OUR GUARANTEE

You must be satisfied with any item purchased from this catalog or return it within 60 days for a full refund. No questions asked.

All items are new, and all books are hardbound unless marked otherwise. Shipment is normally within 48 hours. Some items may be temporarily out of stock, in which case a second shipment will be made, normally in 14 days, but in no case later than 60 days. Most items are in limited supply and at these prices may sell out fast. If any item is sold out your money will be refunded by bank check.
Birlinn. Paperbound. Pub. at $10.95
built these stunning landscapes. Well illus. in color. 48 pages.

THIS IS PLANET EARTH. By New Scientist. Discover the earliest years of Earth and its very unusual moon. Get to know its deep, mysterious interior and the talented sculptor of its surface—plate tectonics—with this fascinating volume. Illus. 274 pages. Nicholas Brealey. Paperback. Pub. at $18.95

TIPPING POINT FOR PLANET EARTH: How Close Are We to the Edge? By A.D. Bambosky & I.A. Hadly. What happens when vast population overgrowth endangers the environment and harms people, pets, and livestock. Combining their expertise as a veterinarian and pharmacologist, they show how conventional drilling sites translates into ill health and heartbeat for families and their animals. 230 pages. Beacon. Paperback. Pub. at $18.00

INTO THE HEART OF OUR WORLD: A Journey to the Center of the Earth—A Remarkable Voyage of Scientific Discovery. By David Whitehouse. An enthralling and extraordinary adventure vividly charting the mysteries of the deep Earth. The history of our planet, and the latest discoveries about its inner core. 16 pages of photos, some color. 270 pages.
Pegasus. Pub. at $27.95

HOW THE EARTH WAS MADE: The Story of Sun and How It Brought About Civilization. By Vince Beiser. The author takes readers on a journey across the globe to explain why sand is so crucial to modern life. Readers encounter world-changing innovators, island building entrepreneurs, desert fighters, and murderous sand pirates. The result is a story that’s both entertaining and eye opening, with fascinating details and compelling characters. 296 pages. Riverhead. Paperback. Pub. at $17.00

THE REAL COST OF FRACKING. As a veterinarian and pharmacologist, they show how conventional drilling sites translates into ill health and heartbeat for families and their animals. 230 pages. Beacon. Paperback. Pub. at $18.00

Edited by K. Bridger. Compilation of more than 1000 articles from New Scientist covering everything from environmental degradation to the changing face of medicine, the future of technology, and the world’s places. Each article is accompanied by a captivating illustration. 800 pages. slidebook. Library binding. Pub. at $24.95

THE WORLD IN A GRAIN: How the American Grainlands Make the Global Landscape and Civilization. By Doug MacDougall. In this lively story of discovery, hardship, and humor, the author examines the work of the H.M.S. Challenger’s expedition scientists, especially the naturalist Henry Morgan, who cataloged the flora and fauna of the islands the ship visited, and the legacy of John Murray, considered the father of modern oceanography. Illus. 257 pages. Yale. Pub. at $30.00

THE REAL COST OF FRACKING. By M. Bamberger & R. Oswald. The authors pull back the curtain on how this toxic process endangers the environment and harms people, pets, and livestock. Combining their expertise as a veterinarian and pharmacologist, they show how conventional drilling sites translates into ill health and heartbeat for families and their animals. 230 pages. Beacon. Paperback. Pub. at $18.00

Combining their expertise as a veterinarian and pharmacologist, they show how conventional drilling sites translates into ill health and heartbeat for families and their animals. 230 pages. Beacon. Paperback. Pub. at $18.00

91936908 LETTERS FROM AN OLD STAMP ALBUM. By W.C. Laidley & C. West. Pick up an old stamp album and flick through it. You’ll find a host of exotic and unfamiliar names, distant lands, vanished territories, and lost countries. This title goes in search of the truth about those amazing places. Enjoy them all in this collection of historical narratives about these lost places. Color photos. 256 pages. History Press. Pub. at $21.95

THE NORTHERN HIGHLANDS: Landscapes in Stone. By Alan McKirdy. The rocks of northern Scotland tell of turbulent events involving continental collisions that unleashed cataclysmic forces and created a vast chain of mountains. This work looks at geologists who have studied the area and we are given insights on some of the most important geological phenomena that built these stunning landscapes. Well illus. in color. 48 pages. Birlinn. Paperback. Pub. at $10.95

LET THERE BE WATER: Israel’s Solution for a Water-Starved World. By Seth M. Siegel. Reveals the methods and techniques of the often offbeat inventors who enable Israel to lead the world on cutting-edge water technology. An inspiring account of the vision and sacrifice by a nation and people that have made water security a top priority. 16 pages of photos, many in color.

★3751341 ENDLESS NOVELTIES OF EXTRAORDINARY INTEREST: The Voyage of H.M.S. Challenger and the Birth of Modern Oceanography. By Doug MacDougall. In this lively story of discovery, hardship, and humor, the author examines the work of the H.M.S. Challenger’s expedition scientists, especially the naturalist Henry Morgan, who cataloged the flora and fauna of the islands the ship visited, and the legacy of John Murray, considered the father of modern oceanography. Illus. 257 pages. Yale. Pub. at $30.00

★370280X HOW THE EARTH WAS MADE: The Complete Season One, New Video. By K. Bridger. Compilation of more than 1000 articles from New Scientist covering everything from environmental degradation to the changing face of medicine, the future of technology, and the world’s places. Each article is accompanied by a captivating illustration. 800 pages. slidebook. Library binding. Pub. at $24.95

★3728335 ORKNEY AND SHETLAND: Landscapes in Stone. By Alan McKirdy. The archipelagos of Orkney and Shetland are products of some of the most dramatic events which have occurred in the Earth’s history. This work tells the incredible geological story of the most northerly outposts of the British Isles. Well illus. in color. 48 pages. Birlinn. Paperback. Pub. at $12.95

★6388388 LET THERE BE WATER: Israel’s Solution for a Water-Starved World. By Seth M. Siegel. Reveals the methods and techniques of the often offbeat inventors who enable Israel to lead the world on cutting-edge water technology. An inspiring account of the vision and sacrifice by a nation and people that have made water security a top priority. 16 pages of photos, many in color.
Darwin had about our ever-changing Earth. 32 pages of illus., most in color. **$6.95**

3721213 FRACKPOLY: The Battle for the Future of Energy and the Environment. By Venona Houston. Once thought to be a science fiction industry, fracking has become the new and biggest environmental threat to our land. Houston’s book is a must for anyone interested in what the author calls “sacrifice zones” across the American landscape. Illus. 364 pages. New Press. **Pub. at $27.95**

***$9.45***

280185X THE SENSE OF WONDER. by Rachel Carson, photos by N. Keish. In 1962, Rachel Carson began work on an essay that she would devote one of her life’s most important projects, introducing a child to the beauty and mystery of nature. This edition features beautiful serene color photographs. 109 pages. HarperCollins. **Paperbound. At $18.99**

***$5.95***

3175758 A LANDOWNER’S GUIDE TO MANAGING YOUR WOODS. By Ann Larkin Hansen et al. Whether you own a few acres of woodland or many, this guide will help you become an active and effective steward of your forest. Beginning with an explanation of the natural processes governing forest development, the authors present active steps you can take to take advantage of the resources they bring to the land and beyond. 298 pages. Storey. **Paperbound. At $19.95**

***$11.95***

3704602 HOW TO GIVE UP PLASTIC: A Guide to Changing the World, One Plastic Bottle at a Time. By Will McCullum. A straight-forward guide that will help you make small changes to eliminate plastic waste from your life. It also contains a wealth of facts, stories, and tactics to help anyone become an activist to get plastic out of their community. 208 pages. Penguin. **Paperbound. At $15.00**

***$11.95***

4626303 OUR DAILY POISON: From Pesticides to Packaging, How Chemicals Harm the Health of Our Planet. By David Bihrle. This book tells a story that will shock and inspire all of us. It proves that we and our children suffer from chemical contamination and how the impact can affect our real world health. **$5.95**

3740153 UNSTOPPABLE: Harnessing Science to Change the World. By Bill Nye. This book is about the strength and power of the human spirit. It provides a clear understanding of what is possible when we work together. It goes well beyond the everyday lives from the pesticides that blanket our crops or the additives and plastics that contaminate our food—and their appalling effects over time. 470 pages. **New Press. At $19.95**

***$14.95***

2908786 EAGER: The Surprising, Secret Life of Beavers and Why They Matter. By Ben Goldfarb. This is a powerful story about one of the world’s most influential species. From the moment the author comes out in search of a beaver, he is confronted with evidence that our landscapes have changed over the centuries, and that beavers can help us fight drought, flooding, wildfire, extinction, and the ravages of climate change. Color illus. 286 pages. Chelsea Green. **Paperbound. At $17.95**

***$14.95***

2891190 DARWIN’S FIRST THEORY: Exploring Darwin’s Quest to Find a Theory of the Earth. By Rob Wesson. Darwin traveled in South America on board the HMS Beagle as a geologist on a mission to examine the geology of South America. This was the beginning of his work for fossils in Uruguay and Argentina, and explores sites of long vanished glaciers in Scotland and Wales. As he follows Darwin’s path, he encounters the land as Darwin did and tackles the same questions Darwin had about our ever-changing Earth. 32 pages. **Penguin. At $13.85**

***$5.95***

6804466 WATER: The Key to New Energy. By Moray B. King. The author explains how gas emitted from popular water electrolyzer projects manifests unusual energetic anomalies, including the use of high power densities, reduction in water volume, the use of a welding torch, and running internal combustion engines on small quantities of gas. Illus. 275 pages. **Adventures Unlimited. Paperbound. At $16.95**

***$13.95***

2587203 EARTH-SHELTERED HOUSES: How to Build an Affordable Underground Home. By Rob Roy. An affordable, earth-sheltered, roofed-over homestead with the least impact on the land all of housing styles, leaving almost zero footprint on the planet and creating a dwelling in harmony with the environment. This guide brings earth-sheltered construction up to date, with plentiful practical help for those who wish to construct one. Photos, some color. 255 pages. **New Society. Paperbound. At $27.95**

***$18.95***

3744641 THIS IS THE WAY THE WORLD ENDS: How Droughts and Die-Offs, Heat Waves and Hurricanes Are Converging on America and What We Can Do About It. By Bryan Walsh. This compelling work peels back the layers of complexity around the unthinkable and inevitable, the end of human kind. From asteroids and artificial intelligence to volcanic super eruptions to nuclear war, the author provides a clear blueprint from real-life, workable solutions we can tackle together. 316 pages. **Picador. Paperbound. At $18.00**

***$12.95***

***$7.95***

***$9.95***

DUD 2829657 EARTH: Population Overload. The human population is growing at an alarming rate that cannot be sustained by current systems. One thing is certain—we must take action now, or the prognosis is bleak. If we don’t find a way to create power and harness alternative energy sources, the effects of the most catastrophic threats to the human race. 406 pages. Hachette. **Paperbound. At $29.00**

***$21.95***

2955598 THE UNINHABITABLE EARTH: Life After Warming. By David Wallace-Wells. Brings into stark relief the climate troubles that await—food shortages, refugee crises, and catastrophic storms. **$21.95**

3721116 THE CLIMATE SWERVE: Reflections on Mind, Hope, and Survival. By Robert Jay Lifton. Lifton draws on the 2015 climate meeting of 2015 where representatives of virtually all nations joined in the recognition that we are a single species in deep trouble, and he draws on the work of President Trump’s withdrawal from the Paris Accords cannot alter that recognition. 178 pages. **New Press. At $22.95**

***$14.95***

6963500 THE WORLD IN A GRAIN: The Story of Sand and How It Transformed Civilization. By Ian Stewart. Takes readers on an exhilarating quest through the cosmos, from our solar system to the entire universe. Provides a clear picture of where we are in our reality, the author reveals the mathematical gears at work in everything, engaging countless cosmological mysteries along the way. 346 pages. **Books. At $27.95**

***$17.95***

2815031 EXTREME WAVES: How Einstein’s Spacetime Ripples Reveal the Secrets of the Universe. By Brian Clegg. At two LIGO observatories in the U.S. scientists developed sensitive detectors, capable of sensing vibrations smaller than the nucleus of an atom. They recorded the ripples produced by two black holes spiraling into each other, setting spacetime quivering. This was the first time black holes had ever been detected. 162 pages. **Penguin Works. Books. Paperbound. At $12.95**

***$9.95***

2975521 VACATION GUIDE TO THE SOLAR SYSTEM. By O. Koski & J. Greivech. Packed with real science, this is the must-have travel guide for any space adventurer, covering all of the essentials for your space voyage, including how to get there, what to do when you arrive. Whether you’re interested in relaxation or romance, the space of science, travel or the cosmos beyond, look no further–your rocket ship awaits. **$7.95**

3722923 EXTREME ATMOSPHERIC SCIENCE AT NASA: A History. By Peter Kappen. The book details how the United States, with NASA at the helm, has worked on understanding the Earth’s atmosphere over the past 35 years. **$7.95**

6834493 CONVERGENCE: The Idea at the Heart of Science. By Peter Watson. Decade after decade, the story captures every crucial scientific advance in order to the present, proceeding like a cosmic detective story, or the world’s most massive code-breaking effort. A brilliant history of science over the past 150 years that offers a powerful argument—that the many disparate scientific branches are converging on the same truths. 543 pages. **S&S. Paperbound. At $35.00**

***$21.95***

3712923 EINSTEIN’S UNFINISHED SYMPHONY: The Story of a Gamble, Two Black Holes, and a New Age of Astronomy. By Marcia Barines. By following the science behind Albert Einstein’s predicted gravitational waves—and now celebrates their recent discovery. Charting the quest to build the Laser Interferometer Gravitational-Wave Observatory (LIGO), Barines reveals the brilliance, personalities, and luck that helped make a space breakthrough. Illus. 280 pages. **Yale. Paperbound. At $18.00**

***$9.95***

3722554 THE TELESCOPE IN THE ICE: Inventing a New Astronomy at the South Pole. By Mark Bowman. The unveiling of the snowball telescope, the most powerful instrument to detect the first extraterrestrial high-energy neutrinos and thus give birth to a new field of science, serves as the backdrop for an introduction to the visionary scientists who built the instrument in some of the most extreme conditions on the planet. 16 pages of photos. 424 pages. **St. Martin’s. Paperbound. At $27.99**

***$4.95***
**Astronomy, Space Travel & Cosmology**

**3762114 GOLDLOCKS AND THE WATER BEARS: The Search for Life in the Universe.** By Louisa Preston. Follow one of the earliest and most enduring questions in science: Is there life on other planets? Preston’s journey takes us through the rich history of the search, showing how current efforts are building on the foundations of earlier work.

**Blacksburg, Paperbound. Pub. at $17.00**

**$4.95**

**3714893 PRACTICAL ASTRONOMER, 2ND EDITION REVISED: Explore the Wonders of the Night Sky.** By W. Gater & A. Vampi. This complete introduction demystifies the night sky, teaches you to recognize constellations, and shows you from the basics of stargazing to the skills you need to become an accomplished amateur astronomer. Fully illus. in color. 264 pages. Dorling Kindersley. Paperbound. Pub. at $19.95

**$7.95**

**293051X MAPPING THE UNIVERSE: Exploring and Chronicling the Cosmos.** By Anne Rooney. Explores our evolving understanding of our own world and others with an informative commentary that accompanies a glorious selection of maps, drawings, paintings, and photographs. The reader is invited to follow the story of how recording the cosmos has progressed over the centuries, from prehistoric depictions to modern day images. 192 pages. Simms. 9x14/11. Pub. at $19.99

**$5.95**

**$12.95**

**2950472 WE HAVE NO IDEA: A Guide to the Unknown Universe.** By J. Cham & D. Whiteson. Armed with their popular cosmography, cham and whiteson have created an unusually entertaining and lucid explanations of science. Cham and Whiteson give us the best answers currently available for a lot of cosmography’s most interesting questions. 354 pages. Riverhead. Pub. at $28.00. $5.95

**3963260 EINSTEIN’S SHADOW: A Black Hole, a Band of Astronomers, and the Quest to See the Unseeable.** By Seth Fletcher. Follows a team of elite scientists on their historic mission to take the first picture of a black hole, putting Einstein’s theory of relativity to its ultimate test and helping to answer our deepest questions about space, time, the origins of the universe, and the nature of reality. Illus. 255 pages. ECQ. Pub. at $26.99

**$7.95**

**6009391 ROCKET BILLIONAIRES.** By Tim Fernholz. For the larger than life personalities now staking their fortunes on the development of rockets and rocketships, the following book is a goldmine of facts and figures to help you navigate the industry. This is a book that is packed with information and is indispensable to anyone interested in the future of space travel.

**Blacksburg, Paperbound. Pub. at $19.95**

**$9.95**

**3706435 FOR ALL MANKIND.** By Harry Hurt III. Between December 1968 and December 1972, twenty-four men captured the imagination of the world as they traveled to the moon, hurling our planet into a dramatic, engrossing, and expansive account of these journeys based on extensive research and exclusive interviews with the Apollo astronauts. Among the many fascinating stories in this book are their thoughts on the future of space exploration. 444 pages. Grove. Paperbound. Pub. at $18.00

**$12.95**

**6009434 THE GLASS UNIVERSE: How the Ladies of the Harvard Observatory Took the Measure of the Stars.** By Dava Sobel. Elegantly written and enriched by excerpts from letters, diaries, and contemporary newspaper articles, this is the story of a group of remarkable women whose astronomical breakthroughs forever changed our understanding of the stars and our place in the universe. 16 pages of photos. 323 pages. Penguin. Paperbound. Pub. at $18.00

**$4.95**

**7587861 FLYING SAUCERS AND SCIENCE: A Scientist Investigates the Mysteries of U.F.O’s.** By Stanton T. Friedman. Presents intriguing data from a number of large-scale scientific UFO studies that almost no one has discussed in detail. Deals with why questions, such as reasons for a cover-up, reasons for aliens to come to Earth, and reasons for them not landing on the White House lawn. Photos. 317 pages. New Page Books. Paperbound. Pub. at $12.95

**$6.95**

**7471109 OUT THERE: A Scientific Guide to Alien Life, Antimatter, and the Human Space Travel (for the Cosmically Curious).** By Michael Ball. Covers questions beyond alien life, venturing into astrophysics, and the physical realities of what long-term life might be like for us in men’s outer space, implications for the possibility of Mars colonies. 246 pages. Grand Central. Pub. at $27.00

**$9.95**

**2860368 CHASING NEW HORIZONS: Inside the Epic First Mission to Pluto.** By A. Siem & D. Grinspoon. The story of the men and women behind this amazing mission; of this decades long commitment and persistence; of the political fights within and outside of NASA; of the sheer human genius it took to design, build, and launch such a complex, multi-national project. New Horizons’ next encounter. 32 pages of photos, most in color. 295 pages. Picador. Pub. at $28.00

**$7.95**

**238315X THE ASTRONOMY BOOK: Big Ideas Simply Explained.** By David W. Hughes et al. Packed with short, pithy explanations of the thought-provoking ideas that populate the field, step by step diagrams that unravel the ideas, quotes that make the astronomical discoveries memorable, and humorous asides that enhance and play with our understanding of the stars.

**Blacksburg, Paperbound. Pub. at $25.00**

**$11.95**

**2881381 A BIG BANG IN A LITTLE ROOM: The Quest to Create New Universes.** By Zentrum, J. Cham & D. Grinspoon. A story of the men and women who risked their reputations and their careers to break our understanding of the universe. 236 pages. Basic. Pub. at $27.97

**$4.95**

**370044X MOON: Art, Science, Culture.** By M. Massy & A. Loske. Presents a rich and authoritative guide to the Moon, with a thought-provoking selection of spectacular images, from iconic early photos using photographic plates, to contemporary images made using the world’s largest and most advanced telescopes and sensitive electronic detectors. The authors take a vivid and engaging look at the Moon, and wond rous cosmos. 192 pages. And re Deutsch. 9x11. Pub. at $21.95

**$12.95**

**376889X BIG BANG IN A LITTLE ROOM: The Thrilling Story of Apolo 11’s Journey to the Moon.** By David H. Kluger. From Mission Control to the astronauts’ return to Earth, Kluger weaves the latest findings in astronomy with her own compelling insights, and presents an illuminated, engaging account of the first manned landing on the lunar surface. 317 pages. Grand Central. Pub. at $27.95

**$9.95**

**238215X CATCHING STARDUST: Comets, Asteroids and the Hunt for Dark Matter.** By C. M. Stern & D. Grinspoon. The story of the men and women at NASA’s Jet Propulsion Laboratory who have used a new technique to search for dark matter and dark energy, and, in doing so, formulate a new unified explanation for dark matter and dark energy, and, in doing so, formulate a new theory of ordinary matter. This volume is for anyone interested in exploring the frontiers of science, including the Sun, Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune; the major moons; the asteroids, comets, dwarf planets, and the Kuiper Belt; and more. Fully illus. 317 pages. Dorling Kindersley. Paperbound. Pub. at $12.95

**$9.95**

**299654X THE TOTAL SKYWATCHER’S MANUAL: Explore the Sky–298 Tips, Tricks, & Skills.** By Linda Shore et al. The Astronomical Society of the Pacific on a thrilling journey through our universe. This astounding guide is full of sky charts and helpful diagrams; you’ll learn how to pick a good pair of binoculars, focus on a star, and use a telescope to identify objects. The authors offer gorgeous images of the view of the Moon, and learn about the mysteries that we’re still investigating via satellites and other technologies. 319 pages. Weldon Oden. Paperbound. Pub. at $16.95

**$12.95**

**298971X CAPTURING THE UNIVERSE: The Most Spectacular Astrophotography from Across the Cosmos.** By Rhodi Evans. Gatherings a thought-provoking selection of spectacular astrophotographs, including early photos using photographic plates, to contemporary images made using the world’s largest and most advanced telescopes and sensitive electronic detectors. The authors take a vivid and engaging look at the Moon, and wond rous cosmos. 192 pages. And re Deutsch. 9x11. Pub. at $21.95

**$14.95**
Astronomy, Space Travel & Cosmology

- FIRE IN THE SKY: Cosmic Collisions, Killer Asteroids, and the Race to Defend Earth by Bob Berman. A scientific adventure story that takes us from scenes of ancient asteroid impacts, like the one that wiped out the dinosaurs, to modern observatories where professional asteroid hunters seek their prey, to sightings of asteroids that sometimes explode in our atmosphere with the force of large nuclear bombs. Color illus. 277 pages. Scribner. Pub. at $27.00 $19.95

- MOON: An Illustrated History by David Wetmore. Chronicles the science and exploration of the Moon, and takes the reader on a thought-provoking journey from the hypotheses of the Moon’s formation to predictions for building a lunar infrastructure. Fully illus., most in color. 212 pages. Bloomsbury. Pub. at $24.95 $13.95

- SPACE STATIONS: The Art, Science, and Reality of Working in Space by Gary Kremenich et al. Takes the reader on a journey through the past, present, and future of space stations with informative text and striking images, that explore not only the spacecraft themselves, but also the science aboard. 240 pages. Smithsonian. $26.95

- MOON: Photographing the Moon 1840–Now, Ed. by Rob Naudts. Takes you on a photographic journey to your nearest celestial body and back again with 19th century historical photographs and archival pages from NASA and Life magazine. The result is a stimulating flow of images that balance on the fine line between fact and fiction, and between bitter seriousness and sweet dreams. 222 pages. Hamilbo, 9x11¼. Pub. at $29.95 $17.95

- YEARBOOK OF ASTRONOMY 2019 by Brian Jones. An essential and inspirational reference filled with sky charts and comprehensive, jargon-free monthly sky notes, for anyone lured by the magic of astronomy and who wants to extend their knowledge of the Universe and the wonders it plays host to. 328 pages. Paperbound. Pub. at $28.95 $21.95

- APOLLO’S MUSE: The Moon in the Age of Photography by M. Fineman & B. Saunders. Traces the history of lunar photography, from newly discovered daguerreotypes of the 1840s to contemporary film and video work. Along the way, the authors explore nineteenth-century efforts to map the lunar surface, whimsical fantasies of life on the moon, and beautiful artwork created in response to the moon landing. 192 pages. MAA. 9⅞x12¼. Pub. at $34.00 $22.95

- LOSING THE NOBEL PRIZE: A Story of Modern Science, and Learning the Nobel Prize Might Hamper Revelation and Discovery in the Publish or Perish World of Science by Jon Larsen. Explore and examine micrometeorites in this photo documentary comprising more than 900 images. This unique explanation explains micrometeorite formation, classification, and analysis, including how to distinguish micrometeorites from all kinds of earthly contaminants. Welcome ash, construction materials, and more. 152 pages. Voyageur. Pub. at $24.99

- SEARCH OF STARLIGHT: Amazing Micrometeorites and Their Terrestrial Impostors by Janui Madsen. A first-person account of the 60+ year search for Micrometeorites. 126 pages. Kype. $18.95

- SPACE 2.0: How Private Spaceflight, a Resurgent NASA, and International Space Station Are Changing the New Space Age by Rod Pyle. We’re on the cusp of a new era in the great adventure of space exploration. This volume will give you a look at the next few decades of spaceflight and long-term missions to Mars, including colonization, utilization, and settlement. The author examines the new partnerships that are revolutionizing and changing the way we reach for the stars. Illus. in color. 317 pages. Delphi. Pub. at $21.95

- MARS: The Missions That Have Transformed Our Understanding of the Red Planet by Rod Pyle. With exceptional access to NASA’s Jet Propulsion Laboratory, the author combines hand-drawn renderings of mission designs, plans, maps, and schematics with first-hand commentary of personal experiences from NASA’s Jet Propulsion Laboratory. Ambitious plans for the future human exploration of Mars are also shown in exquisite detail. 192 pages. Carter, 9x11. Paperbound. Pub. at $29.95 $21.95

- THE APOLLO Missions in the Astronauts’ Own Words by Rod Pyle. Marking the fiftieth anniversary of the first moon landing this volume tells the story of Project Apollo space program through first person accounts by the astronauts themselves. Both their mission dialogue and retrospective reminiscences are included. This is an extraordinary record of one of mankind’s greatest achievements. Illus., most in color. 192 pages. Carter, $24.95 $17.95

- SHOOT FOR THE MOON: The Space Race and the Extraordinary Voyage of Apollo 11 by James Donovan. Set amid the tensions of the Cold War and the upheavals of the sixties, and filled with first-person, behind the scenes details, this is the gripping account of the dangers, the challenges, and the triumph in the Al chemical equation not only Apollo 11, but also the Mercury and Gemini missions that came before it. 24 pages of photos, some color. 453 pages. Little. Brown. Pub. at $30.00 $17.95

- GODS NEVER LEFT US by Erich von Däniken. Contains that recent advancements in biotechnology, astrophysics, and artificial intelligence not only give a fresh perspective on his ancient astronaut theory but validates it. In this book, the author tells the same trajectory of our own interplanetary colonization as the author suggested Earth itself was colonized. 224 pages. New Page Books. Pub. at $16.95 $14.95

- PROJECT APOLLO: The Early Years, 1960-1967 by Eugen Reichl. Covers the early years of the Apollo program (1960-1967), still the most significant space program ever and the single most important period of technical research in history. NASA developed the mighty Saturn rockets, the Apollo spacecraft, and the Lunar lander. Illus., some color. 144 pages. Springer. Pub. at $19.99 $15.99

- PROJECT MERCURY: A Study of Cosmology, Ambition, and the Perils of Science’s Highest Honor by Brian Keating. The mesmerizing quest to unlock cosmology’s biggest mysteries and the human drama that ensued is told. We follow a long personal journey of observation and discovery in the pulsar, or perish world of modern science, and learn the Nobel Prize might hamper scientific progress. Fortunately the author offers practical solutions for visionary reform. Illus. 326 pages. Norton. Paperbound. Pub. at $12.95 $11.95

- UNIVERSAL SPACE: A Guide to the Cosmos by B. Coy & J. Forshaw. Takes readers on an epic journey of scientific exploration, revealing how we can all come to grips with the wonders and mysteries of our own planet. The book contains numerous general questions about our Earth, Sun, and Solar System—and the star-filled galaxies beyond. Well illus., most color. 280 pages. Da Capo, $33.00

- SATURN V: America’s Rocket to the Moon by Eugen Reichl. Tells the gripping story of the Saturn V’s creation: the incredible design and construction and all 32 Apollo missions are discussed. 144 pages. Schiffer. $16.95

- THE SOVIET SPACE PROGRAM: The Lunar Missions, 1959-1976 by Eugen Reichl. With the launch of the Sputnik 1 satellite, the United States fell behind in the space race. This volume chronologically examines the fifty-nine missions the USSR sent or intended to send to the moon from 1959 to 1976. Well illus. in color. 159 pages. Schiffer. $16.95

- MOON OPERATIONS MANUAL: 1958 Onwards by Bob Berman. With moonscapes, line drawings and charts, this reference tours the United States, describing the centers of excellence and the facilities where rockets are tested, satellites are built, and humans prepare for space. 212 pages. Haynes. 8¼x10¼. Pub. at $36.95

- PROJECT APOLLO: The Incredibly True Story of the Race to the Moon by Brian Baker. Relive the experience and all the drama as it is unfolded, from the birth of the Apollo space program and the very beginning and an American astronaut into space to Apollo 11’s successful Moon landing and its splashdown in the Pacific Ocean. This volume tells the thrilling story of the race to the moon, most in color. 192 pages. Arcturus. 9¼x11¼. Pub. at $19.95 $14.99

- ROCKET MEN: The Daring Odyssey of Apollo 8 and the Astronauts Who Made Man’s First Journey to the Moon by Robert Kurson. In this thrilling insider account, the author reveals the untold story behind the astronauts Frank Borman, Jim Lovell, and Anders and their families, that with forever change mankind’s understanding of its place in the universe. It is the definitive story of one of America’s finest hours. 16 pages of photos, some color. 350 pages. Random. Paperbound. Pub. at $20.95 $15.95

- GUARDIAN BACKYARD GUIDE TO THE NIGHT SKY, SECOND EDITION by Andrew Fazekas. This user friendly guide helps you see and understand the wonders of the night sky. Authoritative science and fabulous photographs and graphics reveal beloved constellations and explain the basics of the solar system, the Milky Way, and the far reaches of outer space. 286 pages. National Geographic. Paperbound. Pub. at $24.99

- EARTH OBSERVING by Bob Berman. From the sudden creation of dazzling “new stars” to the furiously explosive birth of our moon, from the uncomfortable truth about ultra high energy cosmic rays bombarding us to the incredible truth that our entire planet has harnessed the cataclysmic energy for its gain, Berman masterfully synthesizes some of our worst fears into an astonishing portrait of the universe. Illus. 308 pages. Little. Brown. Pub. at $31.95 $23.95

- AMERICAN MOONSHOT: John F. Kennedy and the Great Space Race by Douglas Brinkley. Just months after being elected, John F. Kennedy made an astonishing announcement to the nation: we would put a man on the moon, from the uncomfortable truth about ultra high energy cosmic rays bombarding us to the incredible truth that our entire planet has harnessed the cataclysmic energy for its gain, Berman masterfully synthesizes some of our worst fears into an astonishing portrait of the universe. Illus. 308 pages. Little. Brown. Pub. at $31.95 $23.95

- CELESTIAL ATLAS: A Journey in the Sky Through Maps by Elena Perri. This stunning volume, with beautiful illustrations of the most famous, rare, and impressive star atlases ever realized from the 16th century to the present day, will lead you on a journey among the constellations and will introduce you to the progress made by the great astronomers of the past. 208 pages. White Star. 1x1¼x1¼. Pub. at $39.95

- CELESTIAL ATLAS: A Journey in the Sky Through Maps by Elena Perri. This stunning volume, with beautiful illustrations of the most famous, rare, and impressive star atlases ever realized from the 16th century to the present day, will lead you on a journey among the constellations and will introduce you to the progress made by the great astronomers of the past. 208 pages. White Star. 1x1¼x1¼. Pub. at $39.95

6972829 THE END OF THE WORLD. By Peter Brannen. Part road trip, part history, and part cautionary tale, this discussion of the five mass extinctions our world has experienced paints the reader on a tour of the ways that our planet has clawed itself back from the grave, and in the process offers us a glimpse of what’s to come. Color illus. 322 pages. Ecco. Pub at $27.99 $8.95 3714764 EVOLUTION: The Human Story. A visual guide to human evolution brings you face to face with our ancient ancestors. Explains the science, explores our relationship to other primates, and takes you on a journey out of Africa to colonize and settle the world. Fully illus. in color. 256 pages. Dorling Kindersley. 10x12. Pub at $30.00 $14.95 2984733 EVOLUTIONS: Fifteen Myths That Explain Our World. By Orn Hanne Gyllenhammer. Lyrical exploration of how modern science illuminates what it means to be human. 246 pages. FSG. Pub at $26.00 $6.95 375216X WOOLLY: The True Story of the Quest to Revive History’s Most Iconic Extinct Creature. By Ben Mezrich. A scintillating adventure involving a host of extraordinary people, including the intrepid fossil hunters who battle polar bears and extreme conditions in the name of scientific advancement, and a father and son team of Russian scientists working to turn a track of the Siberian tundra into a real-life Jurassic Park. 293 pages. Atria. Paperbound. Pub at $16.00 $5.95 2910683 THE CREATIVE SPARK: How Imagination Made Humans Exceptional. By Agustín Fuentes. Weaving fascinating stories of key moments in human history, Fuentes finds the patterns that match modern behavior in humans. It is this key quality, passed down over millennia, that has propelled the evolution of Homo sapiens into the most advanced species on the face of the earth. 296 pages. S&S. Pub at $26.00 $6.95 5999090 DINOSAUR FOOTPRINTS & TRACKWAYS OF LARIOCA. By C. Pérez-Lorente. The dinosaurs, amphibians, and pterosaurs that lived in the region of La Rioja 120 million years ago left their footprints imprinted in the mud and moist soil. The author describes the tracks, their distribution, and characteristics, and explains what these traces can tell us about the animals who made them. Well illus. 363 pages. INP. Pub at $35.00 $14.95 3750277 GENESIS: The Deep Origin of Species. By O. Wilson. Just as Darwin, in his 1871 Descent of Man, proposed humanity’s origins through the study of apes and human behavior, Wilson synthesizes the modern understanding of evolution to offer a pithy yet path-breaking work of evolutionary theory. Illus. 153 pages. Liveright. Pub at $23.95 $17.95 3759013 PRIMATE CHANGE: How the World We Made Is Remaking Us. By Kirk Cregan-Reid. Spanning the entirety of human history, this is a wide-ranging polemical look at how and why the human body has changed since primate times. The author unscrambles the complex architecture of our modern human bodies, built over millions of years, and reveals the cracks in our foundations. Drawings. 330 pages. Paperbound. $16.95 6898459 SAPIENS: A Brief History of Humankind. By Yuval Noah Harari. Drawing on insights from biology, anthropology, paleontology, and economics, Harari explores how the currents of history have shaped our human societies, the animals and plants around us, and even our personalities. He challenges everything we thought we knew about being human: our thoughts, our actions, our heritage and our future. Illus., some in color. 443 pages. Harper Perennial. Paperbound. Pub at $22.99 16.95 8654214 WHO WE ARE AND HOW WE GOT HERE: Discovery and Science of the Human Past. By David Reich. Groundbreaking work about how the extraction of DNA from ancient bones has profoundly changed our understanding of human history. Reich presents the unprecedented clarity and elegance just how the human genome not only provides all the information that a fertilized human egg needs to develop but also contains within it the story of our species. 336 pages. Pantheon. Pub at $29.95 21.95 3746771 RETHINKING CONSCIOUSNESS: A Scientific Theory of Subjective Experience. By Michael S.A. Graziano. Tracing evolution over millions of years, Graziano uses examples from the natural world to show how neurons first allowed animals to develop simple forms of attention and perception. as time went on, the environment, prioritizing them, responding as necessary. He also discusses what a future with artificial consciousness might be like, and what AI might mean for our evolutionary future. 211 pages. Norton. Pub at $22.95 21.95 3734064 CONSIDER THE PLATYPUS: Evolution Through Biology’s Most Unlikely Inhabitant. By R. Pratto. Science tells us that each creature evolves in its unique way, always according to the same set of rules. But until the platypus came along, scientists knew very little about its unusual biology. In this book, Pratto gives us a glimpse of the Platypus, from birth to adulthood, in fascinating detail. Fully illus. 272 pages. Dog & Leventhal. Pub at $29.99 21.95 2916002 CRUSIN’ THE FOSSIL COASTLINE. By Kirk Johnson, illus. By R. Tottle. Join in for a fossil journey through deep time and discover how the west coast became the place it is today. The authors hunt for fossils, visit museums, meet scientists, and “paleontoplane” to search out the hidden story of extinct worlds in this fascinating volume. Fully illus., most in color. 276 pages. Fulcrum. 10x10. Paperbound. Pub at $35.95 21.95 658382X PALEOZOIC FOSSILS. By Bruce L. Sinichcomb. Explore the rich fossil record of the Paleozoic Era, from Cambrian through the Permian Ages, with 650 high quality color photos and detailed, highly readable text. It presents an invaluable resource for fossil hunters of all kinds, and for those who collect or trade fossils. 180 pages. Schiffer. Pub at $24.95 2916177 PREHISTORIC JOURNEY: A History of Life on Earth. By R.R. Johnson & R.K. Stucky. Introduces readers to the ways that our understanding of the prehistoric world has shifted through an accessible text and colorful photographs of world-class fossils. Arranged chronologically, the book covers the history of life on earth from the beginning of life in the seas to the emergence of the modern world. 144 pages. Fulcrum. 9x11x0. Paperbound. Pub at $29.95 22.95 6874894 UNBOUND: How Eight Technologies Made Us Human and Brought Our World to Its Present. By K. Currie. Synthesizing the findings of palaeontology, paleoanthropology, archaeology, history, and anthropology, Currie reinterprets the modern world and provides a compelling case for how evolution and technology explains both how we got here and how human society must be transformed again to achieve a sustainable future. 16 pages of illus. 376 pages. Arcade. Paperbound. Pub at $16.95 2972935 DINOSAURS REDESCOVERED: The Scientific Revolution in Paleontology. By Michael J. Benton. Gathering together all the latest paleontological evidence and takes us behind the scenes on expeditions and in museum laboratories, tracing the transformation of dinosaur study from its roots in antiquated natural history to a high-tech program that is now changing the scientific field today. Well illus., some in color. 320 pages. Thames & Hudson. Pub at $34.95 21.95 2903431 THE STRANGE ORDER OF THINGS: Life, Feeling, and the Making of Culture by Lewis Carroll. By Vybarr Cregan-Reid. Spanning the entirety of human history, this is a wide-ranging polemical look at how and why the human body has changed since primate times. The author unscrambles the complex architecture of our modern human bodies, built over millions of years, and reveals the cracks in our foundations. Drawings. 330 pages. Paperbound. $16.95 2975610 ORIGINS: How Earth’s History Shapes Our Human History. By Lewis Dartnell. The Earth has played a crucial role in our history, right to the present day. In this title biologist Lewis Dartnell reveals how, throughout Earth’s million-year history, the environment has shaped human evolution and the history of our species. And vice versa: the history becomes science, this account reveals the deep imprint of the planet on the human. Illus. 346 pages. Basic. Paperbound. Pub at $30.00 22.95
**3729532 ATOMIC LAND: A Guided Tour Through the Strange (and Impossibly Small) World of Particle Physics** by Carlo Rovelli. Welcome to a subatomic realm governed by the laws of particle physics. With the author, a physicist as your guide, you’ll set sail from the Provençal coast around the Adriatic Sea, and from the island of Quarks to the very edge of Antimatter. Journey into a unseen world, and to the frontiers of human knowledge. 290 pages. The Experiment. Paperback. Pub. at $14.95 $11.95

**3719693 WHEN EINSTEIN WALKED WITH GODEL: Experiences to the End of His Life** by Erwin Holt. Does the idea of parallel universes underpin Einstein’s strange theory? What is infinity? Why do mirrors reverse left and right but not up and down? In this scintillating collection of essays, Holt explores the human mind, the cosmos, and the thinkers who have tried to encompass the latter with the former. 368 pages. Paperback. Pub. at $28.00 $11.95

**38616X ELEMENTAL: How the Periodic Table Can Now Explain (Nearly) Everything** by Tim James. If you want to understand how our world works, the periodic table holds the answers. This study provides an informative, entertaining, and quickly illustrated guide to the table that shows clearly how this abstract and conceptually daunting chart is a mirror of day to day lives. 216 pages. Overlook. Pub. at $26.00 $18.95

**2828774 THE QUANTUM LABYRINTH: How Richard Feynman and John Wheeler Revolutionized Time and Reality.** By Paul Halpern. In 1939, Feynman, a brilliant graduate of MIT, arrived in Copenhagen to work as a research assistant, and a lifelong friendship was born. As riveting as it is revealing, this work shows how Feynman’s and Wheeler’s remarkable teamwork ensured that quantum physics would never be the same again. Photos. 311 pages. Basic. Paperback. Pub. at $17.95 $12.95

**2903253 HOW THE WORLD WORKS: The Periodic Table** by Anne Rooney. An accessible and engaging account of the discovery of atomic structure, which helped scientists understand the fundamental nature of matter. This book explains how the chemical elements and how they have been formed. The significance of the Periodic Table and its impact on how we understand the world around us as a testament to human curiosity, inspiration, ingenuity, and determination. Illus., most in color. 208 pages. Arcturus. Paperback. Pub. at $14.99 $11.95

**283703X PHYSICS: Idiot’s Guides as Easy as It Gets!** by P. Cipicella & M. Humphrey. In easy to understand terms you get a refraction; and much more. Illus. 340 pages. Alpha. Paperbound. Pub. at $16.95 $12.95

**5829909 BAYESIAN FIELD THEORY** By Jorg C. Lamm. Long the province of mathematicians and stats buffs, Bayesian methods are now applied in this groundbreaking volume to problems in cutting edge physics. Offers practical examples of Bayesian analysis as applied to neural networks, spacetime and quantization, and problems in quantum theory. 411 pages. Johns Hopkins. Pub. at $78.00 $14.95

**3760993 THE ELEMENTS BIBLE: The Definitive Guide to 350 Years of Science** by David E. Muley. Illus. by Kaan Kamil. From the discovery of the very first elements to the naming of the most recent elements in 2016, this little resource makes every daunting scientific concept understandable, memorable, and explains everything you need to know about the fundamental materials that make up our world. Fully illus., most in color. 320 pages. Fireplace. Paperback. Pub. at $19.95 $15.95

**2737390 CHEMICAL ENGINEERING: The Essential Reference Guide** by Louis Theodore. A condensed, authoritative and indispensable primer on what we all want to know: how to walk into a room of strangers and make friends, what to do about a difficult colleague, how to navigate work sometimes–treacherous waters of social media, outlined in a special chapter on “Virtual Manners.” Essential reading—and a call for a return to civility in both private and public life. 226 pages. Scribner. Pub. at $27.00 $19.95

**3729346 THE QUANTUM ASTROLOGER’S HANDBOOK.** By Michael Gabor. In this book, Michael Gabor, a PhD in theoretical physics and astrologer, offers a quantum mechanical interpretation of the zodiac. This guide to the zodiac is written for everyone interested in the intersection of astrology and science. Explains the astrological elements, the planets, and the signs. Illus. 208 pages. Tarcher. Paperback. Pub. at $16.00 $12.95

**6845274 WHAT IS REAL? The Unfinished Quest for the Meaning of Quantum Physics** by Adam Becker. The philosopher who made the modern world is a puzzlement to science. This book takes readers on a tour of the world of quantum physics. Becker sets out to explain the meaning of quantum physics has been Danish physicist Niels Bohr’s Copenhagen interpretation. The author introduces us to the Marxist philosopher who worked with and opposed Bohr, and the story of a debate that led to Bohr’s status quo. A gripping story of the pursuit of scientific truth, what ever the cost. 370 pages. Basic. Paperback. Pub. at $32.00 $23.95

**3736830 WHAT IS REAL? The Unfinished Quest for the Meaning of Quantum Physics** by Adam Becker. The philosopher who made the modern world is a puzzlement to science. This book takes readers on a tour of the world of quantum physics. Becker sets out to explain the meaning of quantum physics has been Danish physicist Niels Bohr’s Copenhagen interpretation. The author introduces us to the Marxist philosopher who worked with and opposed Bohr, and the story of a debate that led to Bohr’s status quo. A gripping story of the pursuit of scientific truth, what ever the cost. 370 pages. Basic. Paperback. Pub. at $32.00 $23.95

**296395 SUBLIMINALLY EXPOSED, By Steven Leary. There is an evolutionary logic to why our appearances allow us to communicate and manipulate conscious and subconscious level. Who you choose to mate, befriend, or work with often pivots on a few critical yet subliminal decisions made within a fraction of a second. This title will reveal the how and why behind your actions and those of others. Illus. 225 pages. Morgan James. Paperback. Pub. at $14.95 $9.45

**29654TX TREATING PEOPLE WELL: The Extraordinary Power of Civility at Work and in Life.** By Liane Carter and Jack Klafl. Civility is essential to a successful career. This book provides readers with powerful techniques to improve their interactions with everyone in their working lives. 128 pages. Haynes. Paperback. Pub. at $18.95 $12.95

**3705277 SELLING THE AMISH: The Tourism of Nostalgia.** By Susan L. Trottier. Trottier examines the visual rhetoric of these uniquely themed places—their architecture, interior decor, even their pages—and explores how these themes project a nostalgic world that brings tourists back year after year. Photos. 193 pages. Johns Hopkins. Pub. at $53.00 $49.95

**2968002 UTOPIA IS CREEPY: And Other Provocations.** By Chris Impey. Clear, compelling, and profound, this book on astrophysics, cosmology, and astrophysics to “flow?” Do we exist in time or does time exist in us? In lyric, accessible prose, Rovelli invites us to consider questions about the nature, weight, and meaning of reality, and the nature of time itself. A physicist and philosophers alike. 240 pages. Riverhead. Pub. at $20.00 $14.95

**386864X THROUGH TWO DOORS AT ONCE: The Elegant Experiment That Captures the Enigma of Our Quantum Reality. By Anil Ananthaswamy. Science’s greatest minds have grappled with the “double-slit” experiment and have used this to test them answer questions about the fabric of the universe. With his gifted elegant, Ananthaswamy travels the world and through history, down to the smallest scales of physical reality we have yet to explore. Through Two Doors at Once. 272 pages. Dutton. Paperback. Pub. at $16.00 $11.95

**6689522 THREE ROADS TO QUANTUM GRAVITY.** By Lee Smolin. 270 pages. Basic. Paperback. Pub. at $16.99 $12.95

**2811146 BLUFFER’S GUIDE TO THE QUANTUM UNIVERSE.** By Jack Klafl. 128 pages. Haynes. Paperback. Pub. at $9.95 $5.95

**2907539 FALLING FEINTS & BLUFFERS GUIDE TO THE QUANTUM EXTRASENSORICITY.** By Adam Becker. The philosopher who made the modern world is a puzzlement to science. This book takes readers on a tour of the world of quantum physics. Becker sets out to explain the meaning of quantum physics has been Danish physicist Niels Bohr’s Copenhagen interpretation. The author introduces us to the Marxist philosopher who worked with and opposed Bohr, and the story of a debate that led to Bohr’s status quo. A gripping story of the pursuit of scientific truth, what ever the cost. 370 pages. Basic. Paperback. Pub. at $32.00 $23.95

**2899492 AN ESSAY ON THE PRINCEPLE OF POPULATION AND OTHER WRITINGS.** By Thomas Malthus. With an introduction by the present-day president and prescient 1798 work on the dangers of population growth. Malthus argued that the rate of population growth will always outstrip food production, leading to periodic famines and social upheaval. This comes from population control, a relevant argument amid today’s concerns over global resources. This edition also includes other works by the author. 305 pages. Penguin. Paperback. Pub. at $18.00 $9.95

Education

**Return to Study Handbook**
By Chie Burroughs. Have you looked back at your old study skills? This handbook is perfect for professional and distance learners, part-time and mature students, and formal CPD qualification candidates, this volume will help you to recover your studying effectiveness for your ongoing education and get the grades you need to advance in your career. 221 pages.
Kogan Page. Paperback. Pub. at $19.95

**Learn to Drive to 10 Easy Steps, 7th Edition**
By John Wells. This guide is all about getting your license and knowledge you need to know about driving in Great Britain and preparing for your British driver’s license. Well illus. in color. 333 pages. Kogan Page. Paperback. Pub. at $19.95

**Picture These Sad Words! Third Edition**

**50 Successful Harvard Application Essays, 4th Edition**

**Veterinary Medical School Admission Requirements, 2019 Edition**

**Classroom-Ready Number Talks for Kindergarten, 1st and 2nd Grade Teachers.**

**Speed Reading in a Week**

**How to Prepare for the Ged Test, 2nd Edition**
By Christopher M. Sharpe et al. 756 pages. Barron’s. Paperback. Pub. at $19.95

**Prepare for Your British Driver’s License**
By Paul & Claire Falconer. 164 pages. LearningExpress. 8½x11. Paperback. Pub. at $4.95

**How to Trace Your Family Tree in Italy**
2962470

**The Family Tree Scottish Genealogy Guide**
By Amanda Epperson. This guide will help you uncover your Scottish heritage, from identifying your immigrant ancestor to tracking down records in the old country. With expert guidance, you’ll learn about church records, civil registrations, censuses, and more, plus how to find them in online databases and in archives. Illus. 238 pages. Family Tree Books. Paperback. Pub. at $26.99

**Unofficial Guide to Ancestry.com: How to Find Your Family History on the #1 Genealogy Website**
By Nancy Hendrickson. This guide will help you get the most out of your Ancestry.com subscription. Each chapter includes step by step examples with illustrations to show exactly how to apply these techniques to your genealogy. A section on AncestryDNA will also help you understand and analyze your DNA test results. Illus. 272 pages. Family Tree Books. Paperback. Pub. at $26.99

**The Public Domain, 8th Edition**
Find and Use Free Content for Tests, Art, and More. By Stephen Fishman. Helps you to find and identify which creative works are protected by copyright and which are not and covers the rules for writings, music, art, photographs, software, and more. Also covers the latest legal developments regarding copyright and the public domain. 433 pages. Nolo. Paperback. Pub. at $39.99

**Family Tree Genealogy: DNA Testing and Genetic Genealogy**
By Blaine T. Bettinger. With this plain English guide, you’ll discover what DNA tests are available, the pros and cons of the three major testing companies, and how to approach choosing the right test to answer your specific questions. Once you’ve taken the test, it will demystify the results, and offer third-party tools to help with your research. 240 pages. Family Tree Books. Paperback. Pub. at $29.99

**The Brave Learner: Finding Everyday Magic**
By Julie Bogart. 294 pages.

Research Tools & Sourcebooks

By Henry M. Robert III et al. This edition is the only current manual of parliamentary procedure to have been maintained and updated since 1876. As indispensable now as when the first edition was released more than a century ago, it is the reference for everyone who needs to abide by the rules of a board, committee, or meeting. 716 pages. Da Capo. Paperback. Pub. at $18.99

**The Everything Guide to Crowdfunding**
Learn to Use Social Media for Crowdfunding Business by Thomas Elliott Young. A step by step handbook to harnessing the power of social media to raise funds. Inside, you’ll find real life case studies and tested techniques for creating a successful campaign. 287 pages.
Adams Media. Paperback. Pub. at $16.95

**The Family Tree Problem Solver, 3rd Edition**
By Marshia Hoffman Rising. Features the solutions you need to conquer genealogy’s toughest challenges: work-arounds for destroyed records; techniques for finding ancestors with common names; ideas on how to find vital records before civil registration begins; strategies for finding individuals “missing” censuses, and much more. Illus. 270 pages. Family Tree Books. Paperback. Pub. at $24.99

**The Family Tree Historical Newspapers Guide**
How to Use Ancestry’s Archival Newspapers. By James M. Beider. When researched properly no other type of record can beat historical newspapers in “taking the pulse” of their times and places, recording not just names, but events, observations, and interactions to the community. This comprehensive guide will show you how to harvest this social media to learn about your ancestors and the places they lived in. Illus. 240 pages. Family Tree Books. Paperback. Pub. at $25.99

**The Little Book of Elvis Presley**
By Malcolm Croft. This little volume is filled with quotations by and about, the original king of rock ‘n’ roll. From insightful quotes by fellow artists, collaborators and friends, to words of wisdom from within, you’ll find more than 170 amusing and inspiring sounds.

**The Little Book of Quotations**
By Robert Arp. Filled with the words of great thinkers and speakers—not just sassy one-liners—but also philosophical quips that are sure to range from laugh out loud to deep. Lavishly illustrated it draws on a truly global, multicultural range of thinkers from ancient times to the present. SHOPWORN. 960 pages. Universe. Pub. at $39.95

**The Three Little Pigs Teach Growth Mindset**

**Webster’s New Pocket Thesaurus**
By P. Hellweg & T.P. Nhan. With 4,000 main entries and more than 36,000 synonyms, this is the perfect tool for expanding vocabulary, improving writing, and preparing for language proficiency tests. An essential desk reference. Each entry contains 100 synonyms, a feature not found in most other dictionaries. An example sentence is given showing the typical usage of every entry word. 225 pages. HMH. Paperback. Pub. at $16.99

**The Little Book of Yiddish**

Words & Language

**The Little Black Book of Lawyer’s Wisdom**
Ed. by Tony Lyons. This little volume is filled with quotes from renowned lawyers, judges, authors, politicians, philosophers and teachers who have distilled a diverse assortment of over two hundred bite-sized quotations about justice, philosophy, crime, the life of a lawyer, landmark cases and more. 361 pages. Skyhorse. Pub. at $16.99

**The Little Book of Jewish Wisdom**
By Ingalls Wilder. The Little House books are filled with thoughtful insights and words of wisdom that highlight Laura’s poignant wit and her sharp observation.
