**56811X BEGINNING CHEMISTRY, SECOND EDITION: Schaum’s Easy Outlines. By David Jordan.** This super-condensed guide is built for quick, effective study that will make mastering this subject fast, fun, and painless. Includes coverage of such topics as formula calculations, chemical bonding, stoichiometry, rates and equilibrium, chemical equations, and more. 138 pages. McGraw-Hill. Paperback. Pub. at $11.00 $4.95

**268958 CHEMISTRY FOR THE UUTTERLY CONFUSED. By J.T. Moore & R.H. Langley.** This textbook is packed with everything you need to know about chemical concepts, from thermodynamics, acid-base, and covalent bonding to periodic trends and molecular forces. Includes practical problems with solutions to explain fundamental principles. 335 pages. McGraw-Hill. Paperback. Pub. at $19.00 $5.95

**4585487 THE HANDY CHEMISTRY ANSWER BOOK. By J.C. Stewart & J.P. Lomont.** In an engaging, easy to follow Q&A format, chemical concepts are tackled and explained in plain English. Covers the basics of chemistry (history, atomic structures, chemical bonds and reactions, etc.) to more advanced material (nuclear chemistry, biochemistry, physical and theoretical chemistry). Well illus. 388 pages. Viking. Paperback. Pub. at $21.95 $7.95

**8632141 THE BEAUTIFUL INVISIBLE: Creativity, Imagination, and Theoretical Physics. By Giovanni Vignale.** In this readable work, Vignale takes us through the austere and elegant abstract landscapes of theoretical physics, full of entities such as particles, light rays, spinning electrons, and fields of force. Entities that have no real existence, but are the images of minds. 303 pages. Oxford. Pub. at $34.95 $7.95

**3634159 THE COMPLETE IDIOT’S GUIDE TO PHYSICS, SECOND EDITION. By Dennis Gabor & George Johnson.** This introduction to high school and first-year college level physics includes down to earth explanations of complex concepts, and makes understanding the many dimensions of physics easy, with no calculus required. Includes dozens of practice problems and their solutions. Illus. 392 pages. Alpha. Paperback. Pub. at $18.95 $6.95

**3619963 TRESPASSING ON EINSTEIN’S LAWN: A Father, a Daughter, and the Quest of Nothing, and the Beginning of Everything. By Amanda Gefter.** Takes you on a life-altering quest with Gefter, a science writer, and her father Warren as they search for the answers to the universe’s greatest mysteries. What they discover is a theory of cosmology, in which a single universe is all we have to a splintered reality in which each observer has her own. Photos. 418 pages. Bantam. Pub. at $28.00 $4.95

**1664811 EXERCISES FOR THE FEYNMAN LECTURES ON PHYSICS: The New Millennium Edition. By Richard Feynman et al.** Combined into one volume for the first time, this volume provides comprehensive, hands-on practice in all the most important areas of physics. With these exercises, students will have a chance to apply what they have learned and practiced. Basic. 8x11. Paperback. Pub. at $24.99 $16.95

**4644840 HOW THE HIPPIES SAVED PHYSICS: Science, Counterculture, and the Quantum Revival. By David Kaiser.** Introduces the reader to a band of free-wheeling physicists who defied the imperative to “shut up and calculate” and helped redefine modern physics. Kaiser reveals that the importance of quantum information theory has a psychadelic background, led by a group of young physicists from Berkeley. Photos. 372 pages. Norton. Pub. at $26.95 $8.95

**5830192 INTRODUCTION TO THE PHYSICS OF GYROTRONS. By Gregory S. Husnivich.** As unique sources of coherent high-power, millimeter, and millimeter-wave radiation, gyrotrons are an essential part of the hunt for controlled fusion. This text, designed to introduce the non-specialist to the technology of gyrotrons, explains the fundamental physical principles. 335 pages. Johns Hopkins. Pub. at $97.00 $9.95

**654118X PHYSICS AND THE MUSICAL SCIENCE: Thomas Young, the Sound of Sound. By Harvey E. & Donald H. White.** Comprehensive yet readable, this wide-ranging study relates to acoustics, beginning with a brief history of the art and science of music. Succeeding chapters explore the general principles of sound, musical scales, characteristics of instruments, and much more. Illus. 417 pages. Oxford. Paperback. Pub. at $22.95 $5.95

**6381552 SYNTHETIC FUELS. By R.F. Probst & R.E. Hicks.** Designed to train engineers in the production of synthetic fuels to replace dwindling supplies of natural ones. Includes a review of chemical and physical fundamental concepts and conversion fundamentals, liquids and solids produced from coal, biomass conversion, liquids obtained from oil shale, and more. Illus. 490 pages. Dover. Paperback. Pub. at $24.95 $2.95

**7333579 QUANTUM MECHANICS: The Theoretical Minimum. By L. Susskind & A. Friedman.** In this follow-up to Theoretical Minimum, Susskind and Friedman provide a lively introduction to the world of quantum physics, the quantum logic of the wave function, and approachable explanations of the famously difficult topic. 364 pages. Basic. Paperback. Pub. at $17.99 $12.95

**3385798 3,000 SOLVED PROBLEMS IN PHYSICS: Schaum’s Outlines. By Alvin Hayden.** A first course in mathematical introduction, equilibrium of concurrent forces, Newton’s laws of motion, motion in a plane, kinetic energy, hydrodynamics, heat transfer, magnetic properties of materials, and much more. 751 pages. McGraw-Hill. Paperback. Pub. at $28.00 $18.95

**5782465 AN ATLAS OF FULLERENES. By P.W. Fowler & D.E. Manolopoulos.** Presents the story of two scientists who discovered these exotic molecules—both at the time the existence of the electromagnetic field and devised a radically new theoretical model to explain it. First published in 1995. An introduction to the current state of theory in a new and lively field, this volume offers both students and researchers a practical guide. It features a comprehensive set of pictures of fullerenes structures and tabulates their properties. 392 pages. Dover. Paperback. Pub. at $22.95 $4.95

**3619206 RADIOACTIVE TRANSFORMATIONS. By Ernest Rutherford.** Describes Ernest Rutherford’s Nobel Prize-winning work. This revised edition published in 1995. First published in 1920. An introduction to the current state of theory in a new and lively field, this volume offers both students and researchers a practical guide. It features a comprehensive set of pictures of fullerenes structures and tabulates their properties. 387 pages. Yale. Paperback. Pub. at $26.95 $16.95

**4639610 CRACKING THE PARTICLE CODE OF THE UNIVERSE: The Hunt for the Higgs Boson. By John W. Moffat.** In a rare objective treatment of high-energy physics, Moffat unravels the arena of theoretical and experimental particle physics that led up to the Higgs boson milestone, and makes a compelling case that analyses still must be performed before we can confirm our discovery. 232 pages. Oxford. Pub. at $29.95 $19.95

**5385622 THE PHYSICS BOOK: From the Big Bang to Quantum Reality, 250 Milestones in the History of Physics. By Clifford A. Pickover.** Traces 250 of the most illuminating achievements in physics, the “milestones” that explain our very fabric of reality. In addition to odd and perplexing marvels, like the 1965 ultra-bouncy Super Ball, milestones touch on engineering and applied physics, the strange dance of subatomic objects, and even a few subjects that are quite philosophical. Color photos. 528 pages. Sterling. Pub. at $29.95 $19.95

**5737321 ORGANIC CHEMISTRY, SECOND EDITION: Schaum’s Easy Outlines. By Herbert Meislich et al. Master these concepts almost instantly: Structures and Properties; Reactivity and Mechanisms; and Stereochemistry; Alkenes, Alkynes, and Dienes; Alky Halides; Spectroscopy and Structure; Alcohols, Ethers, and Epoxides, and more. Illus. 138 pages. McGraw-Hill. Paperback. Pub. at $12.00 $2.95

**5731615 LOVE, LITERATURE, AND THE QUANTUM ATOM. By F. Aaserud & J.L. Heibron.** Presents unpublished excerpts from extensive correspondence between Niels Bohr and his immediate family and uses them to describe and analyze the psychological and cultural background to his invention. Also contains a reprinting of the three papers of 1913 in which Bohr worked out the provisional basis of a quantum theory of the atom. Photos. 284 pages. Oxford. Pub. at $15.95 $16.95

**5820472 TIME TRAVEL: A History. By James Gleick.** A mind-bending exploration of time travel. Gleick tracks the evolution of time travel as an idea that became part of contemporary culture, investigating loops paradoxes, and examines the porous boundary between pulp fiction and modern physics. Finally, he explores our instantaneous wired world, with its all-consuming present and vanishing future. 336 pages. Pantheon. Pub. at $29.95 $12.95

**5855979 THE FEYNMAN LECTURES ON PHYSICS: The New Millennium Edition. By Richard P. Feynman et al.** Ranging from basic Newtonian dynamics through such formidable theories as Einstein’s relativity, Maxwell’s electrodynamics, and Dirac’s formulation of quantum mechanics, these lectures stand as a monument to clear exposition and deep insight. The new edition features improved typography, figures, and indexes. 1,552 pages in three volumes, slipcased. Illus. Basic. 8x11. Paperback. Pub. at $195.00 $124.95

**2739900 INDUSTRIAL CHEMICAL PROCESS DESIGN, SECOND EDITION. By Frank H. Stein and Donald J. Gagnon.** Now containing 200 illustrations, this practical, comprehensive resource presents complex operations and formulas in an easy to understand format. Content is designed to incorporate helpful software tools into your daily practice. 414 pages. McGraw-Hill. Pub. at $125.00 $29.95

But in this provocative study, Gedo asserts that reliable, measurable perspectives, to help us become more in tune with the planet.

The focus of this book is to cut through the apparent complexity of autism and provide a coherent, comprehensive understanding of the condition. It is written for both parents and professionals, and is based on the author's own experiences as a mother of a child with autism.

This book offers a fresh perspective on the nature of autism, drawing on the latest research in neuroscience, psychology, and education. It provides a clear and logical explanation of the causes and effects of autism, and offers practical guidance for parents and educators on how to support children with autism.

The book covers a wide range of topics, including the biology of autism, the environmental and genetic factors that contribute to the condition, and the social and educational challenges faced by children with autism. It also explores the latest research on interventions and therapies for autism, and provides a realistic assessment of the prospects for future research.

Overall, this book is a valuable resource for anyone who is interested in understanding autism, from parents and educators to researchers and policymakers. It is written in an accessible and engaging style, and is a must-read for anyone who wants to gain a deeper understanding of this complex and fascinating condition.
