edward Scheinerman. Demonstrates that mathematics not only can be entertaining in and of itself, but it can also provide insights into everyday life. This book invites you to explore the many intriguing theories and discoveries into one concise volume. Each page contains a discrete “cheat sheet,” which tells you the most important facts in bite-sized chunks, making it easy to understand and remember. 415 pages. Quercus. Paperbound. Pub. at $12.95

**3972755 THE ART OF LOGIC IN AN ILLLOGICAL WORLD.** By Eugenia Cheng. For centuries mathematicians have been honing the techniques of logic, a crucial tool for thinking about our world. But logic alone isn’t enough; we humans need emotions too. By using the two side by side, we can think more clearly, communicate more effectively, and achieve a deeper and more compassionate understanding of the world. 304 pages. Basic. Pub. at $16.99

**3992548 THE MASTER BOOK OF MATHEMATICAL RECREATIONS.** By Fred Schuh. An English translation of Wonderschüttler Problemabenteuer: Ein Streifenbuch mit 150 Problemen 1. Auflage originally published in 1943. Offers fun-filled insights into many fields of mathematics. The brainteasers include original puzzles, mathematical recreations, and brand-new puzzles that are certain to test the negative and positive influences that charts have on our perception of truths. Demystifying an abstract subject, the book uses a data driven world. This book examines contemporary examples ranging from election result infographics to global GDP maps and box office record charts. 430 pages. Dover. Paperbound. Pub. at $19.95

**4747699 HOW CHARTS LIE: Getting Smart about Numbers. By Shlomo Benartzi & Howard Raiffa. A leading data visualization expert explores the negative and positive influences that charts have on our perception of truths. Demystifying an abstract subject, the book uses a data driven world. This book examines contemporary examples ranging from election result infographics to global GDP maps and box office record charts. 430 pages. Dover. Paperbound. Pub. at $19.95
Mathematics

3828212 A SCHEME OF HEAVEN: The History of Astrology and the Search for our Destiny in the Stars. By John Gribbin. A scientist examines classical texts on astrology to expose its underlying scientific and mathematical framework. Astrology, he shows, is an ancient and most ambitious applied mathematics problem, sustained by some of history’s most brilliant minds, from Ptolemy to Al-Kindi to Kepler. Illus., some in color. 318 pages. Norton. Pub. at $28.95 $21.95

3795209 PLUTES AND MINUSES: How Math Solves Our Problems. By Stan Buijsman. Taking readers on a journey around the world to visit societies that have developed entirely different conceptions of math, and through history to learn the unexpected origins of the different disciplines of mathematics, Buijsman shows the vital importance of math and how a better understanding of it will give us a better understanding of the world as a whole. 199 pages. Penguin. Pub. at $17.00 $12.95

4753518 HOW LONG IS A PIECE OF STRING? By R. Eastaway & J. Wyndham. The perfect volume for anyone curious about the way in which math underlies so much in our everyday lives. Whether your mathematical ability, you will find this resource informative, thought-provoking and fun. 224 pages. Portico. Pub. at $17.95 $13.95

Science Essays & Surveys

4667379 IS THE UNIVERSE A HOLON? Scientists Answer the Most Provocative Questions. By Adolfo Plascencia. Science today is more a process of collaboration than the development of individual “eurekas.” This volume recreates that kind of synergy by offering a series of interconnected dialogues with leading scientists who are asked to reflect on key questions and concepts about the physical world, technology, and the mind. 404 pages. MIT Press. Pub. at $9.95 $4.95

387756X THE GREAT UNKNOWN: Seven Journeys to the Frontiers of Science. By Marcus du Sautoy. Invites us to consider the problems in cosmology, quantum physics, mathematics, and neuroscience that continue to bedevil scientists and creative thinkers who are at the forefront of their fields. 450 pages. Penguin. Pub. at $14.95 $10.60

3960368 13.8: The Quest to Find the True Age of the Universe and the Theory of Everything. By John Gribbin. With his inimitable mixture of science, history, and biography, Gribbin shows how the theory of everything is both simply and surprisingly and yet deeply compatible and point to a deep truth about the nature of our existence. The answer lies with the age of the universe: 13.8 billion years, 16 pages of illus. 242 pages. Yale. Pub. at $20.00 $16.95

4754077 THE USEFULNESS OF USELESS KNOWLEDGE. By Abraham Flexner. In this essay by the founding director of the Institute for Advanced Study in Princeton, Flexner argues that the search for answers to deep questions, matters profoundly and weighty concern for applications, often leads not only to the greatest scientific discoveries but also to the most revolutionary technological breakthroughs.

3787566 DESIGN IN NATURE: How the Constructal Laws Governs Evolution in Biology, Physics, Technology, and Social Organization. By A. Bejan & J.P.Zane. Written in an easy style that achieves clarity without sacrificing complexity, this is a page-turner that will fundamentally transform our understanding of the world around us. Illus. 296 pages. Doubleday. Pub. at $16.00 $9.95

2918382 SCIENCE IN THE SOUL: Selected Writings of a Passionate Rationalist. By Bertrand Russell. This political activist, mathematician, and philosopher presents 21 essays published in the United States for the first time. 438 pages. Random. Pub. at $24.95 $15.95

3799953 THE SKEPTIC’S GUIDE TO THE UNIVERSE. By Steven Novella et al. It’s time to rethink that life is a bad idea and that the universe is fundamentally decent. This volume is your map through this maze of modern life, revealing the holes in its theories. 308 pages. Inner Traditions.

3824063 THE ORIGIN OF (ALMOST) EVERYTHING. By Graham Lawton. 312 pages. Nicholas Brealey. $19.95

Science & History

4727320 100 MOST IMPORTANT SCIENCE IDEAS: Key Concepts in Genetics, Physics and Mathematics. By Francis B. McCombs et al. Compelling, informative and thought provoking, this volume unravels the fundamental concepts at the heart of three of the most important developments in modern science with over 500 color illus. 432 pages. Firefly. Pub. at $16.95 $11.95

469157X THAT’S NOT IN MY SCIENCE BOOK: A Compilation of Little-Known Facts. By Kate Kelly. Explains in everyday language the story behind some of the most fascinating technological marvels that we take for granted and the laws of nature that serve as the foundation for life on earth. Topics include the discovery of DNA, the genes of such viruses as the avian flu, the invention of television, earthquake predictions, and more. Illus. 226 pages. Taylor. Pub. at $14.95 $9.95

2866995 THE GENESIS OF SCIENCE: How the Christian Middle Ages Launched the Scientific Revolution. By Thomas L.共享单车. If you were taught that the Middle Ages were a time of intellectual stagnation, superstition, and ignorance, you were taught a myth that has been repeated by centuries. Here, the physicist and science historian shows that without the scholarship of the “barbaric” Middle Ages, modern science would simply not exist. 454 pages. Regranery. Pub. at $29.95 $16.95

6970656 A UNIVERSE FROM NOTHING: Why There Is Something Rather Than Nothing. By Lawrence M. Krauss. Krauss reveals that modern science is addressing the question of why there is something rather than nothing, with surprising and fascinating results. A provocative, game-changing entry into the debate about the existence of God and everything that exists. Illus. 202 pages. S&S. Pub. at $16.95 $9.95

4650646 A BRIEF HISTORY OF CREATION: Science and the Search for the Challenge of Science. By Charles H. & H.J. Cleaves II. It is perhaps the most important question science has ever asked: How did life begin? This essential and illuminating book explores the evidence that science has slowly been piecing together to explain the depths of the enduring quandary, tracing the trials and triumphs of the Epic of Creation. The scientist who have sought to uncover the mystery of how life first came to be. Illus. 312 pages. Regranery. Pub. at $27.95 $19.95

4674790 SCIENTIFICA HISTORICA: How the World’s Great Science Books Chart the History of Knowledge. By Brian Clegg. Explores the development and progression not only of scientific beliefs and ideas but also language and the physical object itself. The author takes us on a bibliophilic journey through time and examines how the written word has been a catalyst or furthering our knowledge of the universe and ourselves. Well illus., many in color. 272 pages. Press. Pub. at $35.00 $11.95

4704401 FRANKENSTEIN AND THE REAL THING: The Extraordinary Life and Career of Mary Shelley. By Joy Levy. In her extraordinary tale of scientific hubris, Mary Shelley touched on the contemporary that still sparks current debates on the source of life, the supervision of consciousness and the power of technology. She explored the boundary between science and science fiction, and asks just how close are we to creating our own monsters? Illus. 207 pages. Andre Deutsch. Pub. at $29.95 $9.45

3601752 LOST SCIENCE: Astonishing Tales of Genius and Obscurity. By Anthony Ferguson. Ferguson investigates overlooked or lost stories in the history of science from the ancient world to the modern day. From “The Emperor’s New Astronomy” to “Near-Fatal Fiction,” here are tales about ten nearly forgotten yet remarkable individuals who have left an impact on science, however obscure.

3822249 QUANTUM THEORY: Great Works That Shape Our World. By M. Planck & N. Bohr. This handsomely bound blue foil-stamped volume contains the seminal works of quantum theory from the early years of the 20th century, representing breakthroughs in science that radically altered the landscape of modern knowledge. 191 pages. Pergamon. Pub. at $10.00 $6.95

4553777 THE BIG QUESTIONS IN SCIENCE: The Quest to Solve the Great Unknowns. By Hayley Birch et al. Provides you with just a small sample of the science that is still working to answer, and just a fraction of the many fascinating solutions and theories that scientists have come up with so far. Fully illus., most in color. 192 pages. Seven Oaks. Pub. at $17.95 $9.95

2918374 THE GREAT UNKNOWN: Seven Journeys to the Frontiers of Science. By Marcus du Sautoy. One of the world’s most brilliant mathematicians takes you into the minds of science’s greatest innovators as he probes the many mysteries we have yet to solve. You will be challenged to think about the very aspect of the known world, and to consider the big questions that even the most creative scientists have yet to answer definitively. Illus. 450 pages. Viking. Pub. at $30.00 $16.95

6599109 THE ANTI-GRAVITY FILES: A Compilation of Patents and Reports. Ed. by David Hatchter Childress. Includes a brief history of anti-gravity patents; machines in flight, the Tesla Pyramid engine; quantum vacuum; and advanced propulsion. Well illus., some color. 196 pages. Adventures Unlimited. Paperbound. Pub. at $22.00 $16.95

6474553 INSTANT SCIENCE: Key Things to Know About Discoveries and Inventions Explained on a Single Page. By Jennifer Couch. Pulls together all the pivotal scientific knowledge and thought into one concise and accessible package. Contains a discard cheat sheet,” which tells you the most important facts in bite-sized chunks, meaning you can become an expert in an instant. Color illus. 175 pages. Portable Press. Pub. at $17.99 $12.95
Insects

★ 386057 THE PRIVATE LIFE OF SPIDERS. By Paul Hilliard. With more than 100 different families and 40,000 individual species, spiders are among the most successful creatures on Earth. Hilliard, a spider expert, takes the reader on a fact-filled and richly illustrated tour of the lives of some of the world’s most remarkable spiders. Fully illus. in color. Paperbound. Pub. at $19.95 $15.95

★ 4895844 THE COMPLETE BEE HANDBOOK. History, Recipes, Beekeeping Basics, and More. In this comprehensive guide, spanning the past, present, and future of bees, including their evolution, their ever-critical roles as pollinators, and the ongoing threats to their survival. There is a deep cultural history of beekeeping, the numerous applications for bee products, and tips for supporting your local bee population. Color photos. 186 pages. Rodnikge Paperbound. Pub. at $16.99 $12.95

★ 6978622 KAUFMAN FIELD GUIDE TO INSECTS OF NORTH AMERICA. By E.R. Eaton & K. Kaufman. The easiest guide to use for fast identification. Features more than 2,350 color images representing every major group of insects found in North America north of Mexico. Includes a pictorial table of contents, and a wealth of information on insect behaviors. 392 pages. H/B, illus. Pub. at $18.95 $12.95

★ 2952645 DRAGONFLIES & DAMSELFLIES: A Natural History. By Dennis Paulson. A lavishly illustrated, comprehensive, and accessible natural history that reveals the beauty and diversity of one of the world’s oldest and most popular insect groups. This volume offers a complete guide to the evolution, life cycles, and behavior of dragonflies and damselflies. 224 pages. Princeton. Pub. at $29.95 $24.95

★ 3884767 SMITHSONIAN HANDBOOK OF INTERESTING INSECTS. By Gavin R. Broad et al. Drawn from the Natural History Museum, London’s entomology collection, which spans hundreds of years, more than 34% of the specimens on which these stunning images are found supports some of the most beautiful, exciting, and important pieces in the entirety of the world’s insect collection. Smithsonian. Pub. at $19.95 $14.95

★ 2952637 TALKS FROM THE ANT WORLD. By Edward O. Wilson. Illustrated with depictions of ant species as well as photos from Wilson’s expeditions throughout the world, this is a fascinating—if not hair-raising—account of our greatest scientists and a necessary reference for students of the natural world. 227 pages, Lightly. Pub. at $26.95 $19.95

★ 4747674 50 WAYS TO HELP SAVE THE BEES. By Sally Coulthard. Includes important advice and easy lifestyle tips that support our insect friends, the bees. Whether you purchase ethically honey from your local farmer stand, commit to mowing your lawn less frequently or grow bee friendly herbs, little things can make a difference. Just ask a bee! 128 pages. Countryman. Paperbound. Pub. at $16.99 $11.95

★ 3885531 A SWARM MADE TO BUTTERFLIES OF NORTH AMERICA, SECOND EDITION. By Jeffrey Glassberg. A detailed, comprehensive, and user-friendly photographic field guide to the butterflies of North America, written by the pioneering authority on the identification of butterflies. Includes updated text, maps, and species’ names, and is beautifully illustrated with more than 3,600 color photographs. 420 pages. Princeton. Paperbound. Pub. at $29.95 $24.95

★ 394042X 500 BUTTERFLIES FROM AROUND THE WORLD. By Ken Beattie. These butterflies are species, subspecies, and many varieties of butterfly from all continents, and from a wide array of climate regions. Stunning color photographs show them in their natural habitat, complement the author’s text and his personal observations. Adult butterflies and on occasion their caterpillars, are illustrated. 528 pages. Firefly. Paperbound. Pub. at $37.95 $27.95

★ 3942783 THE MOSQUITO: A Human History of Our Deadliest Predator. By Timothy C. Winegard. A dramatic new perspective on the history of humankind, showing how through millennia, the mosquito has been the single most powerful force in determining the untold saga of the mosquito’s indelible impact on our modern world. 485 pages. Dutton. Pub. at $18.00 $12.95

★ 3918750 HOW INSECTS WORK: An Illustrated Guide to the Wings and Function–from Antennae to Wings. By Marianne Taylor. Goes beyond the typical field guide to show us not only what insects look like, but how insects have an array of real-life superpowers to help them thrive in virtually every environment. Discover the ways insects are even more astounding than you know–inside and out! Well illus. in color. 224 pages. Experiment. Paperbound. Pub. at $16.95 $12.95

★ 3963306 FYLING’S ILLUSTRATED GUIDE TO NATURE IN YOUR NEIGHBORHOOD. By Marni Fyl ling. Dan Fy lining will take readers for an exciting exploration of the bugs and insects all around them. Motivated by a search for a spider, Fy lining used his backyard as a place to learn more about the bugs that were in his yard. 125 pages. Heyday. Paperbound. Pub. at $20.00 $14.95

★ 3875539 ALIENS AMONG US: Extraordinary Portraits of Ordinary Bugs. By Daniel Kuklo. Features more than sixty stunning photographs of pillbugs, silverfish, ants, and other insects depicting a hidden world found in our homes. The perfect guidebook for anyone interested in getting to know the bugs hanging around the porch light or the creepers under the couch. 154 pages. Liveright. Pub. at $29.00 $19.95

★ 3939456 MICROSCULPTURE: Portraits of Insects. By Levon Biss. The etymology collection at the Oxford Museum of Natural History contains the world’s oldest and most popular insect photographs. Here, breathtaking photographs utilize a painstaking process to highlight various segments of these marvelous creatures in microscopic detail, resulting in an artful, sumptuous, and mesmerizing look at the intricacies of bugs. Abrams. 10¾x12¼. Pub. at $40.00 $14.95

★ 2952637 CATERPILLARS OF EASTERN NORTH AMERICA. By David L. Wagner. This lavishly illustrated guide to the caterpillars of nearly 700 butterflies and moths found east of the Mississippi. Full page species accounts cover almost 400 species, with up to six images per species including an image of the adult plus concise text with information of distribution and other vital information. 12 pages. Princeton. Paperbound. Pub. at $29.95 $19.95

★ 2958562 FIELD GUIDE TO THE FLOWER FLIES OF NORTHEASTERN NORTH AMERICA. By Terry A. Underwood, illus. This is the first comprehensive guide to the flower flies of northeastern North America. With more than 3,000 color photographs and 400 maps, this comprehensive guide expertly weaves the fruits together. Each species account provides information on size, identification, abundance, and flight time along with notes on behavior, classification, and more. 512 pages. Princeton. Paperbound. Pub. at $59.95 $39.95

★ 4671252 THE INSECTS OF THE WILDERNESS. By Erica McAlister. Discover the physics of the mysterious "scuba diving fly," marvel at the venomous horse fly larvae which prey on the mysterious "scuba diving fly," marvel at the on going threats to the ir survival. Then, and fascinating introduction to the world of insects and why the planet we inhabit could not survive without them. You’ll learn that there is more variation in insects than we can imagine and the more you learn about insects the more fascinating they become. Drawings. 352 pages. S&S. Paperbound. Pub. at $26.00 $19.95

Fishing & Hunting

★ 3727811 250 AMAZING FISHING TIPS: The Best Tactics and Techniques to Catch Every Kind of Fish. By Larry Myhre. Underwood. Focusing on the most popular freshwater game fish that the seasoned angler espouses all the essential tips that he has picked up over the years. Tips on how to outsmart the fish. Techniques are applicable to rivers and streams, estuaries and inlets, bays, beaches, and offshore. Illus. 162 pages. Skyhorse. Paperbound. Pub. at $19.95 $14.95
3858170 SHOOTER'S BIBLE, 110TH EDITION. Ed. by Jay Cassell. With a timely feature on the most important products on the market, and complete with color and black and white photographs featuring various makes and models of firearms and equipment, this guide is an essential resource for every hunter, firearm collector, or gun enthusiast. 608 pages. Skyhorse. 8½x10½. $29.99

3957222 FLORIDA ENCHANTMENTS: Blue Water Classics. By A.W. & Julian A. Duval. This stunning gold-embossed collector's volume, with gilt-edge pages is a fishing-centered travelogue through the waters of Florida in its golden days. It's piece of paper most people consider an illus. 318 pages. Derrydale. Pub. at $65.00

3942276 THE TRACKER'S HANDBOOK: How to Identify and Trail Any Animal. Anywhere. By Len McDougall. Profiles of more than 20 different animals, including the new world moose, American elk, and white-tailed deer, give a complete guide to fine detail, including the habitat and range, foods, mating and seasonal habits, tracks, scat, signs, and vocalization of the animals. Well illus., many in color. 351 pages. Skyhorse. Paperbound. Pub. at $17.99

3941500 ACA'S BEGINNER'S GUIDE TO FLY CASTING: Featuring the Twelve Casts You Need to Know. By John L. Field. Whether learning to fly fish in fresh or saltwater, Field's expertise is sure to have you casting like a pro before you know it. With expert instructions accompanying diagrams and fun drills, this guide will help the next generation of flyfishers participate in this wonderful sport. 107 pages. Skyhorse. Pub. at $27.99

3787656 BUTCHERING DEER: A Complete Guide from Field to Table. By Peter J. Fiduccia. This manual starts with tips on shooting the right deer, shot placement, and preparation, and how to properly age venison. Fiduccia covers all phases of field dressing, skinning, butchering, and proper cutting. Also includes a section on the best ways to prepare and cook venison with quick and easy recipes. Well illus. in color. 246 pages. Skyhorse. Paperbound. Pub. at $16.99

3849317 SHOULD THE TENT BE BURNING LIKE THAT? A Professional Amateur's Guide to the Outdoors. By Bill Heavey. A celebration of Heavey's best columns and publications. Whatever the subject, his humorous tales are odes to the notion that enthusiasm is more important than anything else, and the enduring power of the natural world. 263 pages. Atlantic Monthly. Pub. at $25.00

3787907 SHOOTER'S BIBLE GUIDE TO CONCEALED CARRY, 2ND EDITION. By Brad Fitzpatrick. Delivers poignant points and provides valuable information with an updated and expanded firearms section, to familiarize you with firearms so you can gain the confidence you need to protect yourself in the worst of situations. Well illus. in color. 196 pages. Skyhorse. Pub. at $19.99

2960214 SURVIVAL KNIVES: How to Choose and Use the Right Blade. By James Morgan Ayres. Learn how to choose the right survival knives, and how to use the tools and weapons you can make with the knife—not only in the wilderness, but also in urban areas, foreign countries, and disaster zones such as earthquakes, floods, fires, and civil insurrections. Covers survival tools and weapons, fishing, and fire starting. Well illus. in color. 161 pages. Skyhorse. 8½x10½. Paperbound. Pub. at $14.95

3957314 FISHING THE PACIFIC: Blue Water Classics. By S. Kip Farrington, Jr. This stunning gold-embossed collector's volume, with gilt-edge pages is a collection of stories about fishing the Pacific, from witnessing a giant Pacific bluefin catching an eight foot Pacific sailfish. Illus. 297 pages. Derrydale. 8½x11¼. Paperbound. Pub. at $65.00

3954633 BIG GAME AT SEA: Blue Water Classics. By Leonard J. McCormick. This stunning gold-embossed collector's volume, with gilt-edge pages is a collection of stories from McCormick who literally lit the fire under, and beyond, the world. Illus. 307 pages. Derrydale. 8½x11¼. Paperbound. Pub. at $65.00

3957306 FISHING ROUND THE WORLD: Blue Water Classics. By L.K. Miller & K.A. Warschauer. This gold-embossed collector's volume, with gilt-edge pages is a collection of stories from McCormick who literally lit the fire under, and beyond, the world. Illus. 307 pages. Derrydale. 8½x11¼. Paperbound. Pub. at $65.00

3787877 THE POCKET HUNTING & FISHING GUIDE. Loaded with pertinent details and accurate, easy to follow advice, this is the guide all sportsmen should carry when they head outdoors. Illus. 126 pages. Skyhorse. Paperbound. Pub. at $8.95

673524X THE GREATEST HUNTING STORIES EVER TOLD. Ed. by Vin T. Sparano. A collection of true hunting tales, told by some of the most courageous and clever sportsmen, included here are the experiences of Teddy Roosevelt, Jack O’Connor, J.C. Rickhoff, Frank C. Hibben, and many more. A must-read for all who pursue the finest hunting adventures. 256 pages. Skyhorse. Paperbound. Pub. at $24.99

3920682 MAKING A RATTAN BOW. By L. Schilling & W. Witzka. This fully illustrated guide walks you through the making of seven bows designs with step by step instructions. Sections include creating the bow profile, tillering, leather grips, shaping the handle, making wood overlays for the tips, and much more. 112 pages. Schiffer. 8¼x11. Paperbound. Pub. at $9.95

392683X HANDGUN HUNTING: A Comprehensive Guide to Choosing the Right Gun and Small Game. By Kat Ainsworth. Examines all the game one can hunt in North America, from bears and deer to rabbits and coyotes, with a multitude of top guns for all species, and how to choose the habits and habitats of each game animal, recommended firearms, techniques and tactics, shot placement, game edibility, and more. Well illus. in color. 336 pages. Skyhorse. Paperbound. Pub. at $9.95

3788432 THE COMPLETE MANUAL FOR YOUNG SPORTSMEN. By Frank Forester. Originally published in 1865, this manual is every young man’s (or young woman’s) guide to everything outdoors. With original illustrations and step by step instructions, even young learners can learn to be an outdoorsman. 388 pages. Clydesdale. Paperbound. Pub. at $14.99

3910304 THE BUCKS CAMP LOG, 1916-1928: The Wisconsin Deer Camp Diary. Ed. by Marjorie Williams. Here are the last days of the Wisconsin wilderness hunting tradition. The Camp Log is a captivating word picture offering exciting hunting adventures, tragedy, rare humor, woodsmanship, philosophical reflections, and historical sidelights, that constituted our American hunting heritage. Illus. 128 pages. Willow Creek. Paperbound. Pub. at $12.95

4685008 ADVANCED CUSTOM ROD BUILDING. By Dale F. Climenhaga. Explains all the techniques necessary for making a rod that is superior to anything off the rack, and provides all the instruction necessary for the custom builder who wants to build the perfect rod. Well illus. in color. 332 pages. Skyhorse. Paperbound. Pub. at $15.99

3818482 OUTDOOR LIFE THE ULTIMATE SHOOTING SKILLS MANUAL. By John B. Snow with Christian. Whether you're shooting whether it's a tricked-out MSR, a tight 1911, or a custom skeet gun, the experts at Outdoor Life have the know-how you need to take your skills to the next level. Well illus. in color. Weldon Owen. Paperbound. Pub. at $17.99

3955915 THE TROUT BOOK: A Complete Anglers Guide Book. Ed. by Frank Sargent. CompanionHouse. Paperback. Pub. at $14.95 11.95
**3995165 MRS MOREAU’S WARBLER: How Birds Got Their Names.** By Stephen Moss. The words we use to name birds are some of the most lyrical and evocative in the English language. They also tell incredible stories: of epic expeditions, fierce battles between rival ornithologists, and more. This historical events and touching romantic gestures. Moss shows how these names reveal as much about ourselves as about the creatures they describe. 358 pages. Faber & Faber. Paperbound. Pub. at $12.95. $9.95

**4701876 A WORLD ON THE WING: The Global Odyssey of Migratory Birds.** By Scott Rashid. For the past two decades our understanding of the navigational and physiological feats that enable birds to cross immense oceans, fly above the highest mountains, or remain in unknown parts of the world for months at a single stretch has exploded. This is an exhilarating exploration of the science and wonder of global bird migration. 16 pages of color photos. 385 pages. Norton. Pub. at $29.95. $21.95

**3934469 THE CROSSELY ID GUIDE: EASTERN BIRDS.** By Dominic Couzens. This stunningly illustrated reference from the acclaimed photographer revolutionizes birding by providing the first realistic approach to birding and showcases how to use the tools of the 21st century to appreciate the natural world we inhabit together. Illus. 303 pages. National Geographic. Pub. at $28.00. $9.95

**4696516 HOW TO KNOW THE BIRDS. By Ted Floyd.** A celebrated naturalist, Floyd guides you through a year of becoming a better birder. Featuring 200 top avian species to the habits and habitat of the species, from the Saw-billed Hermit to the forty of the most beautiful and interesting birds who winter, breed, or migrate through the Midwest and whose populations are most in danger of disappearing from the region. Williams combines an action to protect these vulnerable creatures that enlivens our collective. Fully Illus. in color, 216 pages. InUP. 8¼x10¼. Pub. at $29.00. $21.95

**3927124 TOP 100 BIRDING SITES OF THE UNITED STATES.** By Dominic Couzens. A showcase of the very best birdwatching sites and experiences on the planet, including spectacular events such as huge flocks of wintering geese in Greece and the RSPB, a showcase of the very best birdwatching sites and experiences on the planet, including spectacular events such as huge flocks of wintering geese in Greece and the RSPB, a showcase of the very best birdwatching sites and experiences on the planet, including spectacular events such as huge flocks of wintering geese in Greece and the RSPB, a showcase of the very best birdwatching sites and experiences on the planet, including spectacular events such as huge flocks of wintering geese in Greece and the RSPB, a showcase of the very best birdwatching sites and experiences on the planet, including spectacular events such as huge flocks of wintering geese in Greece and the RSPB, a showcase of the very best birdwatching sites and experiences on the planet, including spectacular events such as huge flocks of wintering geese in Greece and the RSPB, a showcase of the very best birdwatching sites and experiences on the planet, including spectacular events such as huge flocks of wintering geese in Greece and the RSPB, a showcase of the very best birdwatching sites and experiences on the planet, including spectacular events such as huge flocks of wintering geese in Greece. 336 pages. Batsford. Pub. at $27.95. $21.95

**4702989 ATLAS OF RARE BIRDS. By Dominic Couzens.** Offers an illustrated guide to some of the rarest birds in existence, with maps that show where to find them. An accessible, readable, and visually appealing take on the subject of threatened and Endangered birds. It also promises to make new birders of many people who have despaired of using traditional guides. 530 pages. Princeton. Paperbound. Pub. at $35.00. $27.95

**4755805 A MOST REMARKABLE CREATURE: The Hidden Life and Epic Journey of the World’s Smartest Birds of Prey.** By Jonathan Melville. Take an enthralling modern voyage of discovery in search of the captivating black kite with the astonishing wings of a hawk, the fascinating and modern-day falcons, and the secret of our planet’s deep past in their family history. 16 pages of color photos. 366 pages. Knopf. Pub. at $30.00. $21.95

More Works on Nature

4753992 STILL WATERS: THE Secret World of Lakes. By Curt Stager. Introduces us to the secret worlds hidden beneath the surfaces of our most remarkable lakes, leading us on a journey from the pristine waters of the Adirondack Mountains to the wields of Siberia, from Thoreaus’s cherished pond to the Sea of Galilee. Stager reminds us how enchanting, complex, and vulnerable our lakes are, and how more than ever, it is essential to protect them. Illus. 241 pages. Norton. Paperbound. Pub. at $26.95 $6.95

LIMITED QUANTITY 4729880 ULTIMATE WILDERNESS GEAR: Everything You Need to Know to Choose & Use the Best Outdoor Equipment. By Craig Caulfield. Takes you to the cutting edge of outdoor gear and reveals which items will perform the best in the field without breaking the bank. Learn what you need, why you need it and how to care for it. Well illus. in color. 224 pages. Page Street. Paperbound. Pub. at $22.99 $4.95

SOLD OUT 3828832 THE WEATHER DETECTIVE: Rediscovering Nature’s Secret Signs. By Peter Wohlleben. Full of the very latest discoveries combined with ancient and now forgotten lore, Wohlleben helps you read nature’s secret signs and discover a new rich layer of meaning in the natural world around you. While teaching you the hidden significance in everything from wind and your garden soil to the pull of the moon. 195 pages. Dutton. Pub. at $20.00 $4.95

4754069 UNNATURAL SELECTION. By Katrina van Grouw. Suitable for the lay reader and student, as well as the more seasoned biologist, featuring more than four hundred breathtaking illustrations of living animals, skeletons, and historical specimens, this resource will bring anyone with an interest in natural history and the history of evolutionary thinking. 284 pages. Princeton. 10¾x12¼. Pub. at $45.00 $16.95

★ 4650948 OUTDOOR LIFE HUNTING & GATHERING SURVIVAL MANUAL. By T. MacWelch & E. the ed. Outdoor Life. Whether your goal is a few interesting meals or total food self-sufficiency, this guide has what you need: how to harvest rabbit from a field, how to fish for food; how to hunt and fish in the wild, and how to be a survivor. Well illus. in color. Weldon Owen. Paperbound. Pub. at $16.99 $12.95

3783081 AMBER: The Natural Time Capsule. By Andrew Ross. Provides an engaging overview of this precious substance and its fossilized inclusions. Ross explains how amber is formed, where it is found, and how to distinguish genuine amber from fakes. He also describes its uses in both art and science, while showcasing a range of specimens. Fully illus. in color. 112 pages. Firefly. Paperbound. Pub. at $19.95 $3.95

★ 4702862 WEATHER BY THE NUMBERS: The Genesis of Modern Meteorology. By Kristine C. Harper. Tells the story of the transformation of meteorology from a “guessing science” into a sophisticated scientific discipline based on physics and mathematics. After WW II, the combined strength of an expanded observation network developed for military purposes and the nascent digital computer created a new way of approaching atmospheric theory. Illus. 308 pages. Prentice-Hall. Paperbound. Pub. at $25.00 $5.95

★ 3803678 MOMENT OF IMPACT: NATURE. New camera technologies and cutting edge animations reveal the inside story of animal bioengineering that allow some of nature’s secrets to be examined and “fractured” into their unique parts. This program examines two examples: Hunters & Heids & Jungle. 110 minutes. Questar. Pub. at $19.99 $3.95

3867033 THOREAU’S WILDFLOWERS. By Henry David Thoreau. A beautiful collection of Thoreau’s favorite book of Concord, with more than 200 drawings by renowned artist Barry Moser. 300 pages. Yale. Pub. at $30.00 $6.95

3893170 THE BIG ONES: How Natural Disasters Have Shaped Us (and What We Can Do About Them). By Lucy Jones. With the population growing in hazardous regions and temperatures rising around the world, the impacts of natural disasters are greater than ever before. Jones offers a look at our past, readying us to face down the Big Ones in our future. Illus. & maps. 242 pages. Doubleday. Pub. at $26.95 $5.95

★ 4674410 HOW TO FIGHT A BEAR…AND WIN. Ed. by JonAr Padgett et al. The only survival guide that will show you how to stay alive and thrive in the woods, the jungle, the arctic, and even prison—with style! Illus. 255 pages. Portable Press. Paperbound. Pub. at $12.99 $9.95

★ 6877974 ROCKS & MINERALS OF THE UNITED STATES QUICK GUIDE. By Dan R. & Bob Lynch. Organized by rocks/minerals, then by age, this quick and easy identification. Simple and convenient in a pocket sized format. Well illus. in color. Adventure Publications. Spiralbound. Pub. at $9.95 $7.95

★ 3838293 30-SECOND WEATHER. Ed. by Adam A. Scala. Features 50 of the most significant events and phenomena to shower down from the skies, all explained using just 300 words and one picture. Fully illus. in color. 160 pages. Ivy Press. Paperbound. Pub. at $12.99 $4.95

★ 3854396 ERIC SLOANE’S WEATHER BOOK. Artistic Eric Sloane, in simple language, explains the whys and wherefores of weather and climate, providing all the essential information you need, why you need it and how to stay alive and thrive in the woods, the jungle, the arctic, and even prison— with style! Illus. 320 pages. Artisan. Paperbound. Pub. at $24.95 $6.95

★ 4547942 PETERSON FIELD GUIDE TO MEDICINAL PLANTS AND HERBS OF EASTERN AND CENTRAL NORTH AMERICA. THIRD EDITION. By S. Foster & J.A. Duke. Presents a clear and concise text identifying the key traits, habitats, uses, and warnings for 530 of the most significant medicinal plants in the Northeast, Midwest, and Southeast. Illus. 256 pages. Houghton Mifflin. Paperbound. Pub. at $24.00 $14.95

DVD 380142X WADDLERS & PADDLERS: NATURE. Two episodes from the award winning PBS series, NATURE: The World of Penguins examines the world of these flightless birds who have adapted themselves from the bitter cold of the Antarctic to the scorching heat of the equator. A Sea Otter Story follows a group at California’s Monterey Bay Aquarium trying to recover other ocean life that survived in the wild and is in dire need of help. 71 minutes. Nat. Geo. Paperbound. Pub. at $25.00 $17.95

3870548 SURVIVING MASS VICTIM ATTACKS. By Gary M. Jackson. Presents specific and valuable strategies for survival if the unthinkable happens and serves as a practical guide to collectible fossiles, and more knowledgeable and better prepared if caught in an attack themselves, 213 pages. Rowman & Littlefield. Paperbound. Pub. at $22.00 $6.95

3858998 SURVIVING THE APOCALYPSE. By N.E. MacDougall, Armageddon could arrive at any moment with the practical information given in this resource you'll be well prepared and well trained enough to survive any disaster, even the end of the world as we know it. Illus. 193 pages. Skyhorse. Paperbound. Pub. at $14.95 $5.95

3897301 SNOW: A Scientific and Cultural Exploration. By Giles Wemmler. Embark on an extraordinary journey across centuries and continents to discover the wonders of the miraculous, mercurial substance called snow. Through photos, sketches, bear polar bear evolution, and much more, this volume celebrates the wonders we can find by gazing up into the sky. 246 pages. Illus. 35 dollars.

3895750 COLLECTOR’S GUIDE TO THE VESUVIANITE GROUP. By Robert J. Lauf. Among rock-forming minerals, the vesuvianite group is best known through the many colorful crystals collected at the Jefferson Lake, Colorado, Canada, along with spectacular finds in China and Pakistan. The detailed text begins with an explanation of the chemistry and taxonomy of the group and a discussion of ongoing research. Illus. in color. 93 pages. Schiffer. 8¾x11. Paperbound. Pub. at $19.99 $6.95

3895734 COLLECTOR’S GUIDE TO THE EPIDOTE GROUP. By Robert J. Lauf. This concise monograph provides a timely guide to the minerals of the epidote group, including recent changes in the nomenclature and indepth information on all presently known species. Text includes an introduction, an explanation of the chemistry and taxonomy of the group, the formation and geochemistry, and a detailed entry for each mineral. Fully illus. in color. 96 pages. Schiffer. 8¾x11. Paperbound. Pub. at $19.99 $9.95

4653366 THE ILLUSTRATED GUIDE TO FOSSILS & FOSSIL COLLECTING. By Steve Parker. A beautifully illustrated guide to finding, classifying, dating and understanding fossils, from the earliest fossils to dinosaur species. Illus. 256 pages. Little, Brown. Paperbound. Pub. at $29.00 $14.95

3896250 THE STORY OF A FOREST Ecosystem. By R.T. Holmes & G.E. Likens. Since the early 1960s, the Hubbard Brook Experimental Forest in the White Mountains of New Hampshire has been one of the most comprehensively studied landscapes on earth. This volume highlights many of the important ecological findings amassed during the long-term research at this site and considers their regional, national, and global implications. Illus. in color. 271 pages. Yale. 10¾x13¾. Pub. at $45.00 $9.95

3898625 MESOZOIC FOSSILS II: The Cretaceous Period. By Bruce L. Shjonberg. Color photographs and engaging text reveals fossils of the Cretaceous Period, and include fossils of Mesozoic species, as well as the ammonites, belemnites, dinosaur tracks, mosasaurs, and many other treasures. Illus. in color. 204 pages. Prentice-Hall. Paperbound. Pub. at $27.99 $9.95
More Works on Nature

★ 461091 THE 50 STATE GEMS & MINERALS: A Guidebook for Geologists. By Yinan Wang. Most states have official designated gems and minerals. This guidebook showcases these marvels, from Alabama's star blue quartz to Wyoming's jade, and everything in between. Each state entry contains details about the state gem and mineral and potential candidates are suggested for states that do not have official state gems. Fully illus. in color. Schiffer. Pub. at $18.99 $11.95.

★ 374170 VICTORINOX SWISS ARMY KNIFE CAMPING & OUTDOOR SURVIVAL GUIDE. By Bryan Lynch. This handy guide provides 500 tips for using the Swiss Army Knife to handle 101 different bushcraft needs and situations. From starting a fire and making a shelter, to catching a fish, building a stove, or repairing your gear, discover why the SAK is a must have for every outdoor adventure. Illus. in color. 224 pages. Fox Chapel. Paperbound. Pub. at $12.99 $9.95.

★ 393098 THE WEATHER MACHINE: A Journey Inside the Forecast. By Andrew Blum. Takes readers on a fascinating journey through an everyday miracle. In a quest to understand how the forecast works, Blum visits old weather stations and watches new satellites blast off. The once distant disciplines have quietly entered a golden age of meteorology—our tools allow us to predict weather more accurately than ever, and yet we haven’t learned to trust them. 207 pages. Ecco. Pub. at $25.99 $16.95.

★ 466995 ROCKS & MINERALS: Princeton Field Guides. By Chris & Ellen Pellant. Detailed easy to use guide that contains striking photography of rocks and minerals from around the globe, and is designed to help readers and collectors identify specimens of these compounds. 208 pages. Princeton. Paperbound. Pub. at $19.95 $15.95.

★ 4746902 IN OCEANS DEEP: Courage, Innovation, and Adventure Beneath the Waves. By Richard Pansterg. The tale of the daring pioneers who tested the limits of what the human body can endure underwater: free divers able to reach three hundred feet on a single breath, the first researchers who have quietly entered a golden age of oceanography—and the scientists who uncovered the secrets of decompression, teenagers who built their own diving gear from discarded boilers and more. Illus. 303 pages. Little, Brown. Paperbound. Pub. at $28.99 $18.95.

★ 47003X HOW TO SURVIVE: Self-Reliance in Extreme Circumstances. By John Hudson. John Hudson’s stories told here—deserted on an island, stranded at sea, lost in the jungle, living through a pandemic, and other harrowing events—are described in breathtaking detail from the perspective of a man who knows invaluable lessons for dealing with anything and everything the world may throw at you. 310 pages. Countryman. Paperbound. Pub. at $15.95 $11.95.

★ 392071 NATURALLY NEW JERSEY: A Visual Journey through New Jersey's Parks and Preserves. By Larry Zink. From High Point State Park to Victorian Cape May, from the Palisades cliffs to the Delaware River, New Jersey has a varied and interesting natural landscape, with stunning shorelines and forests that have been preserved for the public.
